Pictorial History of America , 1958 The dramatic story of the United States and Canada from the age of discovery to the Atomic Era told in 2500 pictures 200 000 words and 55 historical maps in full color **The Iron Road** Christian Wolmar, 2014-05-01 The Iron Road is full of wondrous curiosities Did you know that early trains in Australia were pulled by convicts or that elephants were until recently used to shunt freight wagons in India The world s most magnificent railway station the Chhatrapati Shivaji terminal in Mumbai took 10 years to build The longest possible continuous railway journey in the world is the 10 600 miles between Algeciras in Spain and Ho Chi Minh City in Vietnam And the idea that Mussolini made the trains run on time is a myth No invention not even the Internet has ever transformed the way the world traveled worked thought fought ate drank made love you name it the way the train did From the historic moment in September 1830 when the first train chuffed between Liverpool and Manchester UK there was a race to lay down tracks across the planet Adventurers visionaries and rogues were attracted to grandiose projects linking distant corners of the globe in a quest for wealth power and national unity The achievements were heroic India s railway network was the biggest public works project since the building of the pyramids But the human costs were huge In the 1850s six thousand workers died during the construction of the Panama railway the world s first transcontinental line 120 for each mile of railroad The cadavers were pickled and sold to medical schools around the world to defray costs But for the shareholders there were fortunes to be made and at their peak the railroads represented luxury almost beyond belief The Iron Road tells of great invention grand vision mind boggling engineering military strategy colonial ambition groundbreaking trade changes and social impact all the ways that railroads utterly changed the world in which we live **Harry Livingstone's Forgotten Men** Dan Black, 2019-10-01 During the WWI more than 80 000 Chinese labourers were secretly transported from China across Canada to the Western Front where they built bridges and roads repaired tanks unloaded supplies and then after the war cleaned up the grisly battlefields Though the

use of Chinese labourers for the war has been known the story of their journey and their work and the role of Canadians in recruiting and transporting them has not been fully told until now In *Veil of Secrecy* Dan Black describes the perilous journey taken by the Chinese labourers from their remote villages in China across the North Pacific the vast country of Canada from Vancouver to Halifax and across the North Atlantic to the battlefields of Europe and then back again For political reasons and to prevent them from escaping the Chinese labourers were locked into cattle cars and forbidden to disembark during the journey The Canadian public too was kept in the dark about the trains But their experience is indelibly evident in graves across the country from Vancouver Island to Thunder Bay and Petawawa to Halifax One Canadian plays a central role in this story Captain Harry Livingstone a small town doctor from Listowel Ontario Livingstone joined the Canadian Army Medical Corps in 1917 at the age of 28 His first assignment was to go to northeast China to a recruitment depot where he examined poor young Chinese men to ensure they were fit for service He later joined them on their journey across the North Pacific to a quarantine station on Canada's West Coast Drawing on the diaries written by Livingstone and the letters of the Canadian missionaries who served as temporary officers with the corps in Europe Dan Black traces the experience of the Chinese Labour Corps and sheds new light on the mistreatment and racism they faced in Canada and in wartime Europe

Railway Steamships of Ontario Dana William Ashdown,1988 During the nineteenth and early twentieth centuries the railway and shipping interests of the Great Lakes basin were regularly at odds with one another Accusations of rate cutting and unfair trade practices were constantly being hurled back and forth and at times they seemed to have little in common but this was not always the case Through joint traffic agreements railway and shipping lines found that they could aid and complement one another each furthering the others trade This book examines how Ontario s railways faced the steamship question and in particular why they saw a need to acquire their own vessels By tracing almost 200 individual ships and dozens of corporate entities the history of these waterborne railway enterprises is revealed Not overlooked are the railway harbours and the facilities that made the crucial link between train and ship
