Service Selling:

Service Selling Robert G. Stemper, 1991-09-03 A guide to improving sales and profits in consumer financial services that stresses the development of a sales and service culture The key principles discussed are interaction with customers cultural support and values service from the customer s point of view service selling characteristics of successful sales organizations star sales people perfecting the sales process dealing with prospective clients and ongoing interaction with the client

Selling in Customer Service Leon Cai, 2024-08-27 Service in this book refers to the behaviors and actions of serving customers Selling in this book refers to the behaviors and actions of selling products to customers Hence this book is completely different from other books on these subjects Despite the fact that there are many books on service improvement and many related to selling skills worldwide there are few books on how service and selling are integrated and coordinated Primarily it focuses on the interaction and transition between the behavior of service and the behavior of selling by sharing methods and skills of how those two are interrelated This book provides many helpful guidelines and solutions for turning customers satisfaction with service into growth in sales Through many refreshing ideas the author helps you deeply understand the significance of integration of and conversion between service and selling and the harm of disconnection between service and selling Many new ideas and viewpoints which are different from other service books or sales books are discussed such as the contention that over service and over selling should be prevented Instead of Giving highly complex and abstract definitions of service or selling this book redefines service and selling with say YES to customers and Make customers say YES respectively Insisting that customers satisfaction with service will naturally lead to their long term loyalty this book emphasizes that customers satisfaction with service has a shelf lifetime which will soon fade over time Taking the achievement of customer satisfaction as the final purpose of service the author believes that the end of service is not customer satisfaction but to create new customer needs and achieve increased sales Taking meeting or exceeding customer expectations as the golden rule the author insists that customer expectations need to be reduced first then satisfied and upgraded finally Focusing on the development of customers buying needs like other books do this book focuses oppositely on the research of why customers have no buying needs

Pocket Guide to Selling Services and Products Peter Morris, Malcolm McDonald, 2014-04-23 First published in 1995 This pocket guide is a cartoon book with a serious message it explores the world of commercial transactions selling products and services It will take the salesperson through the course of the sales process in an informative and entertaining way Selling Services and Products begins by establishing an understanding of customers needs and moves through getting an appointment to meet them to the moment when the sale is closed It examines the differences between selling services and products and consolidates that information by an exercise at the end of each chapter Everybody constantly makes transactions of one kind or another so the selling process embodies a fundamental human activity the need to persuade somebody about something so that both parties benefit This book will

profit not only sales executives but everyone This unique pocket guide is a must for sales and marketing managers and students Selling Services Patrick Forsyth,2003-10-31 The sales function is the front line of any business Keeping up with the latest sales techniques is essential as well as ensuring you have a motivated incentivised and focused sales team well versed in the basics of selling from identifying new prospects and getting repeat business to closing the deal This module gives essential insight into all the key sales drivers such as account management handling complex sales selling services FMCG selling customer relationships and self development for sales people Service Is Not a Product Joseph Siderowicz,2012-02-01 Service is Not a Product Experts Guide to Selling Service Agreements will describe to new and experienced sales marketing and management people the keys to success for selling service agreements on technology based products and systems Personnel indirectly involved in service sales such as technicians engineers administrative assistants and others who work with customers will also find the book beneficial Readers will learn the unique skills and methodology required to be successful from the industry expert More than one million sales professionals are actively involved selling service agreements on technology based products For many it s a major source of income In almost all cases it s the major source of profits for their companies Every product or system manufactured and installed eventually falters or fails Current product designs that integrate electronics software and mechanical devices require repair retrofits upgrades and on going maintenance The growing number of products and systems being integrated has created a new category of users with wide ranging service needs Product applications continue to grow but for the most part service offerings and service sales strategies remain the same Most companies utilize the same resources to train both service sales and product sales personnel The information presented is typically generic in nature falling short of what s needed People selling products are trained to sell features functions and benefits Service sales people need to be trained to sell value and master abstract selling concepts There is little commonality between the two sales processes Service is Not a Product is written specifically for individuals engaged in selling service **How to Sell Your Services Online** Peter Sellers,2021 About twelve or thirteen years ago your ship came in and you may not have even realized it You see that was about the time that personal computers started appearing in homes around the world and we all started accessing the Internet At the time many of us didn t realize it but the playing field had just been totally leveled and things that you never thought would be possible became possible Your ship came in If you didn t realize that your ship had arrived back then there is good news You still have time to catch that ship before it sails away With the use of the Internet you can start your own business with very little invested In fact you can start your own business and become financially secure if not financially independent with very little This is what I meant when I said that the playing field had been leveled Because we have the Internet you have just as much of a chance at success as you would if you started a brick and mortar business In fact the chances of success are even higher although many people don t realize it You see with the Internet you don t need the large investment that would be required to start a

traditional brick and mortar business You also won't have that overhead every month You are also not subject to being limited to customers in your geographic area You have a global customer base That is what increases your chance of success But you must also consider the other side of the coin Anyone can start a business online and right now today there are millions if not billions of online businesses Not all of them do succeed It takes time patience and know how to make it work It does not however take a lot of money That isn't to say that it doesn't take any money Anyone who tells you that you can successfully get an online business off of the ground for free is pretty much lying to you Since you are reading this the chances are good that you have considered starting your own online business at some point You may have even done so successfully But if this is all new to you you may be a bit concerned about the fact that you don't have a product to sell If you are not new to the whole idea of making a living online you may have already realized the truth everybody has something that can be sold online What I'm talking about here is services as opposed to physical or digital products When you sell services you and your service are essentially your product Now if you have a service a skill to sell you have just increased your chances of success with an online business tremendously Anyone can create or buy a product to sell to others In fact there are millions of people doing that right now and again not all of them are successful In fact few are successful but not everyone has marketable skills When a product creator wants to sell a product and they do not have marketable skills guess what They hire someone who has the skills that they lack Those that have sense enough to hire a professional to get the job done right are more likely to succeed That's where you come in If you really think about it you probably have skills that may not be very marketable out in the physical world but those same skills may be in very high demand online If you are a programmer the chance that you will be hired by Microsoft and move to Redwood California to work in a cushy office is slim to none Those jobs are already taken But there is lots of work to be had and it is provided by people who are not sitting in an executive office in Redwood As an Internet Marketer you have most likely needed to hire the services of various professionals These may have been writers graphical designers web designers or programmers But the chances are good that during your career as an Internet Marketer you've picked up a few skills of your own For example as an Internet Marketer you probably know quite a bit about writing sales copy Do you have any idea how much that skill is worth online There are copywriters making anywhere from 2000 on up to 20 000 for writing one webpage of sales copy right now The difference in their rates depends on how well known they are and how much success they have helped others to achieve There are more and more people coming online everyday trying to break into online business They have absolutely no idea what they are doing but they think that they know how to get started It doesn't take long before they realize that they don't have a clue and they start looking for help Why isn't their sales page working Why aren't they moving up through the ranks in the search engines They need help and they are willing to pay for it Again that's where you come in Internet marketers sell products and sometimes they supplement their income by selling their skills to other Internet marketers It is a very common thing and believe it or
