The Forest Landscape Restoration Handbook Stewart Maginnis,Jennifer Rietbergen-McCracken,Alastair Sarre,2012-05-04 Forest loss and degradation have caused a decline in the quality of ecosystem services around the world But fixing the problem takes more than just planting trees practitioners increasingly realize that a landscape approach is essential This handbook authored and edited by international authorities in the field of forestry is the first practical guide to using forest landscape restoration FLR to repair the damage done to forest lands by poor land management practice Using research backed by respected institutions such as ITTO and the World Conservation Union IUCN it explains how to increase the resilience of landscapes and the communities they support through FLR The main aim of FLR is not to re establish pristine forest even if this were possible rather the objective is to make landscapes more resilient and thereby keep future management options open It also aims to support communities as they strive to increase and sustain the benefits they derive from land management This book explains the concept of FLR and guides the reader through the steps that must be taken to put it into practice It is an indispensable aid for practitioners in all aspects of forestry and natural resource management

Peatlands Kosuke Mizuno,Motoko S. Fujita,Shuichi Kawai,2016-02-26 The serious degradation of the vast peatlands of Indonesia since the 1990s is the proximate cause of the haze that endangers public health in Indonesian Sumatra and Borneo and also in neighbouring Singapore Malaysia and Thailand Moreover peatlands that have been drained and cleared for plantations are a major contributor to greenhouse gas emissions This new book explains the degradation of peat soils and outlines a potential course of action to deal with the catastrophe looming over the region Concerted action will be required to reduce peatland fires and a successful policy needs to enhance social welfare and economic survival support natural conservation and provide a return on investment if there is to be a sustainable society in the peatlands This book argues that regeneration is possible through a new policy of people s forestry that includes reforestation and rewetting peat soils The
