Raiders Desert Strike Force:

The Raiders: Desert Strike Force Arthur Swinson, 1968 *Desert Raiders* Andrea Molinari, 2013-02-20 Although harsh and inhospitable the North African theatre of World War II proved to be a perfect environment for irregular warfare and the deployment of Special Forces Following Italy's entry into the war in June 1940 the Western Desert became the background for a long conflict dominated by motorized units The major combatants Great Britain Free France Italy and Germany all developed irregular units to exploit the unique conditions of the region with varying degrees of success This book details the genesis organization and tactics of these forces including such famous units as the Long Range Desert Group and the Special Air Service **SAS Ghost Patrol** Damien Lewis, 2018-11-20 An amazing account of Britain's most audacious act of subterfuge in WWII an undercover raid of Rommel's stronghold in Tobruk The Daily Mirror On a scorching September day in 1942 the Special Air Service SAS a special forces unit of the British Army pulled off one of the most daring top secret ruses of the Second World War The plan sanctioned by Churchill cover a grueling two thousand miles of the Sahara desert to attack German general Erwin Rommel's seemingly impregnable port fortress in North Africa from the rear to break free and arm more than thirty thousand Allied POWs Led by Capt Herbert Buck and posing as Afrika Korps soldiers complete with German uniforms and weaponry the crew broke into the enemy stronghold Trojan Horse style as part of the coordinated attack on Tobruk Intensively researched powerfully written and culled from the private diaries of the do or die maverick heroes this extraordinary story of the sneak attack on the notorious Desert Fox is more thrilling than any fiction A bold outrageous and rule shattering mission impossible SAS Ghost Patrol is one of the great untold stories of WWII Bear Grylls

Special Operations in World War II Andrew L. Hargreaves, 2013-10-28 British and American commanders first used modern special forces in support of conventional military operations during World War II Since then although special ops have featured prominently in popular culture and media coverage of wars the academic study of irregular warfare has remained as elusive as the practitioners of special operations themselves This book is the first comprehensive study of the development application and value of Anglo American commando and special forces units during the Second World War Special forces are intensively trained specially selected military units performing unconventional and often high risk missions In this book Andrew L Hargreaves not only describes tactics and operations but also outlines the distinctions between commandos and special forces traces their evolution during the war explains how the Anglo American alliance functioned in the creation and use of these units looks at their command and control arrangements evaluates their impact and assesses their cost effectiveness The first real impetus for the creation of British specialist formations came in the desperate summer of 1940 when having been pushed out of Europe following defeat in France and the Low Countries Britain began to turn to irregular forces in an effort to wrest back the strategic initiative from the enemy The development of special forces by the United States was also a direct consequence of defeat After Pearl Harbor Hargreaves shows the Americans found themselves

in much the same position as Britain had been in 1940 shocked outnumbered and conventionally defeated they were unable to come to grips with the enemy on a large scale By the end of the war a variety of these units had overcome a multitude of evolutionary hurdles and made valuable contributions to practically every theater of operation In describing how Britain and the United States worked independently and cooperatively to invent and put into practice a fundamentally new way of waging war this book demonstrates the two nations flexibility adaptability and ability to innovate during World War II

Special Operations and Strategy James D. Kiras, 2006-07-29 This book argues that the root of effective special operations lies in understanding the relationship between moral and material attrition this is achieved by examining both strategic theory and real life case studies

Employment of the Engineer System in Arid Mountainous and Desert Areas--a Concept Paper Paul G. Cerjan, Theodore G. Stroup, 1981 The employment of the Engineer system is examined for desert and arid mountainous terrain Geographic focus for the paper is the Mediterranean basin along North Africa the Arabian Peninsula Southwest Asia and the horn of Africa Such terrain presents the military engineer a terrain spectrum not heretofore considered in the last two or three decades Historical research provides lessons learned from WW II 1967 and 1973 wars Impact on system elements mobility countermobility survivability and general engineering vis a vis the terrain is discussed Considerations and recommendations are offered for each system element for realistic and timely implementation rather than long development processes and large resource outlays Engineer force structure considerations are postulated for a deployment into an austere arid area Additional considerations are presented for areas of doctrine equipment and training Commanders and staff officers of engineer and engineer supported units should be able to garner ideas and techniques from paper discussion for potential near term contingency missions and projects focused on desert and arid mountainous terrain areas

The Hall of Mirrors Jim Storr, 2019-05-09 The military scholar and author of *The Human Face of War* analyses the nature of 20th century war and warfare in this wide ranging study The 20th Century was possibly the most violent and turbulent century in history The wars waged in those ten decades reshaped the globe and wreaked an incalculable toll on human life In *The Hall of Mirrors* military analyst and historian Jim Storr explores what can we learn from war and warfare in the 20th century Rather than presenting a narrative history *The Hall of Mirrors* takes a deep look at the nature of 20th Century war and warfare Storr looks at the strategy operational art and tactics employed He analyzes how technology developed and how those technologies affected military events He also considers the effect of individual human beings and organizations By 1919 the First World War was already over Millions had died empires had crumbled new nations had been born And yet the so called Great War was merely setting the stage for another eighty years of crisis conflict and change of alliances forged and broken of apparent chaos that can appear futile and yet has enormous consequence

