Managing America's Small Communities David H. Folz, Edward P. French, 2005-08-25. Managing America's Small Communities charts several key aspects of the largely unexamined world of small city management. This book describes the demographic trends, structural features, executive behavior, and service quality among small communities. Are small cities growing, declining, or have they remained untouched by the force of change? To what extent have the structural changes and reforms that have swept through larger cities touched small communities? What are the characteristics and behaviors of small city chief executives, and how involved are different executives in the dimensions of the governmental process? How do chief executives in small cities make decisions about local services and programs? Are there differences in the extent to which appointed managers and elected mayors are responsive to community interests? The book also examines the frequency with which small communities provide various services, the quality of services provided, and how small city officials can diagnose problems with service quality and performance. The book's theme is the value added to small communities that evidence professionalism in city administration. The benefits that accrue to having a professional city manager are most apparent in the extent to which city managers are engaged in decisions related to each of the dimensions of the governmental process, the level of service quality provided, and the prospects for measuring service performance.

MARKETING OF SERVICES Dr. Anand Kumar,Dr. Devendra Prasad Pathak, Intangibility is a major issue in the marketing of services with several ramifications Customers have to buy such services based on mutual trust and confidence they repose with the seller Hence sellers deal with several challenges throughout the life cycle of a Service These challenges become even more

consuming for the sell given the kind of cut throat competition prevailing in the current market scenario To add to this the intervention of the technology particularly the application of Internet has been so entwined with the manufacturing delivery and consumption of services that it had added altogether different dimensions to the existing challenges for sellers Variation in the quality of services may occur for many reasons of which the predominant one could be attributed to the conduct of people employed in the creation of services and then the customers themselves So standardization quality and branding of services is more often associated with the management of employees and management of customer s perceptions of services One could easily imagine the complexity and distinctiveness involved in the understanding of the subject Marketing of Services This book not only deals with the attributes of Services in general but also dwells into scope and proportions of the uniqueness of services and its implications for the sellers The authors also aim to discuss the management of people as well as quality and standardization aspects of services from the strategic perspective towards the later part of the book The authors hope that the practitioners and the academicians would be able to relish the lucid and the pinpoint outlook of this work on Marketing of Services alike
