Regulating Wetlands Protection Ronald Keith Gaddie, James L. Regens, 2000-01-01 Wetlands are a valuable natural resource yet over 200 000 acres are destroyed in the United States per year This book examines whether states should assume the role of protecting wetlands rather than the federal government *Regulating Wetlands Protection* Ronald Keith Gaddie, James L. Regens, 2000-01-01 Wetlands are a valuable natural resource yet over 200 000 acres are destroyed in the United States per year This book examines whether states should assume the role of protecting wetlands rather than the federal government *Water Pollution Policies and the American States* John A. Hoornbeek, 2012-01-02 The relationship between federal and state water pollution policies is revealed and assessed in this incisive volume Focusing on Congress's statutory directions in the Federal Water Pollution Control Act of 1972 and state compliance this study throws into relief the complex and often troubled relationship between the laws enacted by Congress and the public policies produced by state governments that implement them Compliance at the state level can be affected and sometimes disturbed by state politics particular policymaking processes and the effects of federal oversight practices As convincingly demonstrated in these pages American water pollution policy reflects neither runaway bureaucracies nor Congressional control but rather a complex intergovernmental process that is structured around Congress's statutory directions Science and Politics Brent S. Steel, 2014-04-21 Recent partisan squabbles over science in the news are indicative of a larger tendency for scientific research and practice to get entangled in major ideological divisions in the public arena This politicization of science is deepened by the key role government funding plays in scientific research and development the market leading position of U S based science and technology firms and controversial U S exports such as genetically modified foods or hormone injected livestock This groundbreaking one volume A to Z reference features 120 150 entries that explore the nexus of politics and science both in the United States and in U S interactions with other nations The essays each by experts in their fields examine Health environmental and social cultural issues relating to science and politics Concerns relating to government regulation and its impact on the practice of science Key historical and contemporary events that have shaped our contemporary view of how science and politics intersect *Science and Politics An A to Z Guide to Issues and Controversies* is a must have resource for researchers and students who seek to deepen their understanding of the connection between science and politics **Frontiers in Resource and Rural Economics** Wu Junjie, Paul Barkley, Bruce Weber, 2010-09-30 Most land in the United States is in rural areas as are the sources of most of its fresh water and almost all its other natural resources One of the first books to approach resource economics and rural studies as fundamentally interconnected areas of study *Frontiers in Resource and Rural Economics* integrates the work of 18 leading scholars in resource economics rural economics rural sociology and political science in order to focus on two complex interdependencies one pertaining to natural resources and human welfare the other to urban and rural communities and their economies The book reviews the past 50

years of scholarship in both natural resource and rural economics. It contrasts their different intellectual and practical approaches and considers how they might be refocused in light of pressing demands on human and natural systems. It then proposes a new rural economics that acknowledges the full range of human ecosystem and urban rural interdependencies. It explores the relationship between natural resources and economic growth and considers the prospects for amenity driven growth that would benefit both new and traditional inhabitants of rural areas. Later chapters explore the politics of place spatial economics strategies for reducing rural poverty and prospects for linking rural and environmental governance. Throughout the book emphasizes innovative research methods that integrate natural resource environmental and rural economics.

A Republic of Statutes William N. Eskridge (Jr.), John A. Ferejohn, 2010-01-01 William Eskridge and John Ferejohn propose an original theory of constitutional law whereby while the Constitution provides a vision our democracy advances by means of statutes that supplement or even supplant the written Constitution.

Integrated Management of Carbon Sequestration and Biomass Utilization Opportunities in a Changing Climate ,2010 Forests are important for carbon sequestration and how they are manipulated either through natural or human induced disturbances can have an effect on CO2 emissions and carbon sequestration. The 2009 National Silviculture Workshop presented scientific information and management strategies to meet a variety of objectives while simultaneously addressing carbon sequestration and biomass utilization. The focus areas were the role of climate change in science and management silvicultural methods to address carbon sequestration and biomass utilization alternative silvicultural strategies to address the growth and development of forests and current applications of computer simulation models or modeling techniques designed to provide decision support.

Wetlands Sharon L. Spray, Karen L. McGlothlin, 2004-02-16 The purpose of the Exploring Environmental Challenges A Multidisciplinary Approach series is to publish a collection of short texts that each explore a specific environmental issue and describe the methodologies theories and findings pertaining to that issue from both natural and social science perspectives. Each text contains three natural science essays three social science essays and a concluding essay. Intended for introductory environmental studies courses these balanced thoughtful and rigorous texts aim to provide students with a deeper understanding of the relationship between people and their environment and to serve as a foundation for further inquiry and discussion. *Wetlands* introduces students to the natural ecological functions and policy issues of wetlands so they will have a solid understanding of why these ecosystems are necessary and why their governance remains a significant environmental challenge. Although not a comprehensive overview on wetlands it does provide background material for a more comprehensive investigation into the science behind and the management of these ecosystems.

Environmental Policy and Politics Michael Kraft, 2015-09-25 Covering global threats such as climate change population growth and loss of biodiversity as well as national state and local problems of environmental pollution energy use and natural resource use and conservation *Environmental Policy and Politics*

provides a comprehensive overview of U S policy making processes the legislative and administrative settings for policy decisions the role of interest groups and public opinion in environmental politics and the public policies that result It helps readers understand modern environmental policy and its implications including the need for a comprehensive and integrated approach to problem solving
