Beneath the Paving Stones Vikky Alexander, Charles H. Scott Gallery, 1994 Landscape into Eco Art Mark Cheetham, 2018-02-14 Dedicated to an articulation of the earth from broadly ecological perspectives eco art is a vibrant subset of contemporary art that addresses the widespread public concern with rapid climate change and related environmental issues In *Landscape into Eco Art* Mark Cheetham systematically examines connections and divergences between contemporary eco art land art of the 1960s and 1970s and the historical genre of landscape painting Through eight

thematic case studies that illuminate what eco art means in practice reception and history Cheetham places the form in a longer and broader art historical context He considers a wide range of media from painting sculpture and photography to artists films video sound work animation and installation and analyzes the work of internationally prominent artists such as Olafur Eliasson Nancy Holt Mark Dion and Robert Smithson In doing so Cheetham reveals eco art to be a dynamic extension of a long tradition of landscape depiction in the West that boldly enters into today s debates on climate science government policy and our collective and individual responsibility to the planet An ambitious intervention into eco criticism and the environmental humanities this volume provides original ways to understand the issues and practices of eco art in the Anthropocene Art historians humanities scholars and lay readers interested in contemporary art and the environment will find Cheetham s work valuable and invigorating

*Photo Art* Uta Grosenick, Thomas Seelig, 2007 As digital technologies continue to impact photography there are those image makers who rise above the fray to produce compelling work *Photo Art Photography in the 21st Century* features 120 of the latest greatest and newly up and coming artists in a luscious compendium each showcased in a four page spread with texts by sixteen top curators and theorists and a glossary of important terms More than a coffee table book *Photo Art* reads like an international art fair between covers Publisher s website

*The Making of Visual News* Thierry Gervais, Gaëlle Morel, 2020-09-23 *The Making of Visual News* sets out to show how photography has changed the way we read report and sell the news It investigates how photographs first became news images at the end of the nineteenth century and how magazines in the USA the UK France and Germany have put them to use ever since Drawing on a wide selection of images author Thierry Gervais in collaboration with Gaëlle Morel analyses news photographs in the context of their original presentation in print Highly illustrated the book contains 85 full colour magazine layouts and spreads offering the reader a view of how photographs were and are used in print publications including *Life* *Picture Post* the *Berliner Illustrierte Zeitung* and *VU* It examines how photographs were employed to attract new readers throughout the twentieth century arguing that photography was the main tool by which news editors sought to communicate the news and attract a broader readership Looking beyond the roles of photographer and journalist this study also highlights the contributions of picture editors and artistic directors by commissioning photographs and incorporating images into magazine layouts these figures played critical but often overlooked roles in the construction of visual news even as they crafted unique styles for their publications Charting changes in technology and reportage as well as broader social and political histories *The Making of Visual News* offers new insight into the history of photojournalism making this an essential resource for students and scholars of photojournalism and the history of photography media and culture
