Theriault, 2008-08-11 The political parties in Congress are as polarized as they have been in 100 years This book examines more than 30 years of congressional history to understand how it is that the Democrats and Republicans on Capitol Hill have become so divided It finds that two steps were critical for this development First the respective parties constituencies became more politically and ideologically aligned Second members ceded more power to their party leaders who implemented procedures more frequently and with greater consequence In fact almost the entire rise in party polarization can be accounted for in the increasing frequency of and polarization on procedures used during the legislative process **Annual Report of the State Corporation Commission of Virginia** Virginia. Pasour, Paysour, Payseur, Paseur, Together at Last, 1992 **Inter-tech(s)** Roxanna Nydia Curto, 2016-08-29

Challenging the notion that francophone literature generally valorizes a traditional natural mode of being over a scientific modern one *Inter tech s* proposes a new understanding of the relationship between France and its former colonies in Africa and the Caribbean by exploring how various postindependence authors depict technology as a mediator between them By providing the first comprehensive study of the representation of technology in relation to colonialism and postcolonialism in francophone literature Roxanna Curto shows the extent to which the authors promote modernization and social progress Curto traces this trend in the wake of decolonization when a series of important francophone African and Caribbean writers began to portray modern technology as a liberating democratizing force capable of erasing the hierarchies of the old colonial order and promoting economic development Beginning with the founders of N gritude Aim C saire and L opold S dar Senghor and continuing with Frantz Fanon postindependence novelists such as Ousmane Semb ne and contemporary writers such as douard Glissant the author shows how these francophone writers champion the transfer of technology from the metropolis to the former colonies as a means of integrating their cultures into a global community thus paving the way for modernization and technological development
