 J. Jaeger, 2004-12-13 The study of speech errors or slips of the tongue is a time honored methodology which serves as a

 theories of speech production planning However until Kids Slips there has never been a corpus of such errors from children

 in young children ages 18 months through 5 years through their slips of the tongue Thus this text provides a new
 methodology and data source which will greatly expand our ability to uncover the details of early language development
 Professor Jaeger s groundbreaking book incorporates both details of her methodology and findings with implications for
 different aspects of language development including phonetics and phonology the lexicon semantics morphology and syntax
 While all the child data is included in the book a Web site hosted by the author provides readers with the adult data as well
