Miller, 2017-07-28 Neal E Miller s pioneering work in experimental psychology has earned him worldwide respect This second in a two volume collection of his work brings together forty three of Miller s most important and representative essays on learning motivation and their physiological mechanisms They were selected on the basis of their current relevance and their historical significance at the time they were published In order to emphasize the main themes essays on a given topic have been grouped together Learning Motivation and Their Physiological Mechanisms begins when the author first discovered the thrill of designing and executing experiments to get clear cut answers concerning the behavior of children and of rats The first study was one of the earliest ones on the behavioral effects of the recently synthesized male hormone testosterone The second was one of the earliest studies demonstrating the value of using a variety of behavioral techniques to investigate the motivational effects of a physiological intervention The next studies investigated the satisfying and rewarding effects of food or water in the stomach versus in the mouth and the thirst inducing and reducing effects of hyper and hypotonic solutions respectively injected into the brain The last study describes a technique devised for extending the analysis of the mechanism of hunger to the effects of humoral factors in the blood The study is completed with an examination of trial and error learning that was motivated by direct electrical stimulation of the brain and rewarded by the termination of such stimulation Other studies show that the stimulation via such electrodes not only elicits eating but also has the principal motivational characteristics of normal hunger The conclusion deals with a series

The scent of antiseptic and decay hangs heavy in the air a grim perfume clinging to the rain slicked streets of the city This is the city of shadows where secrets fester in the darkness and the echoes of violence reverberate through the night Detective Santos a man haunted by a past trauma as sharp as a shattered bone is our protagonist or perhaps our anti hero His hand severed by the Surgeon s chilling precision is a constant reminder of the cost of his past encounter This isn t a story of a man seeking justice it s the relentless pursuit of retribution a spiral into the depths of his own fractured psyche Each carefully constructed crime scene is a masterpiece of grotesque artistry a testament to the Surgeon s twisted genius Santos s
