Regional Variations in Britain Bryan Ellis Coates, Eric Mitchell Rawstron, 1971 *The Impact of Recession* Alan R. Townsend, 2024-09-18 Rich industrialised countries entered the 1980s with unemployment higher than before the Second World War Britain experienced the impact of recession more immediately and sharply over one million factory jobs were lost Originally published in 1983 and now reissued with a new Preface by the author this book points to the industries corporations and places in which job losses occurred between 1976 and 1981 *The Impact of Recession* opens with an examination of national trends which includes the post war rise and fall of manufacturing employment and the fashionable concept of de industrialisation It considers the possible and actual roles of leading industrial corporations in distributing decline to different areas The effects of the crisis on individual regions is examined in detail and the author emphasizes that it is not only the traditional areas of

recession such as the North East that were affected but also the manufacturing centres of the Midlands and the normally prosperous South East Alternative explanations of the distribution of employment are examined and the adequacy of previous explanations of unequal growth and decline are questioned The book also looks at the extent to which New Towns have suffered in the crisis and whether the well established consensus about the merits of regional planning has been broken down by the recession

Seeking a Role Brian Harrison, 2009-03-26 An impressively detailed but also unusually wide ranging analysis of post war Britain in the 1950s and 60s covering everything from international relations to family life the countryside to manufacturing religion to race cultural life to political structures

The UK Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government
