Anchorage Zone Reinforcement for Post-tensioned Concrete Girders John Edward Breen, 1994 *Building Code Requirements for Structural Concrete (ACI 318-05) and Commentary (ACI 318R-05)* ACI Committee 318, 2005 PCI Post-tensioning Manual Prestressed Concrete Institute, 1972 Reinforced Concrete Slabs Robert Park, William L. Gamble, 1999-12-28 Comprehensive up to date coverage of reinforced concrete slabs from leading authorities in the field Offering an essential background for a thorough understanding of building code requirements and design procedures for slabs Reinforced Concrete Slabs Second Edition provides a full treatment of today's approaches to reinforced concrete slab analysis and design Now brought up to date with a wealth of new material on computer optimization the equivalent frame method lateral load analysis and other current topics the new edition of this classic text begins with a general discussion of slab analysis and design followed by an exploration of key methods equivalent frame direct design and strip methods and theories elastic lower bound and yield line theories Later chapters discuss other important issues including shear strength serviceability membrane action and fire resistance Comprehensive and accessible Reinforced Concrete Slabs Second Edition appeals to a broad range of readers from senior and graduate students in civil and architectural engineering to practicing structural engineers architects contractors construction engineers and consultants **Reinforced Concrete Design of Tall Buildings** Bungale S. Taranath, 2009-12-14 An exploration of the world of concrete as it applies to the construction of buildings Reinforced Concrete Design of Tall Buildings provides a practical perspective on all aspects of reinforced concrete used in the design of structures with particular focus on tall and ultra tall buildings Written by Dr Bungale S Taranath this work explains **Structural Masonry Designers' Manual** W. G. Curtin, Gerry Shaw, J. K. Beck, W. A. Bray, David Easterbrook, 2006-07-12 This major handbook covers the structural use of brick and blockwork A major feature is a series of step by step design examples of typical elements and buildings The book has been revised to include updates to the code of practice BS 5628 2000 2 and the 2004 version of Part A of the Building Regulations New information on sustainability issues innovation in masonry health and safety issues and technical developments has been added *Guide for Strengthening of Concrete Structures* FIB - International Federation for Structural Concrete, 2022-05-01 The idea of preparing a technical document for the repairs and interventions upon concrete structures goes back to the former fib COM 5 Structural Service Life Aspects being the goal of the then TG 5 9 After a long period of reduced activity and taking into account the reorganization of fib commissions that meanwhile took place on June 2017 a different approach was proposed to push forward the task of TG 8 1 formerly TG 5 9 The new goal of TG 8 1 was to deliver a how to do guide gathering together protection repair and strengthening techniques for concrete structures Chapters are intended to provide both guidelines and case studies serving as support to the application of fib MC 2020 pre normative specifications Each chapter was written by an editorial team comprising desirably at least a researcher a designer and a contractor Templates have been prepared in

order to harmonize the contents and the presentation of the different methods Following the writing process chapters were reviewed by experts and after amendments by the authors they underwent a second review process by COM 8 and TG 3 4 members as well as by different practitioners For each protection repair and strengthening method addressed in this guide readers have a description of when to adopt it which materials and systems are required which techniques are available and what kind of equipment is needed It then presents a summary of stakeholders roles and qualifications design guidelines referring to most relevant codes and references the intervention procedure quality control measures and monitoring and maintenance activities Due to the extent of the guide it was decided to publish it as bulletin 102 addressing protection and repair methods and bulletin 103 addressing strengthening methods We would like to thank the authors reviewers and members of COM 8 and TG 3 4 for their work in developing this fib Bulletin which we hope will be useful for professionals working in the field of existing concrete structures especially those concerned with life cycle management and conservation activities As noted above this Bulletin is also intended to act as a background and supporting document to the next edition of the fib Model Code for Concrete Structures which is currently under development under the auspices of TG10 1 with the working title of fib Model Code 2020

Design and Construction of Concrete Floors, Second Edition George Garber, 2006-06-30 Concrete floors still form one of the most common structural elements in construction today This book provides an introductory guide to the design and construction of concrete floors It is aimed at designers civil and structural engineers contractors and engineering and architectural consultants

The Contractor's Guide to Quality Concrete Construction, 2005

FRP Composites for Reinforced and Prestressed Concrete Structures Perumalsamy Balaguru, Antonio Nanni, James Giancaspro, 2008-11-05 High strength fibre composites FRPs have been used with civil structures since the 1980s mostly in the repair strengthening and retrofitting of concrete structures This has attracted considerable research and the industry has expanded exponentially in the last decade Design guidelines have been developed by professional organizations in a number of countries including USA Japan Europe and China but until now designers have had no publication which provides practical guidance or accessible coverage of the fundamentals This book fills this void It deals with the fundamentals of composites and basic design principles and provides step by step guidelines for design Its main theme is the repair and retrofit of un reinforced reinforced and prestressed concrete structures using carbon glass and other high strength fibre composites In the case of beams the focus is on their strengthening for flexure and shear or their stiffening The main interest with columns is the improvement of their ductility and both strengthening and ductility improvement of un reinforced structures are covered Methods for evaluating the strengthened structures are presented Step by step procedures are set out including flow charts for the various structural components and design examples and practice problems are used to illustrate As infrastructure ages worldwide and its demolition and replacement becomes less of an option the need for repair and retrofit of existing facilities will increase Besides its audience of design professionals this book

suits graduate and advanced undergraduate students
