and rejuvenate corporate governance But is China's railway reform really a story of convergence and will the Chinese government follow the western model of railway reform Addressing these questions this book provides a positive explanation of the reform in China's railway sector between 1978 and the dissolution of the Ministry of Railways It bridges the socialist reform and transport policy literature and studies the empirical changes of the property rights arrangements in China's railway system Refuting the convergence theory it concludes that the cyclical reform policies of decentralization and re-centralization were actually an exploratory and interactive mechanism of assets discovery and assets recovery This in depth study is based on 21 face to face interviews with railway cadres as well as field trips to collect first hand information in Guangzhou Beijing Shanghai Tianjin and Wuhan As one of the only empirical studies on the reform of the railway sector in China this book will be of interest to students and scholars of China studies Transport studies and Political Economy
