provoking book the authors explore notions of wellbeing and what is created when skipped generations are brought together through singing infused multimodal intergenerational curricula They argue for the import of singing as a multimodal literacy practice and unite theoretical ideas practical tools and empirical research findings from a ground breaking seven year study of intergenerational singing in multimodal curricula Educators and researchers alike will find in the pages of this interdisciplinary book responses to the question of why multimodal literacy might matter and a sample curriculum designed to foster the expansion of people s literacy and identity options across the lifespan div

The Musical Brain Lois Svard, 2023 For centuries poets and philosophers have written about the power of music often suggesting that music is the essence of life itself that music lives within us that we are music Scientists have dismissed these writings as flights of poetic fancy or perhaps metaphor or artistic license They have considered music to be a product of culture and that s the way musicians have studied music as well But have poets and philosophers perhaps had a better sense of the true nature of music Have they been right all along in suggesting that music is life itself

The Culture of Feedback Daniel Belgrad, 2019-08-30 When we want advice from others we often casually speak of getting some feedback But how many of us give a thought to what this phrase means The idea of feedback actually dates to World War II when the term was developed to describe the dynamics of self regulating systems which correct their actions by feeding their effects back into themselves By the early 1970s feedback had become the governing trope for a counterculture that was reoriented and reinvigorated by ecological thinking The Culture of Feedback digs deep into a dazzling variety of left of center experiences and attitudes from this misunderstood period bringing us a new look at the wild side of the 1970s Belgrad shows us how ideas from systems theory were taken up by the counterculture and the environmental movement eventually influencing a wide range of beliefs and behaviors particularly related to the question of what is and is not intelligence He tells the story of a generation of Americans who were struck by a newfound interest in and respect for plants animals indigenous populations and the very sounds around them threading his tapestry with cogent insights on environmentalism feminism systems theory and psychedelics The Culture of Feedback repaints the familiar image of the 70s as a time of Me Generation malaise to reveal an era of revolutionary and hopeful social currents driven by desires to radically improve and feed back into the systems that had come before
