Regional Politics And World Order:

The Regional World Order Boglárka Koller,Alexei D. Voskressenski,2019-04-15 In the evolving post Westphalian world regional entities become key political and economic players as the authors argue in this volume As a result of regionalization the international politics and economics is witnessing great transformations too This volume explores some ideas of how these transformations may develop It is written by three generations of researchers and scholars at European Russian and Asian higher education institutions Their different perspectives are integrated in a coherent multi dimensional view to answer challenges facing what is called increasingly Greater Eurasia The volume employs a rigorous conceptual framework over a wide geographic range and applies different approaches to ask and answer challenging questions The arguments presented in this book are built around the concepts of regionalism and transregionalism The volume is focusing on three different geographical entities Europe Eurasia and East Asia and examines ASEM EAEU BRI EU ASEAN CIS as well as TTIP TTP OBOR

Subregionalism and World Order Glenn D. Hook,Ian Kearns,1999-08-31 Subregionalism and World Order brings together the work of a diverse range of area specialists in its treatment of sub regional cooperation schemes Sub regional projects covered include the Central European Free Trade Area the Black Sea Economic Scheme Ecowas in West Africa Mercosur The Association of Caribbean States Chilean strategies of subregional cooperation the Greater China project Asean and the East Asian Economic Caucus This is the first volume of its kind to embrace such a geographically diverse treatment of the subregional system Through comparison of the various schemes it also seeks to mount a case for a new IPE perspective in the understanding of subregional cooperation

Turmoil and Order in Regional International Politics William R. Thompson,Thomas J. Volgy,2023-04-10 This edited book complements and follows up on the book Thompson and Volgy et al Regions Power and Conflict Constrained Capabilities Hierarchy and Rivalry It is predicated in part on the paucity of published material available on comparing regional international politics Monadic dyadic and systemic approaches all have their uses and have been exploited extensively The same cannot be said about comparative regional analysis The premise is that a great deal of international politics takes place within regional parameters Most states simply lack the capability or interest in devoting many resources to extra regional affairs Yet each region is distinctive In some military coups remain common while they have died out as a form of political practice in others A few have been highly conflictual and then become more pacific while others persist in their conflict intensity Some have powerful neighbors with intervention tendencies while others are surrounded by relatively weak states Some are rich others are poor The point is that regions all with proper names have attributes that can be harnessed through comparison to explain why regional behavior differs greatly across the planet The aim is to replace the proper names with the leading variables that appear to drive behavior For instance to shrug and say that s the Middle East for you does not take us very far Replacing the Middle East label with conceptualization about how a set of small weak autocratic states behave subject to high penetration by major powers might take us farther than shrugging

off regional identity We have good reasons to think that comparative regional analysis can deliver an explanatory value added product just as much as alternative levels of analysis can Ultimately we might desire to integrate separate levels of analysis rather than segregating them But in the short term we need to encourage comparative regional analysis because it is the least developed perspective Why that might be the case can be debated but it stems in part from our disciplinary tendencies for some analysts to specialize in regional behavior largely in a descriptive vein while others prefer to focus on explaining universal behavior Comparative regional behavior tends to be squeezed out by regional scholars who suspect generalization about behavior and universal scholars who suspect particular contexts such as regions Comparative regional analysis requires analysts who are willing to explore generalization but acknowledge regional contexts more explicitly than is customary At the same time more general substitutes for those regional labels must be introduced if explanatory headway is to be achieved *The Constitutional Foundations of World Peace* Richard A. Falk, Robert C. Johansen, Samuel S.

Kim, 1993-07-01 This book shows how significant a worldwide constitutional framework can be both analytically and politically in efforts to achieve a just and lasting peace The authors are careful to avoid the pitfalls of legalism and moralism that have often afflicted discussion of world governance in the past and their analyses are rooted directly within contemporary human struggles for peace justice prosperity and environmentally sustainable societies The authors demonstrate that when these struggles are examined in light of the planet's changing constitutional framework their origins and future trajectories are more fathomable intellectually By examining alternative images of world order these authors uncover an abundance of practical yet bold policy recommendations for addressing and solving global problems They also demonstrate that implementing desirable policies can indeed become politically feasible This book is a compendium of new ideas for managing threats to peace enhancing U N peacekeeping establishing an effective global environmental authority aiding the faltering global economy nurturing the growth of democracy both locally and globally protecting human rights and ethnic diversity holding governments and intergovernmental organizations accountable to those they govern and nurturing humanitarian values among all people **Civilizations and World Order** Fred Dallmayr, M. Akif Kayapinar, Ismail

