returned to England once it became clear that outsourcing manufacturing was affecting the brand value and customer perception of their products Neil Ewins explores the complex behaviour of the UK ceramics industry using a combination of evidence from the press trade journals ceramic objects and primary interview evidence of manufacturers retailers and a ceramic designer Ewins suggests that although the surface designs of UK ceramics invariably reflect diverse cultural and stylistic influences a notion of authenticity often still resides in the place and context in which the ceramic product was originally made Overall the book argues that UK ceramics remain culturally complex because of issues of supply and demand and ties to heritage imagined or otherwise Within a context of globalization the book highlights compelling issues which have huge ramifications on UK manufacturing futures **Royal Doulton figures** Desmond Eyles,Richard Dennis,1978 [A](#)

material from North America and Europe Presenting new material on the enactment of exchange relationships within everyday domesticity the book makes significant historical theoretical and methodological contributions to the analysis of contemporary consumption It also re evaluates consumption theory as well as examining the methodology of recent studies in consumption and domesticity pressing for a more rigorous approach to the use of case studies By considering how the specific contexts in which consumption occurs such as married domesticity can limit possible versions of selfhood The Wedding Present tests the assumption that consuming creates individual identities Thus the book argues consumption cannot be isolated as an explanation of individual or social formation
