Seven Voices One Dream:

Lactivism Courtney Jung, 2015-11-24 Breastfeeding has become a moral imperative in 21st century America. Once upon a time this moral imperative made sense. Breastfeeding was believed to bring multiple health benefits including increased resistance to many chronic and even fatal diseases, protection against Sudden Infant Death Syndrome (SIDS), improved intelligence, and countless immunities. The irony now, however, is that breastfeeding continues to gain moral force just as scientists are showing that its benefits have been greatly exaggerated. In 2012, the American Academy of Pediatrics and the Center for Disease Control and Prevention declared the failure to breastfeed a public health issue, thus placing bottle feeding on par with smoking, obesity, and unsafe sex. Recently, politicians too have launched highly visible breastfeeding initiatives, such as former New York Mayor Michael Bloomberg's well-publicized Latch On campaign. And meanwhile, women who don't breastfeed their babies have found themselves with a lot of explaining to do. Physicians, public health officials, and other mothers are pressuring them to breastfeed, even though the best science shows that the advantages of doing so are minimal at best. What is going on? In *Lactivism*, Courtney Jung offers the most deeply researched and far-reaching critique of the breastfeeding imperative to date. Drawing on a wide range of evidence from rigorously peer-reviewed scientific research to interviews with physicians, politicians, business interests, activists, social workers, and mothers from across the social and political spectrum, Jung presents an eye-opening account of how a practice that began as an alternative to Big Business has become Big Business itself.

Militant Lactivism? Charlotte Faircloth, 2013-03-01 Following networks of mothers in London and Paris, the author profiles the narratives of women who breastfeed their children to full term, typically a period of several years, as part of an attachment parenting philosophy. These mothers talk about their decision to continue breastfeeding as the natural thing to do, evolutionarily appropriate, scientifically best, and what feels right in their hearts. Through a theoretical focus on knowledge, claims, and accountability, the author frames these accounts within a wider context of intensive parenting, arguing that parenting practices, infant feeding in particular, have become a highly moralized affair for mothers, practices which they feel are a critical aspect of their identity work. The book investigates why, how, and with what implications some of these mothers describe themselves as militant lactivists and reflects on wider parenting culture in the UK and France. Discussing gender, feminism, and activism, this study contributes to kinship and family studies by exploring how relatedness is enacted in conjunction to constructions of the self.

Mother's Milk Bernice L. Hausman, 2014-02-04 *Mother's Milk* examines why nursing a baby is an ideologically charged experience in contemporary culture. Drawing upon medical studies, feminist scholarship, anthropological literature, and an intimate knowledge of breastfeeding itself, Bernice Hausman demonstrates what is at stake in mothers' infant feeding choices, economically, socially, and in terms of women's rights. Breastfeeding controversies, she argues, reveal social tensions around the meaning of women's bodies, the authority of science, and the value of maternity in American culture. A provocative and multi-faceted work, *Mother's Milk* will be of interest

to anyone concerned with the politics of women's embodiment

Back to the Breast Jessica Martucci, 2015-11-20 After decades of decline during the twentieth century breastfeeding rates began to rise again in the 1970s a rebound that has continued to the present While it would be easy to see this reemergence as simply part of the naturalism movement of the 70s Jessica Martucci reveals here that the true story is more complicated Despite the widespread acceptance and even advocacy of formula feeding by many in the medical establishment throughout the 1940s 50s and 60s a small but vocal minority of mothers drawing upon emerging scientific and cultural ideas about maternal instinct infant development and connections between the body and mind pushed back against both hospital policies and cultural norms by breastfeeding their children As Martucci shows their choices helped ideologically root a back to the breast movement within segments of the middle class college educated population as early as the 1950s That movement in which the personal and political were inextricably linked effectively challenged midcentury norms of sexuality gender and consumption and articulated early environmental concerns about chemical and nuclear contamination of foods bodies and breast milk In its groundbreaking chronicle of the breastfeeding movement *Back to the Breast* provides a welcome and vital account of what it has meant and what it means today to breastfeed in modern America
