Regional Economic Development In The European Union And North America:

Regional Economic Development in the European Union and North America Morris L. Sweet, 1999-06-30

Mainstream economists have given insufficient attention to regional and urban economics and economic geography Comparing nations in the European Union and North America this book examines government activities aimed specifically at regional economic development It provides a wide ranging consideration of numerous facets of regional economic development encompassing both national and subnational levels Proposing that a period of economic prosperity is the best time to invest in regional development the author indicates the need for a direct role by the federal government The study is based on a review of the U S Canada and Mexico the European Union and supranational organizations such as NAFTA and the WTO and their internal impact on regions The comparison shows that the U S lags dramatically behind the European Union The EU particularly the Western European countries has long been in the forefront of regional policy and is actively formulating policy whereas the U S has no semblance of a federal regional policy *Regional Economic Development in the European Union and North America* Morris L. Regional Economic Development Compared: EU-Europe and the American South

Collectif, 2016-09-29 Comparing economic development in a regional context both in the South of the United States and in the European Union today raises many fascinating questions How much money in the form of tax credits and subsidies should communities and states invest to attract foreign investors in the U S Should individual states and communities in the U S commit public funds in the form of tax money and tax credits etc to bring foreign businesses to their shores Is the argument of bringing jobs and more employment home the only argument that should count politically Or might these generous subsidies doled out to foreign businesses from public funds deprive local populations from improving their infrastructure and public education What if these foreign investors then locate to other shores if their investments are not profitable enough in the short run Might foreign investors come to the American South because it has never been unionized like the rest of the country Is the attraction of the non union South then only a means to get away from the burdens of stricter worker protection

and social programs at home in Germany or Austria or elsewhere European Socio-Economic Integration Elias G. Carayannis, George M. Korres, 2012-12-06 Economic integration is one of the most noteworthy issues in international economic policy at the end of the twentieth century The recent examples of the European Union EU and the North American Free Trade Association NAFTA have raised important questions about the economic integration process and the possible establishment of economic unions in other parts of the world Against the backdrop of the financial crisis in Europe and prospects of increasing integration in Asia this volume showcases research from an international array of researchers to provide a basic understanding of the current issues problems challenges and opportunities for achieving integration addressing both empirical and theoretical aspects of such topics as monetary union social policy reform and social union public finance and technology policy The chapters in Part 1 are focused primarily on economic issues while Part 2 covers on social policy the welfare state and political reforms with a particular emphasis on the European Union Among the questions addressed What are the main determinants and implications for socio economic integration How can economic policy influence the growth and integration process Why is innovation important for regional economic development What has been the policy response so far and what lessons have we learned from it And finally what are our action lines for the future

African Industrial Development and European Union Co-operation Francis A.S.T. Matambalya, 2014-08-27 Of the 54 African states only South Africa is categorised by the United Nations Industrial Development Organization UNIDO amongst industrialised countries The economic activities in Africa are still dominated by the production and trade of agricultural and mineral commodities This situation is in spite of the longstanding Africa European Union EU co operation which intends among other things to support Africa s industrialisation endeavours Imperatively a long road to substantive levels of industrialisation still lies ahead of most African countries This raises the question as to what role the international community could and should play in the twenty first century to provide the support needed to expedite Africa s industrial transformation This book argues that to supplement the initiatives of each African country international partnerships of both a North South and South South nature will serve better purposes if they are leveraged to develop productive capacities in African economies In order to enable the African countries to leverage their traditional partnership with the EU for industrialisation a paradigm shift is obligatory A feasible model should emulate the Japanese led flying geese model and the Chinese led bamboo capitalism model Airports and Regional Development Chunyan Yu, James Peoples, 2025-10-02 The presence of a functioning airport is therefore a key component of regional development however most of the literature on regional development fails to include this vital growth determinant This volume contributes to the literature on regional

 Philip McCann, Attila Varga, 2018-02-02 The new EU Cohesion Policy is one of the largest integrated development policies in
 the Western world and one of the largest of such programmes anywhere in the world The reforms to the EU Cohesion Policy
 contain many different elements each of which interlink in order to provide a cohesive overall framework Some of the key
 elements in the reforms however relate to the conditionalities employed and their effects on policy governance and the
 control mechanism the smart specialization approach to policy prioritization and resource allocation the underlying place
 based logic of the policy and the overall results orientation and evaluation emphasis of the policy In each of the areas of the
 EU Cohesion Policy reforms many different scholars from the fields of regional studies regional science and economic
 geography have played important roles in shaping the new policy and the chapters here highlight these increasing
 interactions between the policy and academic spheres of debate The collection of essays in this book each deal with specific
 aspects of these critical elements of the Cohesion Policy reforms In particular they examine some of the strengths and
 weaknesses of these individual elements and allowing for a better understanding of the origins and backgrounds of many of
 the ideas underpinning these reforms This book was previously published as a special issue of Regional Studies
