Giles, Gayle S. Stever, 2024-10-11 This book covers key aspects of parasocial relationships PSRs or the relationships people have with media personalities including fictional characters The principal feature of a PSR is that it is not individually reciprocated although when the parasocial object is a real person

usually a celebrity that celebrity often has a reciprocal relationship with their audience as a group The authors begin by addressing the many instances where relationships exist in a gray area that is neither fully social and reciprocated nor parasocial and non reciprocated In describing parasocial experience the authors address social relationships vs parasocial relationships as a continuum rather than a dichotomy They also discuss prominent theories in psychology and how they should be applied to parasocial theory as well as psychoanalytic theory and the role of the unconscious in parasocial relationships This is followed by chapters on applications of evolutionary psychology attachment theory and the effects of social media on PSRs particularly a very new social media service Cameo Through a meaningful exploration of social theories as they influence parasocial experiences this book unveils areas for future study and opens up pathways for new more sophisticated research
