Global Politics of Regionalism Mary Farrell, Björn Hettne, Luk Van Langenhove, 2005-08-20 This book explores the phenomenon of regionalism

In a seeming contradiction to globalization there is a growing tendency for countries to enter into regional arrangements as a response to the pressures of operating in a global marketplace. But regionalism is also emerging as a phenomenon in its own right serving distinct purposes and taking different forms in different areas. The contributors explore how these patterns impact on wider issues such as global governance, democracy and trade. The book reviews the major theoretical approaches to regional cooperation including perspectives from international relations, political economy, economics and sociology. It is divided into three main sections: theoretical approaches to regionalism; issues of regional cooperation such as security, monetary issues, identity and integration; and an exploration of specific case studies including the Middle East, Africa, the Americas, China, Europe, Asia and the Pacific. With an international range of contributors including Bjorn Hettne, Louise Fawcett and Andrew Hurrell, this in-depth and multi-disciplinary guide will be of interest to students across the social sciences and to the wider policy community.

Regionalism in International Investment Law Leon Trakman, Nicola Ranieri, 2013-03-07. Regionalism in International Investment Law provides a multinational perspective on international investment law. In it, distinguished academics and practitioners provide a critical and comprehensive understanding of issues in a field which has grown exponentially in its importance, particularly over the last decade, focusing on the European Union, Australia, North America, Asia and China. The book approaches the field of foreign direct investment from both academic and practical viewpoints and analyzes different bilateral, regional and multinational agreements, often yielding competing perspectives. The academic perspective yields a strong conceptual foundation to often misunderstood elements of international investment law, while the practical perspective aids those actively pursuing foreign direct investment in better understanding the landscape, identifying potential conflicts which may arise in more accurately assessing the risk underlying the issues in conflict and in resolving those issues. Thorny issues relating to global commerce, sovereignty, regulation, expropriation, dispute resolution and investor protections are covered, depicting how they have developed and are applied in different regions of the world. These different treatments ensure that readers are able to grasp the subject matter at multiple levels and provide a comprehensive overview of developments in the field of foreign direct investment.

The European Union in the Security of Europe Steve Marsh, Wyn Rees, 2012-03-12. This book examines the European Union's contribution to providing security in Europe amidst an increasingly complex and challenging environment. In this new and comprehensive guide to the EU's role in security since the end of the Cold War, the authors offer an explanation of EU internal and external security regimes and argue that the Union has become an important exporter of security within its region. However, the Union's rhetorical ambitions and commitments continue to outstrip its capabilities and it lacks both a common conceptualisation of security and a meaningful shared strategic culture. Drawing extensively on primary sources, the book examines the Union's relations with the US and Russia in a time of shifting geostrategic calculations and priorities. With the EU capacity for enlargement slowing, this text presents a detailed assessment of EU security policies towards Central
