Ordinary General Meeting (... Annual General Meeting), Subscription List and Balance Sheets* Egypt Exploration Society,1929 **The Alphabet and the Brain** Derrick de Kerckhove, Charles J. Lumsden, 2013-04-17 This book is a consequence of the suggestion that a major key to ward understanding cognition in any advanced culture is to be found in the relationships between processing orthographies language and thought In this book the contributors attempt to take only the first step namely to ascertain that there are reliable constancies among the interactions between a given type of writing and specific brain processes And among the possible brain processes that could be investigated only one apparently simple issue is being explored namely whether the lateralization of reading and writing to the right in fully phonemic alphabets is the result of formalized but essentially random occurrences or whether some physiological determinants are at play The original project was much more complicated It began with Derrick de Kerckhove's attempt to establish a connection between the rise of the alphabetic culture in Athens and the development of a theatrical tradition in that city from around the end of the 6th century B c to the Roman conquest The underlying assumption first proposed in a conversation with Marshall McLuhan was that the Greek alphabet was responsible for a fundamental change in the psychology of the Athenians and that the creation of the great tragedies of Greek theatre was a kind of cultural response to a condition of deep psychological crisis *Coptic Interference in the Syntax of Greek Letters from Egypt* Victoria Beatrix Maria Fendel, 2022-08-22 Egypt in the early Byzantine period was a bilingual country where Greek and Egyptian Coptic were used alongside each other Historical studies along with linguistic studies of the phonology and lexicon of early Byzantine Greek in Egypt testify to this situation In order to describe the linguistic traces that the language contact situation left behind in individuals linguistic output Coptic Interference in the Syntax of Greek Letters from Egypt analyses the syntax of early Byzantine Greek texts from Egypt The primary object of interest is bilingual interference in the syntax of verbs adverbial phrases clause linkage as well as in semi formulaic expressions and formulaic frames The study is based on a corpus of Greek and Coptic private letters on papyrus which date from the fourth to mid seventh centuries originate from Egypt and belong to bilingual Greek Coptic papyrus archives *Report of the Ordinary General Meeting (annual General Meeting)* Egypt Exploration Society, 1928
