Constructing Metropolitan Space Jill Simone Gross, Enrico Gualini, Lin Ye, 2018-12-07 There is little question today that processes of globalization affect national and local economies governance processes and conditions for economic competitiveness in the major urban regions of the world In most liberal democratic countries these processes are occurring according to a rationale which attempts to combine strategies of state supported development with increasing local regional governmental decentralization and autonomy Against this background the issue of metropolitan development is being redefined worldwide along with its institutional frameworks modes of governance policy instruments and spatial planning strategies The overarching assumption of this volume is that metropolitan space far from being consolidated as a policy object is currently being redefined and in some instances constructed and contested as a scale through a variety of policy practices related to spatial economic development objectives Through case studies drawn from across four continents the authors reveal a range of interesting cross national commonalities concerning the power that state actors situated at various spatial scales exert as agents in these processes This volume interrogates key research issues raised by these developments and is intended as a contribution to the establishment of a globally comparative analysis of the construction of metropolitan spaces and scales under conditions of globalization and neoliberalization Greater New Jersey Dennis E. Gale, 2006 Northern New Jersey is undergoing a gradual transformation to become symbolic of a new kind of suburban area one that borrows culture image and economy from a metropolis but also maintains the day to day living patterns of heartland America in the face of rapid social change **IBSS: Political Science: 2002 Vol.51** Compiled by the British Library of Political and Economic Science, 2004-03-01 First published in 1952 the International Bibliography of the Social Sciences anthropology economics political science and sociology is well established as a major bibliographic reference for students researchers and librarians in the social sciences worldwide Key features Authority rigorous standards are applied to make the IBSS the most authoritative selective bibliography ever produced Articles and books are selected on merit by some of the world s most expert librarians and academics Breadth today the IBSS covers over 2000 journals more than any other comparable resource The latest monograph publications are also included International Coverage the IBSS reviews scholarship published in over 30 languages including publications from Eastern Europe and the developing world User friendly organization all non English titles are word sections Extensive author subject and place name indexes are provided in both English and French Place your standing order now for the 2002 volumes of the the IBSS Anthropology 2002 Vol 48 December 2002 234x156 0 415 32634 6 u195 00 Economics 2002 Vol 51 December 2002 234x156 0 415 32635 4 u195 0 0 Political Science 2002 Vol 51 December 2002 234x156 0 415 32636 2 u195 00 Sociology 2002 Vol 52 December 2002 234x156 0 415 32637 0 u195 00
