Regionalism In Europe Geometries And Strategies After 2000:

Regionalism in Europe Jürgen von Hagen, Mika Widgren, 2012-12-06 Over the past 40 years the European Union has been a great force of attraction for new members At the same time it has entered a host of bilateral and multilateral regional agreements with non member countries The result of these developments is a rather unique form of regionalism in Europe consisting of deep integration within the European Union and a network of sometimes overlapping arrangements involving the Union Regionalism in Europe Geometries and Strategies After 2000 brings together a collection of studies of the nature and the implications of this unique regionalism in Europe written by a group of renowned economists from various countries The issues discussed in this book range from theoretical and institutional aspects to empirical studies of the EU's regional policy the regional implications of European Monetary Union and empirical studies of the trade and welfare effects of regional arrangements between the EU and other countries Environmental Integration in the EU's External Relations

Gracia Marín Durán, Elisa Morgera, 2012-03-16 The book examines the integration of environmental protection requirements into EU external relations focusing on unilateral bilateral and inter regional instruments which have been less explored than the multilateral dimension of EU environmental policy The book also explores for the first time the complex interplay and mutual influences between EU environmental integration initiatives and environmental multilateralism On the one hand it identifies the legal and other instruments used by the EU to support the implementation of multilateral environmental agreements in third countries particularly developing ones On the other hand it singles out the legal and other tools employed by the EU as a means to build partnerships with third countries in order to influence ongoing multilateral negotiations concerning the environment and sustainable development or to contribute to the development of new international environmental norms in the absence of such multilateral negotiations Ultimately the book traces the significant evolution of the various tools deployed by the EU to integrate environmental concerns in its external relations with a view to identifying emerging challenges and future directions *The European Union's Mediterranean Policy: Model or Muddle?* K.

Knio, 2013-11-15 By analysing case studies through the lens of new constructivist Institutional perspective this book sheds new light on the failure of EU policies in the Mediterranean It suggests that these failures are the result of problems at the very heart of EU policy making which clearly privilege economic concerns over social concerns *The World Economy, Global Trade Policy 2004* David Greenaway, 2009-02-04 This volume is the eleventh in an annual series in which Top

economists provide a concise and accessible evaluation of major developments in trade and trade policy Examines key issues pertinent to the multinational trading system as well as regional trade arrangements and policy developments at the national level Provides up to date assessments of the World Trade Organization's current Trade Policy Reviews *Political Economy of Transition and Development* Nauro F. Campos, Jan Fidrmuc, 2003-11-30 Political Economy of Transition and Development collects the proceedings of an international conference that brought the leading thinkers in this field to the Center for

European Integration Studies of the University of Bonn in May 2002 The contributions analyze the various interactions between institutions policy choices economic developments and political outcomes in transition and developing countries The first five chapters give a relatively broad assessment of the various reform paths and outcomes in the transition and developing countries The remaining eight chapters proceed to analyze important aspects of transition such as voting behavior political regime choice corruption social capital growth and inequality and EU enlargement The resulting volume thus combines a bird s eye perspective with a relatively narrow focus on selected key issues pertaining to the ongoing transition process in Central and Eastern Europe

WTO Negotiations and Agricultural Trade Liberalization Eugenio Díaz-Bonilla,Søren Elkjær Frandsen,Sherman Robinson,2006-01-01 Based on original research by the Food and Resource Economic Institute in Denmark and the International Food Policy Research Institute in Washington DC this book addresses the controversial issue of the effects of developed countries agricultural policies on developing countries Written from the perspective of developing countries it addresses the main issues raised by developing countries governments politicians farmers organizations NGO s trade specialists and development specialists It focuses on the key issues of food security poverty regional agreements multifunctionality in agriculture and the trade of genetically modified products as an input to policy reform within the World Trade Organization trade negotiations

From the Athenian Tetradrachm to the Euro Gérassimos Notaras,2017-11-28 With the introduction of the euro much recent attention has been focused on the role of currencies and their national and international significance Whilst much has been made of the euro s achievements in harmonising Europe s financial dealings it is often forgotten that it is by no means the first pan national currency to enter circulation Indeed as the various contributions to this volume make plain the euro can in many ways be regarded as a step back to the future that is a further international currency in a long historical tradition that includes the Athenian tetradrachm the Spanish peso and the French franc Covering a timespan of some two and a half millennia the contributions within this volume fall within four broad chronological sections the first comprising three contributions that consider aspects of the European experience from classical antiquity until the high middle ages The discussion then leaps forward chronologically to the modern age given a focus by three contributions devoted to nineteenth century European developments These in turn are set within a wider spatial perspective by two essays that review first the classical gold standard primarily in terms of peripheral economies experience and second the Bretton Woods system Fourth and lastly the euro s origins and birth are explored in three further contributions By taking such a long term view of supra national currencies this volume provides a unique perspective not only to the introduction and development of the euro and its predecessors but also on the broader question of the relationship between trade and common currencies

Fiscal Federalism in Unitary States Per Molander,2012-12-06 Decentralism of political power to regions and local government occurs worldwide in response to demands from the periphery Such devolution of power raises a number of problems political financial and legal By gathering

together important papers from a series of workshops sponsored by the SNS Constitutional Project and the Center for European Integration Studies this volume presents a number of these problems from a truly interdisciplinary perspective The authors believe that fiscal federalism while originating in formally federal states is relevant also to the analysis of state local relationships in unitary states with some degree of regional or local authority Among the topics they cover are the division of responsibilities and powers of taxation bailouts systems of equalization and state grants as well as problems related to democracy and citizens rights While the book s primary focus is Nordic its international perspective is enhanced by contributions from Europe Canada and the U S

Managing Conflict in Facility Siting Sidney Hayden Lesbirel, Daigee Shaw, 2005-01-01 The book addresses a growing policy problem confronting all democratic nations By exploring the lessons to be learned from international siting experiences it will prove invaluable reading for academics policymakers government agencies NGOs and other societal interests involved in environmental and siting issues BOOK JACKET

From the Athenian Tetradrachm to the Euro P. L. Cottrell, Gerasimos Notaras, Gabriel Tortella Casares, With the introduction of the euro much recent attention has been focused on the role of currencies and their national and international significance Covering a time span of some two and a half millennia the contributions within this volume consider aspects of the European experience from classical antiquity until the beginning of the twenty first century
