Harrington, 2016-04-01 Until the 1990s industrialization was the dominant development paradigm for the Asia Pacific region Since then advanced services finance business or producer services information and creative services have become deeply embedded in the processes of economic growth and change in the region This rapid tertiary expansion is fundamentally restructuring national and regional economies and urban form in line with the introduction of advanced production systems national modernization programmes and the globalization strategies of governments Services are being actively deployed as instruments of metropolitan reconfiguration and land use change This book explores various aspects of the relationship between service industries and economic development in Japan South Korea China Taiwan Singapore India Australia and New Zealand It provides new sector oriented and regional and national perspectives on services and development *Uneven Development and Regionalism* Costis Hadjimichalis, 2005-12-07 Published in the year 1986 *Uneven Development and Regionalism* is a valuable contribution to the field of Geography *Consumer Services and Economic Development* Colin C. Service Industries in Regional Development William J. Coffey, James John McRae, 1989 This document presents a broad empirical picture of the national regional and urban structure of the Canadian economy It identifies the factors which may be causing the relative shift towards employment in service industries and occupations and shows that the lack of actual data on interregional flows of service outputs effectively precludes the empirical testing of regional general equilibrium models involving service industries It concludes by bringing forth the regional policy implications embedded in the conceptual and empirical work on service industries

Divided Province Greg Albo, Bryan M. Evans, 2019-02-28 No government jurisdiction in Canada has so radically transformed its public policies over the past decades as Ontario and yet the province has also maintained a striking degree of political stability in its party system Since the 1990s neoliberalism has been the point of reference in constructing policy agendas for all of Ontario's political parties It has guided the strategy for governance of the dominant Liberal Party since 2003 even as it divides the province between workers and employers north and south rural and urban and racialized minorities and the majority population With a focus on the governments of Mike Harris Dalton McGuinty and Kathleen Wynne Divided Province brings together leading researchers to dissect the province's public policies since the 1990s Presenting original state of the art research the book demonstrates that although the Conservative government of Mike Harris implemented the sharpest and most profound shift towards the establishment of a neoliberal regime in the province the subsequent Liberal governments consolidated that neoliberal turn The essays in this volume explore the consequences of this ideological turn across a spectrum of policies including health education poverty energy employment manufacturing and how it has impacted workers women First Nations and other distinct communities The first book to offer a comprehensive critical account of neoliberalism in Ontario Divided Province overturns conventional readings of the province's politics and suggests that building a more democratic and egalitarian alternative to the current orthodoxy requires nothing less than a radical rupture from existing policies and political alliances Without such a decisive break political space may well open up again for the populist right
