Innovation, Between Science and Science Fiction Thomas Michaud, 2017-06-29 Fantasy and science fiction are both involved in the process of innovation in technological societies Long regarded as a hindrance to rationality and to science science fiction has become the object of praise in recent decades Innovative organizations use science fiction to stimulate the creativity of their teams and more and more entrepreneurs are using its influence to develop innovation Scientific practice relies in part on an imaginary dimension The mapping of the technical imagination of science fiction has become an important strategic issue as has its patentability The conquest of space the construction of cyberspace and virtual reality biotechnologies and nanotechnologies are all at the center of futuristic fictions that participate in scientific speeches and discoveries

Transformation of Collective

Intelligences Jean-Max Noyer, 2016-10-14 There is a great transformation of the production of knowledge and intelligibility The digital fold of the world with the convergence of NBIC affects the collective assemblages of thought of research The aims of these assemblages are also controversial issues From a general standpoint these debates concern performative science and performative society But one emerges and strengthens that has several names transhumanism post humanism speculative post humanism It appears as a great narration a large story about the future of our existence facing our entry into the Anthropocene It is also presented as a concrete utopia with an anthropological and technical change In this book we proposed to show how collective intelligences stand in the middle of the coupling of ontological horizons and of the process of biotechnical maturation

L'intelligence artificielle capitaliste, défis pour la gauche et alternatives possibles Rezgar Akrawi, 2017, L'intelligence artificielle capitaliste défis pour la gauche et alternatives possibles La technologie au service du capital ou outil de libération Rezgar Akrawi Indépendant de gauche intéressé par la gauche et la révolution technologique et travaille en tant qu'expert dans le développement de systèmes et le e-gouvernement rezgar1@yahoo.com www.rezgar.com 1 1 1 Pourquoi ce livre Et pourquoi maintenant Avec les développements rapides de l'intelligence artificielle et son impact croissant sur divers aspects de la vie de l'économie et de la politique la science la culture la pensée et la créativité elle est devenue présente partout secouant le monde et volant un rythme sans précédent Il est maintenant essentiel de présenter une analyse gauchiste complète de ce sujet crucial L'intelligence artificielle est devenue un pilier fondamental dans le remodelage des relations de travail des modes de production et de la gestion de la conscience de masse passant les outils traditionnels précédemment utilisés par le capitalisme L'absence d'une analyse gauchiste approfondie de l'intelligence artificielle laisse le champ libre aux lites capitalistes pour orienter la discussion de manière à servir leurs intérêts de classe et imposer leur vision unilatérale de leur propre point de vue Par conséquent il est urgent de disposer d'une analyse qui révèle comment l'intelligence artificielle est utilisée aujourd'hui non seulement comme outil de production mais aussi comme moyen de renforcer le contrôle sur le travail et la conscience de restructurer les marchés et d'imposer une réalité numérique dominée par les grandes puissances et les entreprises technologiques monopolistiques capables de diriger le destin des individus et des sociétés par le biais d'algorithmes et de mégadonnées L'intelligence artificielle d'aujourd'hui sous le capitalisme n'est pas simplement une marchandise ou un outil puissant c'est un mécanisme très influent dans le remodelage de la conscience de masse de manière sophistiquée et sans précédent Plutôt que de simplement automatiser le travail manuel et intellectuel de développer des outils de production d'améliorer la créativité de faciliter diverses tâches d'augmenter l'efficacité d'améliorer les services de santé et d'éducation et de faire progresser la recherche scientifique il est utilisé par le biais d'algorithmes ciblés pour remodeler la conscience de masse de manière à servir le capitalisme Cela se fait par des méthodes douces scientifiques indirectes et imperceptibles dont les effets s'accumulent progressivement au fil du temps En conséquence une fausse conscience se forme qui renforce le capitalisme en tant que système éternel et irremplaçable
