William B. Irvine, 2018-09-07 What are you Obviously you are a person with human ancestors that can be plotted on a family tree but you have other identities as well According to evolutionary biologists you are a member of the species Homo sapiens and as such have ancestral species that can be plotted on the tree of life According to microbiologists you are a collection of cells each of which has a cellular ancestry that goes back billions of years A geneticist though will think of you primarily as a gene replication machine and might produce a tree that reveals the history of any given gene And finally a physicist will give a rather different answer to the identity question you can best be understood as a collection of atoms each of which has a very long history Some have been around since the Big Bang and others are the result of nuclear fusion that took place within a star Not only that but most of your atoms belonged to other living things before joining you From your atoms point of view then you are just a way station on a multibillion year long journey You A Natural History offers a multidisciplinary investigation of your hyperextended family tree going all the way back to the Big Bang And while your family tree may contain surprises your hyperextended history contains some truly amazing stories As the result of learning more about who and what you are and about how you came to be here you will likely see the world around you with fresh eyes You will also become aware of all the one off events that had to take place for your existence to be possible stars had to explode the earth had to be hit 4.5 billion years ago by a planetesimal and 65 million years ago by an asteroid microbes had to engulf microbes the African savanna had to undergo climate change and of course any number of your direct ancestors had to meet and mate It is difficult on becoming aware of just how contingent your own existence is not to feel very lucky to be part of our universe

**Ageless** Andrew Steele, 2021-03-23 A fascinating look at how scientists are working to help doctors treat the aging process itself helping us all to lead longer healthier lives Sanjay Gupta MD Aging not cancer not heart disease is the underlying cause of most human death and suffering The same cascade of biological changes that renders us wrinkled and

gray also opens the door to dementia and disease We work furiously to conquer each individual disease but we never think to ask Is aging itself necessary Nature tells us it is not there are tortoises and salamanders who are spry into old age and whose risk of dying is the same no matter how old they are a phenomenon known as biological immortality In Ageless Andrew Steele charts the astounding progress science has made in recent years to secure the same for humans to help us become old without getting frail to live longer without ill health or disease     The God Connection Basil Gala, 2024-11-19 After all why should not some humans be like angels If our spirit has the same origin and the same destination we are but pilgrims on the Earth Documented throughout various times cultures religions and geographical locations are stories of spiritual events that transcend the human experience beyond the limits of the physical body Many have sought answers for how it may be possible that a human is comprised of both immaterial consciousness and physical matter After all physical evidence suggests a distinct connection between life and the functionality of the body However first hand experiences passed down through global oral traditions and among present humans suggest the existence of the spiritual realm The God Connection is a philosophical treatment of both the savory and unsavory aspects of religion and the belief in a higher power Written in simple and direct English it embodies scientific insights as well as inspirational passages while also considering the negative implications of corrupt religious practices in tandem with the benefits of sound mystical explorations Join Dr Basil Gala in this personal adventure into spiritual thought and meditation complemented with scholarly research of the histories and achievements of great religious movements worldwide     **Palinuro of Mexico** Fernando del Paso, 1996 Like those writers to whom he has been compared Fuentes Garcia Marquez James Joyce and Rabelais del Paso draws upon myth science and world literature to expand his particular story to universal proportions Telling the story of a medical student who is engaged in an incestuous affair with his cousin the novel satirizes advertising politics pornography and mythology while at the same time celebrating the body with a thoroughness that only a student of medicine could manage     The Social Construction of Science T. Jagtenberg, 2012-12-06 This book concerns the institutionalisation of the physical sciences The book breaks with the established tradition in the history philosophy and sociology of sciences by attempting to capture both the cognitive and social dimensions of institutionalisation in one unified analysis This unification has been achieved through a treatment of research as goal directed social action a theme which has been developed both theoretically and empirically The analysis presented is therefore unique in its breadth of focus and shows how the traditional concerns of sociology with generalised macro structures of meaning and action can be related to the lifeworlds of individual scientists The sociology of the sciences is still today a relative newcomer to the field of sciences studies which has traditionally been dominated by the history and philosophy of the sciences I hope that this book reflects the excitement I experienced in being able to respond to the debates and concepts which erupted in that particularly fertile period following the publication of Kuhn's Structure of Scientific Revolutions in 1962 a period from which a cognitively oriented sociology of the sciences was to emerge as a

serious challenger to orthodoxies in the history philosophy and sociology of sciences      **Knowing Machines** Donald A. MacKenzie, 1998 The essays are tied together by their explorations of connections primarily among technology society and knowledge and by their general focus on modern high technology They also share an emphasis on the complexity of technological formation and fixation and on the role of belief especially self validating belief in technological change      The One Culture? Jay A. Labinger, Harry Collins, 2010-08-15 So far the Science Wars have generated far more heat than light Combatants from one or the other of what C P Snow famously called the two cultures science versus the arts and humanities have launched bitter attacks but have seldom engaged in constructive dialogue about the central issues In The One Culture Jay A Labinger and Harry Collins have gathered together some of the world's foremost scientists and sociologists of science to exchange opinions and ideas rather than insults The contributors find surprising areas of broad agreement in a genuine conversation about science its legitimacy and authority as a means of understanding the world and whether science studies undermines the practice and findings of science and scientists The One Culture is organized into three parts The first consists of position papers written by scientists and sociologists of science which were distributed to all the participants The second presents commentaries on these papers drawing out and discussing their central themes and arguments In the third section participants respond to these critiques offering defenses clarifications and modifications of their positions Who can legitimately speak about science What is the proper role of scientific knowledge How should scientists interact with the rest of society in decision making Because science occupies such a central position in the world today such questions are vitally important Although there are no simple solutions The One Culture does show the reader exactly what is at stake in the Science Wars and provides a valuable framework for how to go about seeking the answers we so urgently need Contributors include Constance K Barsky Jean Bricmont Harry Collins Peter Dear Jane Gregory Jay A Labinger Michael Lynch N David Mermin Steve Miller Trevor Pinch Peter R Saulson Steven Shapin Alan Sokal Steven Weinberg Kenneth G Wilson

Idealization XII: Correcting the Model , 2016-08-01 The principal task of the book series Poznan Studies in the Philosophy of the Sciences and the Humanities is to promote those developments in philosophy that respect the tradition of great philosophical ideas on the one hand and the manner of philosophical thinking introduced by analytical philosophy on the other The aim is to contribute to practicing philosophy as deep as Marxism and as caring about justification as positivism
