Reinventing Environmental Regulation

National Performance Review (U.S.)

Reinventing Environmental Regulation:

Reinventing Environmental Regulation Alfred Allen Marcus, Donald A. Geffen, Ken Sexton, 2002 First Published in 2002 Routledge is an imprint of Taylor Francis an informa company Reinventing Environmental Regulation Alfred A. Professor Marcus, Donald A. Professor Geffen, Ken Professor Sexton, 2010-09-30 Project XL eXcellence and Leadership was the flagship effort by the Clinton administration for cleaner cheaper and smarter regulation Under Project XL business promised better performance in exchange for a regulatory approach focused more on results than means with the Environmental Protection Agency EPA measuring pollution reduction across rather than at individual sources within a facility Reinventing Environmental Regulation is a compelling account of the breakdown in negotiations to implement Project XL at a tape manufacturing plant of 3M a company widely recognized as environmentally progressive Marcus Geffen and Sexton discuss the conflicting goals of participants the influences of personality and organizational culture and complications caused by changes in 3M's external business environment They compare the 3M case with EPA negotiations involving Intel Merck and Weyerhaeuser finding similarly contentious though less fatal disagreements about the meaning of superior environmental performance In common with other recent proposals Project XL emphasized cooperative flexible regulatory approaches Reinventing Environmental Regulation demonstrates the difficulty of putting these appealing ideas into practice while offering encouragement for continued innovations *Reinventing Environmental Regulation* United States Environmental Protection Agency (EPA), 2018-07-04 Reinventing Environmental Regulation **Reinventing Environmental Regulation** Bill Clinton, 1995 **Reinventing Environmental Enforcement and the State/federal Relationship** Clifford Rechtschaffen, David L. Markell, 2003 One of the most controversial issues in environmental law and policy and one that of considerable importance to the EPA is the allocation of power and authority between the federal and state governments The recent evolution in approaches of environmental enforcement highlights many of the tensions inherent in this debate During the past several years the federal and state governments have spent a good deal of energy attempting to reinvent their relationship The shifts in federal state enforcement relations are highly significant with the potential to fundamentally reorder the division of authority that has existing over the past 25 years This book thoroughly documents the changing nature of federal state relations in enforcing environmental law It breaks new ground in analyzing the federal state enforcement relationship particularly in light of the many recent developments that have occurred in this area The author's findings provide important lessons about the interplay between federal and state efforts in other regulatory areas and for the structure of federal state relations generally Professors Rechtschaffen's and Markell's clear in depth analysis will be essential reading for legal and regulatory experts attorneys who are involved in environmental enforcement matters the judiciary legislators political scientists public policy experts and anyone with an interest in environmental law and policy
