

# 7 brilliant lesson planning tips from teachers.

## Add learning intentions

Learning intentions set the scene for students and tell them what to expect for the lesson, and it's crucial to give them real-world context and ensure that the language you use is precise and suitable for their age. You can use acronyms, like **WALT** (we are learning to), **WILF** (what I'm looking for) and **TIB** (this is because) to engage them.

## Work in cycles for each lesson

- ✓ **Model:** show the students how to complete an activity before starting, using examples and non-examples.
- ✓ **Practise together:** students work together and with your help to complete the activity.
- ✓ **Practise independently:** once students are comfortable, they can try completing the activity by themselves.

## Include checks for understanding (CFU)

These are activities like "whip around" and "response cards" that tell you whether students have learned what was expected. They are a crucial part of every lesson!

## Ask three key questions

1. What knowledge, skills and understanding do your students need to learn for this lesson?
2. What would be the best way to teach it?
3. How can I assess the knowledge and skills that were taught?

With these three questions, you can create your broad outline for the lesson and start getting into the details.

## Add cumulative reviews

Students constantly move between topics throughout the day, so it's important to jog their memories by briefly discussing what was covered in the prior lesson – you need them to remember the fundamentals before moving forward! Make it fun, quick and sharp – a quiz, writing on a mini-whiteboard, a competition etc.

## Add constraints for differentiation

Constraints are like in-built clues that help students complete tasks, such as filling in certain letters when trying to spell a word. You can give them lots of constraints at the start, and fewer and fewer as they practise and work through the activity.

## Cater to all learning styles

Ensure that your lessons cater to visual, auditory and kinaesthetic learners. You can refer to the board, have students collect items, act out dramas and more. Kids get bored, so try to spend less time talking and more time engaged in learning!

**Organising and Planning Guide** Scottish Primary Mathematics Group, 2000-06-22 [A Guide to Teaching Practice](#)  
Louis Cohen, Lawrence Manion, Keith Morrison, 2006-09-07 The fifth edition of this classic textbook will ensure that it remains one of the most useful and widely read texts for students embarking upon teacher training [The Academic Teaching Librarian's Handbook](#)  
Claire McGuinness, 2021-01-20 The Academic Teaching Librarian's Handbook is a comprehensive resource for academic library professionals and LIS students looking to pursue a teaching role in their work and to develop this aspect of their professional lives in a holistic way throughout their careers. The book is built around the core ideas of reflective self-development and informed awareness of one's personal professional landscape. Through engaging with a series of exercises and reflective pauses in each chapter, readers are encouraged to reflect on their professional identity, self-image, self-efficacy and progress as they consider each of the different aspects of the teaching role. This handbook will provide a comprehensive resource on teaching, professional development and reflective practice for academic teaching librarians at all stages of their careers, explore the current landscape of teaching librarianship in higher education and highlight the important developments, issues and trends that are shaping current and future practice, examine the roles and responsibilities of the academic teaching librarian in the digital era, introduce the essential areas of development, skill and knowledge that will empower current and future professionals in the role, inspire prospective and current academic teaching librarians to adopt a broad conception of the role that goes beyond the basic idea of classroom-based teaching and provide practical tools to engage in personal development and career planning in this area. The Academic Teaching Librarian's Handbook is an indispensable reference suitable for early career professionals at the start of their teaching journey as well as mid or late career librarians who may have moved into leadership and managerial roles and who wish to advance their teaching role to the next level. *Teaching for Mastery in Writing* Mike Cain, 2018-07-12 Teaching for Mastery in Writing provides a practical approach to developing mastery in writing which helps all primary children to develop their skills and inspires a love of writing. This innovative book follows an approach that integrates mastery into existing teaching sequences, an approach which aims to improve the writing ability of all children, not just the more able. Writing is a tough discipline for children in today's primary schools. The number of skills they are expected to learn is a source of amazement to many adults outside education. It is no easier to teach, not least because of the many and varied demands on schools including the National Curriculum, SPaG tests, assessment frameworks and inspections. Now more than ever it is crucial that teachers focus on helping children become the most effective communicators they can be through the medium of writing. Throughout the book, Mike Cain promotes the importance of a classroom culture characterised by focused talk and reasoning and provides lots of ideas for challenging children in their writing through the development of key learning dispositions and critical thinking skills. **The Teacher's Ultimate Planning Guide** Lisa Maria Burke, 2002-06-17 This comprehensive manual offers step-by-step tools to

**The Ultimate Guide to Lesson Planning** Carol Thompson, Lydia Spenceley, Mark Tinney, Elaine Battams, Ann Solomon, 2024-02-29. This practical guide will help you to plan evidence-informed, innovative lessons that can be adapted to meet your individual student's needs. Modelled on a typical lesson plan, the book covers all aspects of planning such as learning aims, starting a lesson, resources and activities, embedding skills and assessment. Each chapter features a wide range of activities and strategies that can be used every day and easily adapted for different learners. The chapters also explore what to do when lessons don't go to plan and how to use technology effectively to support learning. Throughout there are nuggets of useful theory to help you reflect not only on what works in the classroom but why. Written by an expert author team and linked to the early career framework, this is essential reading for all trainee and early career teachers across a wide range of educational settings.

Handbook for Teachers in Universities and Colleges David Newble, Robert Cannon, 2013-10-15. First Published in 2000. This is the fourth edition of a handbook that has already become well known to many academic staff. Its popularity rests on the way it presents ideas about teaching and learning underpinned by research findings but in a form that provides detailed, helpful advice for teachers in higher education. The Handbook could be used to support any of the many training programmes being introduced into colleges and universities around the world as indeed previous editions have already done. The various chapters focus on the specific skills that are dealt with in such programmes: large group and small group teaching, methods of assessment and so on. They also include advice on how to present conference papers, an area where advice seems sorely lacking.