The War in North Africa, 1940-1943 Colin F. Baxter, 1996-03-30 Few of the major campaigns of World War II aroused as much controversy as the War in North Africa 1940 1943 Figures such as Rommel Montgomery and Eisenhower would become

world famous because of the fighting in North Africa This book opens with seven historiographical essays that evaluate and critically assess the major contributions to the literature on the War in North Africa It then includes an alphabetically arranged bibliography of the 504 entries cited in the essays The material is easily accessible with cross references between the text and the bibliography and a full index The volume includes chapters on the Desert War 1940-42 the Axis Powers in North Africa Montgomery Alam Halfa and El Alamein TORCH the Landings in French North Africa and the Tunisian Campaign Full attention is given to questions and issues historians have raised on such controversies as the Auchinleck Montgomery dispute the debate over Operation TORCH and the Darlan affair Emphasis is on English language works but the most significant Italian German and French works are cited and assessed The book has been written for use in public college university and institutional libraries and to serve general readers and military historians

V-Bombs and Weathermaps Brock McElheran, 1995 Towards the end of World War II Germany unleashed its weapons of vengeance on the British population the V 1 flying bomb a pilotless aircraft and the V 2 rocket the precursor of the ballistic missile Brock McElheran experienced these fearsome weapons first hand In V Bombs and Weathermaps he recounts his own experience of being under attack and pays tribute to the brave civilians in southern England He shows that the German assault on the British population was as much a battle as any of the more familiar campaigns on the continent A meteorological officer in the Royal Canadian Navy McElheran studied at the Royal Naval College in Greenwich and served at naval air stations in southern England During a V 1 attack he was seriously injured when his rooming house in Greenwich was hit Taken to the Queen Victoria Hospital in East Grinstead famous for its pioneering work in plastic surgery he underwent several operations and months of treatment Back in Canada McElheran worked in operations rooms in Ottawa and Halifax His memoirs include previously untold stories of naval warfare off Canada's east coast Using the journal that he kept at the time as his primary source he combines personal experience anecdote and historical fact in this highly readable account of a tense but exhilarating time Written for the general reader the mood varies from gripping drama to delightful humour and the author's personal experiences are placed within the larger historical context of World War II

Forgotten Allies J. Lee Ready, 1985-01-01 Many nations played a role as belligerents on the Allied side in World War II Many were in the thick of combat and made grave national sacrifices yet general histories mention them only briefly or omit their story entirely The assisting troops are given their due in this unique comprehensive and readable history Included are chapters about land and sea troops from such countries as Fiji Trans Jordan Luxembourg Brazil Iran and Nigeria as well as Maori Assyrians Gurkhas Free Poles and others Knowing the lines drawn more than 70 years ago between sides will enable anyone to understand better national enmities and relations today

The Evolution from Horse to Automobile Imes Chiu, 2008 Little work has been done to explicate the motivational factors of agency particularly in cases where an artifact initially deemed ineffective or superfluous becomes an everyday necessity such as the automobile at the turn of the twentieth century Farmers saw it as

a devil wagon but later adopted it for use as an all around device and power source What makes a social group change its position about a particular artifact How did the devil wagon overcome its notoriety to become a prosaic mainstream device These questions direct the research in this book While they may have been asked before author Imes Chiu PhD Cornell University brings a different and refreshing approach to the problem of newness Preexisting practices and work routines used as explanatory devices have something interesting to say about diffusion strategies and localization measures This innovative study examines the conversion of users To understand the motivating factors in mass adoption the study focuses on perceptions and practices associated with horses and motorcars in three different settings during three different periods All three cases begin with the motorcar in the periphery all three end with it achieving ubiquity This multiple case design is used for the purpose of theoretical replication Results in all three cases show that a contrived likeness to its competitor the horse contributed to the motorcar s success The motorcar absorbed the technical material structural and conceptual resources of the technology it displaced This book which includes several rare photographs will be an important resource for those who wish to study the history of transportation and technology adaptation

The Bullet's Song William Pfaff,2004-11-04 Publisher Description *The Era of World War II* Louise A. Arnold-Friend,1979 [The Human Face of War](#) Jim Storr,2011-10-27 Warfare is hugely important The fates of nations and even continents often rests on the outcome of war and thus on how its practitioners consider war The Human Face of War is a new exploration of military thought It starts with the observation that much military thought is poorly developed often incoherent and riddled with paradox The author contends that what is missing from British and American writing on warfare is any underpinning mental approach or philosophy Why are some tank commanders snipers fighter pilots or submarine commanders far more effective than others Why are many generals sacked at the outbreak of war The Human Face of War examines such phenomena and seeks to explain them The author argues that military thought should be based on an approach which reflects the nature of combat Combat fighting is primarily a human phenomenon dominated by human behaviour The book explores some of those human issues and their practical consequences The Human Face of War calls for and suggests a new way of considering war and warfare

Special Bibliographic Series US Army Military History Research Collection,1978 [The Other Desert War](#) John W. Gordon,1987-02-17 Gordon s book reveals an impressive mastery of the archival and secondary sources available on the subject His writing is crisp and interesting yet sober and scholarly at the same time The daring and resourceful men of the British desert forces have found a historian whose ability to tell their story matches their ability to create some of the most daring and imaginative operations of World War II This is an extraordinary book about extraordinary soldiers Military Review

Planning for Conflict in the Twenty-First Century Brian Hanley,2007-11-30 This book aims to serve the military profession and so the national interest by helping to generate intelligent reform of how the armed forces train educate and promote officers who shape our military strategy and write our war plans Readers will discover the professional

and intellectual improvement that wide reading in the masters of historical narrative offers to them The first chapter Lessons Not Learned surveys our strategic documents and their recent applications and offers criticism and recommendations The second chapter Transformation Ballyhoo evaluates our current efforts at military transformation and offers an alternative approach to rehabilitating our armed forces The third chapter The Brain of An Army offers ideas on building a first rate Joint War College Chapters four through six focus on military campaigns France 1940 Stalingrad North Africa 1940 43 The theme is that moral and intellectual qualities determine the fate of armies in war and that material and bureaucratic machinery are not nearly so vital as we seem to think nowadays
