Bernhardt,2002-08-22 In examining the

relationship between the royal monasteries in tenth and eleventh century Germany and the German monarchs this book assimilates a great deal of European scholarship on a central problem that of the realities and structures of power It focuses on the practical aspects of governing without a capital and while constantly in motion and on the payments and services which monasteries provided to the king and which in turn supported the king's travel economically and politically Royal monastic relations are investigated in the context of the itinerant kingship of the period to determine how this relationship functioned in practice It emerges that German rulers did in fact make much greater use of their royal monasteries than has hitherto been recognised
