Relational And Intersubjective Perspectives In Psychoanalysis:

Relational and Intersubjective Perspectives in Psychoanalysis Jon Mills, 2005-05-20 This volume is the first concentrated effort to offer a philosophical critique of relational and intersubjective perspectives in contemporary psychoanalytic thought. The distinguished group of scholars and clinicians assembled here are largely preoccupied with tracing the theoretical underpinnings of relational psychoanalysis, its divergence from traditional psychoanalytic paradigms, implications for clinical reform and therapeutic practice, and its intersection with alternative psychoanalytic approaches that are co-extensive with the relational turn. Because relational and intersubjective perspectives have not been properly critiqued from within their own schools of discourse, many of the contributors assembled here subject advocates of the American Middle School to a thorough critique of their theoretical assumptions, limitations, and practices. If not for any other reason, this project is of timely significance for the field of psychoanalysis and the competing psychotherapies because it attempts to address the philosophical undergirding of the relational movement.

Intersubjectively Peter Buirski, 2007-09 *Practicing Intersubjectively* describes how the intersubjective systems perspective informs, shapes, and guides the psychotherapeutic process. Using extensive clinical case material, Buirski illustrates the way an intersubjective systems sensibility informs and enriches clinical practice. The intersubjective systems perspective views each treatment as exquisitely context-sensitive. This means that the person who comes for therapy would present differently to different therapists, and the two of them would construct different processes. Therapists themselves are not interchangeable, and the intersubjective field that the two participants create together would be quite different from the field created by any other pair. *Practicing Intersubjectively*, with the focus on attuning and articulating to the contextual construction of personal worlds of experience, enables a different therapy process to unfold than occurs in traditional 1-person authority-based treatment approaches and is uniquely suited to working with people from diverse cultural backgrounds and those suffering from such challenging concerns as trauma and prejudice. Treating Attachment Pathology Jon Mills,2005 This book rectifies a much neglected area in the conceptualization and treatment of attachment disorders The interface between attachment psychic structure and character pathology has been largely ignored in the clinical literature until recent years and when discussed it has been generally relegated to the domain of child psychopathology Because human attachment is such a basic aspect to motivation and adjustment attachment disruptions in childhood color psychic development and often leave deep and enduring deficits in personality and adaptive functioning The author shows that patients with attachment deficiencies and associated characterological vulnerabilities have fundamental structural deficits in personality organization that lie at the heart of our current understanding of disorders of the self Offering the first comprehensive paradigm on the psychoanalytic treatment of adult and adolescent attachment disorders Jon Mills argues that attachment pathology is a disorder of the self based on developmental trauma that predisposes patients toward a future trajectory marked by structural deficits character pathology and interpersonal discord that fuel and sustain myriad forms of clinical symptomatology This pivotal work constitutes a treatise on the governing psychic processes of attachment on self organization adaptation and conflicted intersubjective dynamics in non childhood populations and on the intervening relational parameters in treating their emergent clinical pathologies Through conceptually astute technical strategies grounded in sold clinical practice the author offers one of the most extensive and original frameworks in the psychoanalytic treatment of attachment disorders

Origins Jon Mills, 2010-04-15 In the first comprehensive work to articulate a psychoanalytic metaphysics based on process thought the author uses dialectical logic to show how the nature and structure of mental life is constituted Arguing that ego development is produced not only by consciousness but also evolves from unconscious genesis he makes the controversial claim that an unconscious semiotics serves as the template for language and all meaning structures A thought provoking account of idealism Origins confronts the limitations of materialism and empiricism while salvaging the roles of agency and freedom that have been neglected by the biological sciences
