Regional Unemployment Job Matching And Migration:

Regional Unemployment, Job Matching and Migration Graham Crampton, 1999 **Regional Labor Market Developments in Transition** Peter Huber, 2006 The author analyzes regional labor market disparities in transition by presenting some data and summarizing existing literature He finds that large and persistent regional labor market disparities developed in virtually all transition countries and that there is some evidence of polarization Differences in starting conditions and market access seem to be the major reasons for regional divergence in transition Furthermore regional wages are only slightly more flexible than in many European Union labor markets interregional migration is low and capital seems to move toward high wage and low unemployment urban centers rather than to the most backward regions Policy should thus take a long run perspective on the existing regional disparities focus on removing barriers to mobility review existing institutions for implementing regional policy and aim at a close coordination of regional and labor market policy instruments World Bank web site Regional unemployment disparities in Germany Marcus Kunz, 2012-01-10 Weder empirische Daten noch die ökonomische Theorie geben klare Anhaltspunkte wie sich regionale Disparitäten entwickeln und welche politischen Maßnahmen angebracht sind um diese zu reduzieren Dies gilt insbesondere für Deutschland wo die Wiedervereinigung zwischen West und Ostdeutschland im Jahr 1990 die regionalen Arbeitslosigkeitsunterschiede deutlich verstärkt hat Vor diesem Hintergrund stellt Marcus Kunz drei zentrale Fragen 1 Zeigen Arbeitslosenquoten in den Kreisen und Regionen Deutschlands regionale Konvergenz oder Divergenz 2 Wie erfolgt die Anpassung von Kreisen und Regionen nach einem regionalen Arbeitsmarktschock 3 Welche Faktoren sind für die regionalen Arbeitslosigkeitsunterschiede in Westdeutschland verantwortlich Im Gegensatz zu anderen Studien über regionale Arbeitslosenquoten in Deutschland die sich ausschließlich auf größere Regionen konzentrieren zeichnet die Studie von Kunz ein detaillierteres empirisches Bild da der Fokus auf der Entwicklung der Kreisebene liegt wo die Unterschiede besonders ausgeprägt sind Publikationssprache Englisch *Regional Migration, Unemployment, And [sic] Vacancies* J. Hatzius, 1994 Perspectives on Regional Unemployment in Europe Mr. Paolo Mauro, Mr. Eswar Prasad, Mr. Antonio Spilimbergo, 1999-05-17 The third stage of European Economic and Monetary Union EMU was implemented in January 1999 against the specter of persistently high unemployment in many of the participating countries While the high European unemployment has received considerable attention this new IMF staff study analyzes an equally important issue the extent of regional unemployment disparities in certain countries The paper focuses on large and persistent differences in regional unemployment rates within several European countries The paper includes detailed case studies of two euro area countries where regional disparities in unemployment are striking Italy and Spain The studies emphasize that wages are unresponsive to local labor market conditions The Economics of Knowledge Generation and Distribution Pier Paolo Patrucco, 2014-09-25 Contemporary capitalistic systems have been undergoing profound transformations determined by the transition towards the so called knowledge based economy i.e. a competitive system based

on the capabilities firms have to create use and circulate knowledge These transformations concern both the characteristics of productive and innovative processes and the resources used in these activities This book captures these changes where traditional R D investments undertaken internally by firms are increasingly and strategically complemented by external sources of innovation and new knowledge Collaborations between firms and between firms and other organizations as well as the mobility of human capital are strategic processes in order to share and circulate knowledge and competencies They are also key determinants in the creation of new knowledge and innovation and ultimately in growth dynamics The circulation and distribution of knowledge is now a key input in the production of knowledge Knowledge and innovation are understood as the result of collective and interactive processes at the system level and less at the micro level In other words new knowledge production is less and less the result of individualistic behaviours of the firms and much more the effect of explicit and pro active interactions and transactions put in place by local networks of innovators In this perspective economic space is much more defined by the quality of the interactions among actors rather than by their mere technological sectoral or geographical proximity This book brings together new conceptual and empirical contributions and blends the analysis of the technological and geographical spaces in which innovation and knowledge are produced

Unemployment Persistence and Mismatch Raquel Fonseca,2002 Since the mid 1970s Spain has suffered from persistently high unemployment as it has occurred in other parts of Europe Although during the last few years the unemployment level has declined there are still enormous disparities in the unemployment rate across groups skills and regions This thesis attempts to shed some light on the mechanisms of unemployment persistence and skill and regional mismatch in Spain Chapter 1 provides a first introductory analysis of Spanish data The chapter emphasises the importance of skill and regional mismatch which may have contributed about fifty percent to the observed increase in total unemployment over the last twenty years The chapter also studies the cyclical pattern in the Spanish unemployment which is a very important aspect in view of its magnitude The following three chapters are devoted to the evaluation of different mechanisms that may have been at work In all three chapters the analysis relies on the specification calibration and simulation of dynamic general equilibrium models with matching on the labour market Chapter 2 focuses on cyclical fluctuations with particular emphasis on the role of reallocation shocks Chapter 3 focuses on skill mismatch more precisely the chapter investigates to what extent unemployment rate disparities across skill groups can be explained in terms of a ladder effect Chapter 4 focuses on regional disparities A model is built to investigate the possible determinants of regional disparities and the role of labour mobility

Migration and Labor Market Adjustment Jouke van Dijk,H. Folmer, Henry W. Herzog Jr., Alan M. Schlottmann,2013-03-14

Reshaping Regional Planning Brita Olerup,2017-11-30 This title was first published in 2002 Uniting scholars from across the full range of social sciences this distinctive volume provides a unique overview of northern European planning It examines all the key issues as well as the evolution traditions current innovations and future developments in the field of planning Focusing

on how planning impacts upon social issues such as employment social exclusion and quality of life the volume also looks at innovations in planning policy and practice in particular the challenge of sustainability The contributors analyze the built environment's relationship with culture and take a critical look at the creative re thinking currently taking place in Nordic planning

The Flow Analysis of Labour Markets Ronald Schettkat, 1996-08-08 Well functioning labour markets are a precondition for economic development In order to function smoothly the market needs to be able to adjust effectively and quickly to new developments An understanding and analysis of adjustment processes within labour markets is therefore essential for economic theory and policy proposals This study discusse