Yaylaci, 2014-09-24 *Civilizations and World Order* Geopolitics and Cultural Difference examines the role of civilizations in the context of the existing and possible world order's from a cross cultural and inter disciplinary perspective Contributions seek to clarify the meaning of such complex and contested notions as civilization order and world order they do so by taking into account political economic cultural and philosophical dimensions of social life The book deals with its main theme from three angles or vectors first the geopolitical or power political context of civilizations secondly the different roles of civilizations or cultures against the backdrop of post coloniality and Orientalism and thirdly the importance of ideological and regional differences as factors supporting or obstructing world order's All in all the different contributions demonstrate the impact of competing civilizational trajectories on the functioning or malfunctioning of contemporary world order **Dynamics of**

Regional Politics William Howard Wriggins,1992 Dynamics of Regional Politics explores the patterns of international conflict and cooperation in four geographical subsystems the Horn of Africa the Persian Arabian Gulf the South Asian subcontinent and Southeast Asia Wriggins s book argues that to understand how the end of the Cold War will affect these areas it is necessary to look closely at their individual dynamics over time to differentiate characteristics that are intrinsic to the regions from those caused by the Cold War involvement of the United States and the Soviet Union Confrontational and Cooperative Regional Orders Ariel Gonzalez Levaggi,2019-07-23 This book explains cooperative and confrontational regional orders in the post Cold War era Applying a push and pull framework to the evolution of regional orders the book s theoretical section compares regional dynamics and studies the transformation and authority of governing arrangements among key regional actors who manage security and institutional cooperation This presents a novel approach to comparing non Western regional orders and helps forge a better integration between International Relations disciplinary approaches and area studies The empirical section analyzes Central Eurasia and South America within the period 1989 2017 using case studies and interviews with decision makers practitioners and experts The volume demonstrates that soft engagement strategies from extra regional great powers and internationalist domestic coalitions framed in a stable democratic polity are forces for peaceful interaction while hard engagement strategies from great external powers plus nationalist coalitions within democratic backsliding in key regional powers present negative outlooks for regional cooperation This book will be of much interest to students of regional security comparative politics area studies and International Relations The End of American World Order Amitav Acharya,2014-04-25 The age of Western hegemony is over Whether or not America itself is declining the post war liberal world order underpinned by US military economic and ideological primacy and supported by global institutions serving its power and purpose is coming to an end But what will take its place A Chinese world order A re constituted form of American hegemony A regionalized system of global cooperation including major and emerging powers In this timely and provocative book Amitav Acharya offers an incisive answer to this fundamental question While the US will remain a major force in world affairs he argues that it has lost the ability to shape world order after its own interests and image As a result the US will be one of a number of anchors including emerging powers regional forces and a concert of the old and new powers shaping a new world order Rejecting labels such as multipolar apolar or G Zero Acharya likens the emerging system to a multiplex theatre offering a choice of plots ideas directors power and action leadership under one roof Finally he reflects on the policies that the US emerging powers and regional actors must pursue to promote stability in this decentred but interdependent multiplex world Written by a leading scholar of the international relations of the non Western world and rising above partisan punditry this book represents a major contribution to debates over the post American era

Encyclopedia of Government and Politics M. E. Hawkesworth,Maurice Kogan,1992 *World Order Transition and the Atlantic Area* Fulvio Attinà,2021-01-20 This book examines the current phase of world order transition in the Atlantic

area focusing on Europe and Northern America Asia and Africa In particular it describes four processes of world order transition namely the decreasing American leadership the rising power of China the receding effectiveness of economy and security world policies and the continued but inadequate operation of the world policy making institutions Part one of the book presents perspectives on world order transition developed by political science schools i e the world hegemony and the power transition school and by the experts of complexity theory a newcomer in social sciences These theories are best suited to explain the order transition and to supply consistent complementary data and insights on the juncture of the four processes pushing for the creation of the new world order Part two looks into the impact of order transition on the Atlantic area The authors focus on the existing tensions and the potentials for change that affect the long time relations between the USA the European countries and Canada At the same time the interference of China into the politics and economy of Europe is analyzed in particular through a case study of the relations between China and the Baltic states
