Regional Integration The West European Experience:

Regional Integration William Wallace, Professor of International Relations William Wallace, 1994 The European Union is the oldest and most highly developed example of institutionalized regional integration Since its establishment in the early 1950s the EU has moved from the shallow integration of dismantling trade barriers to the deep integration of accepting common policies on agriculture environment transport and working conditions common rules on competition mergers and financial transfers and common laws in the domestic courts of member states The EU experience is a successful example of integrating national economies but how far should those promoting regional integration in the Western Hemisphere and the Pacific look to the EU as a model Can regional and global integration proceed harmoniously Or will tensions between regional and global priorities unavoidably arise This book part of the Integrating National Economies series examines the evolution of West European integration over the past forty years William Wallace analyzes the historical circumstances under which the institutions of integration developed and the internal tensions and contradictions created by the deepening of integration and repeated enlargements He explains that in recent years deep integration has presented a challenge to national identity forcing policymakers to confront issues of sovereignty political commitment and regional balance Wallace concludes that the European experience provides a number of important cautionary lessons for those promoting regional integration in the Western Hemisphere and the Asia Pacific region However it does not offer a model that these areas can easily follow Wallace emphasizes that the experience of West European economic integration during the cold war years will do little to reconcile global and regional integration in the post cold war world the political and security concerns are no longer the same He contends that the international community must develop rules for the new global order without searching for historical parallels as those creating the institutions of regional integration in Western Europe did in their time A volume of Brookings Integrating National Economies Series **Integrating Europe** Jeffrey Stacey, 2010-04-15 Using the European Union as a laboratory for testing this book seeks to explain how and why institutional change takes place

statecraft The Structure of Political Competition in Western Europe Zsolt Enyedi, Kevin Deegan-Krause, 2013-09-13 Is European party politics hovering above society Why do voters pick one party over others Is it a question of class Of religion Of attitudes about taxes or immigration or global warming Or is it something else entirely The Structure of Political Competition in Western Europe takes a detailed look at the ways in which Western Europe's party systems are anchored in social and ideological structures The book's first section focuses on the role of social structures particularly education class and religion and analyzes the complex interplay among these factors The second section addresses the ways that the sociological structures such as class and religion interact with voters' values The third section examines the way that these structures and values shape the space of political competition among parties The conclusion integrates the findings of the empirical articles putting them into broader comparative perspective discussing whether relatively predictable structures have been overwhelmed by media driven spectacles political personalities and focus on short term economic performance This volume will appeal to scholars and graduate students in Europe and those from North America Asia and other regions who study European politics political parties cleavages and political behaviour This book was published as a special issue of West European Politics **A Handbook on the ECOWAS Treaty and Financial Institutions** Maiyaki, 2012-09-14 The inspiration to write on the ECOWAS Treaty and the role of financial institutions derived from the apparent and unabated efforts of the various governments in the West African subregion to find solutions to the inexplicable sufferings and underdevelopment of the region and its people in the face of abundant but untapped human and natural resources The strategy of integration has been employed by other jurisdictions some of them more developed as an option in addressing the forgoing challenges So many years after the establishment of ECOWAS the dream is far from being attained Given the critical financial engagements inherent in the ECOWAS integration strategy it is considered desirable that the treaty is rationalized to accommodate a wider role for financial institutions within the control of a supra national framework
