Theater of Disorder Brant Wenegrat, 2001-10-04 There are certain phenomena such as hypnosis hysteria multiple personality disorder recovered memory syndrome claims of satanic ritual abuse alien abduction syndrome and culture specific disorders that although common are difficult to explain completely The purpose of this volume is to apply a model of social relations to these phenomena in order to provide a different explanation for them Wenegrat argues that they are socially constructed illness roles or purposive behavior patterns into which patients fall while receiving either unintentional or intentional cues during interactions with caretakers and authority figures The application of the social relations model raises some important yet previously overlooked questions about these phenomena It also illustrates some important aspects of human nature and consciousness places illness behaviors in their larger cultural context and shows the way to a new and different view of mental life

astonishing body of corroborative evidence Nick Redfern lays out a shockingly plausible new theory on the Roswell incident that the crash site discovery of prototype military aircraft would expose a damning secret a highly confidential U S government sanctioned program to conduct medical experiments on deformed handicapped disfigured and diseased Japanese POWs exploited as expendable victims by their captors An important account that forces us to take a closer look at both the Roswell story and post war American history Body Snatchers in the Desert casts a startling new light on a shocking conspiracy more than half a century in the making
