Seven Years Old in the Home Environment John Newson, Elizabeth Newson, 2017-12-12 John and Elizabeth Newson's long term investigation of child up bringing attracted intense interest from its earliest beginnings pathbreaking and seminal were adjectives that greeted their first report The study is now established as one of the major projects of the seventies This third volume of the series catches some seven hundred Nottingham children at a critical stage of their development in transition from infant to junior school they are moving out of the protective family orbit and into the wider social world of street playground and classroom where cultural pressures make themselves felt in ever more demanding ways Like the Newson's earlier books this study has a strong ecological flavour in the sense that what children do what parents do and how they feel about what they do are all set firmly into the broader context of life as it is lived in contemporary urban society This is no laboratory investigation Yet a sensitive and subtle methodology has allowed the Newsons to present an impressive structure of hard factual data while putting flesh on the statistical bones by constant reference to the mothers own thoughts and reactions faithfully recorded in their own vivid words The result is a rich descriptive picture of seven year olds and their family life their play friendships quarrels their duties and privileges their fears fantasies and jokes Inevitably much of the book explores the dynamics of conflict between mother and child and takes a long hard look at the domestic power game as it is expressed in both words and punishment At the same time the loving and caring side of the relationship is closely and delicately examined with a rare empathy for both parent and child In short this is a study in depth and in breadth of how parents and children bring each other up Teachers doctors nurses and social workers as well as parents welcomed the Newsons earlier reports Once again no professional worker in the field of childhood or parenthood can afford to be without the insights offered by this volume which is also a rich source of enjoyment for any observer professional or amateur of the family in society today Today it can be enjoyed in its historical context

College John Palmer Gavit,1925 **Lost Freedom** Mathew Thomson,2013-11-28 Lost Freedom addresses the widespread feeling that there has been a fundamental change in the social life of children in recent decades the loss of childhood freedom and in particular the loss of freedom to roam beyond the safety of home Mathew Thomson explores this phenomenon concentrating on the period from the Second World War until the 1970s and considering the roles of psychological theory traffic safety consciousness anxiety about sexual danger and television in the erosion of freedom Thomson argues that the Second World War has an important place in this story with war borne anxieties encouraging an emphasis on the central importance of a landscape of home War also encouraged the development of specially designed spaces for the cultivation of the child including the adventure playground and the virtual landscape of children s television However before the 1970s British children still had much more physical freedom than they do today Lost Freedom explores why this situation has changed The volume pays particular attention to

the 1970s as a period of transition and one which saw radical visions of child liberation but with anxieties about child protection also escalating in response This is strikingly demonstrated in the story of how the paedophile emerged as a figure of major public concern Thomson argues that this crisis of concern over child freedom is indicative of some of the broader problems of the social settlements that had been forged out of the Second World War [The Study Of Primary Education](#) Colin Conner,Brenda Lofthouse,2003-10-04 The four books are intended to be used by students taking BEd or PGCE courses and by teachers in service taking diploma or higher degree courses in primary education The material extracted can be used by tutors as a focus for seminars or as reading to back up lectures and by students as a source for essays or as a starting point for further reading The books are not intended to be read straight through from cover to cover but can be selectively and flexibly used at various stages in the course For convenience the extracts have been organized into a number of sections Volume 1 comprises extracts which examine primary education from historical ideological philosophical sociological and psychological perspectives Volume 2 deals with curriculum studies Volume 3 with school organization and management and Volume 4 with teaching and classroom studies Because of limitations of space primary education has been confined to the education of children aged 5 to 11 though the compilers acknowledge that in doing so they may offend those teachers in nursery or middle schools who regard themselves justifiably as primary practitioners **Growing Children, Thriving Children** Lou Harvey-Zahra,2019-04-18 No longer little children but not yet teenagers children in the primary school years between seven and twelve face big emotional social psychological and physical changes How can parents best support their children whilst also embracing their growing independence Inspired by the Waldorf approach to child development Lou Harvey Zahra explains the three major transitions or rubicons of middle childhood at ages seven nine and twelve She offers practical tips and guidance to help parents through the challenges of the middle years including Creative solutions for common discipline issues Helpful routines for busy households to strengthen family bonds Suggested responses to tricky childhood questions Sensitive advice to help children manage anger and anxiety Growing Children Thriving Children empowers parents to navigate the middle years with confidence [Handbook of Parenting](#) Marc H. Bornstein,2013-02-01 Please see Volume I for a full description and table of contents for all four volumes **The Sex Role System** Jane Chetwynd,Oonagh Hartnett,2024-11-18 First published in 1978 The Sex Role System traces the phenomenon of sex role stereotyping through many different disciplines and areas of study showing how presuppositions about sex role expectations can colour our perceptions and radically affect both the theories and the practices underlying our lives today The contributions by several well known psychologists and sociologists highlight many specific areas of stereotyping in our society including marriage school work psychiatry the Social Security services and the Inland Revenue In drawing together the many facets of sex role stereotyping the editors are able to show how the complex conscious and unconscious processes making up the System are formed An empirical approach to the problems involved together with a discussion of the ethical

issues ensures that the reader will gain a greater understanding of the System and its substantial influences during the course of the analysis This book is a must read for students and researchers of psychology sociology and feminist studies

Childhood into Adolescence John Newson, Elizabeth Newson, 2018-10-25 This book is about the lives of 11 year old children growing up in a Midlands city in the late 60s and early 70s Based on interviews with their parents it describes family life at the time as well as the experiences hopes and concerns of the children as they themselves become adolescents The book reflects upon the changes that occur for children in the transitional period between childhood and adolescence It looks at the friendship patterns of eleven year olds their special interests and activities and how they spend their leisure time as well as describing the children s worries and concerns as perceived by their parents It also considers family life and parental issues in the context of children s growing independence and their developing sexual maturity Originally written in the 1980 s but recently discovered and published now for the first time this is the fifth book in the series of long term investigations of child up bringing by John and Elizabeth Newson distinguished child psychologists at the University of Nottingham Their research began in the late 1950s when the cohort of children was a year old their mothers were subsequently interviewed at intervals as the children grew up This fifth volume draws links between the material from interviews with parents when their sons and daughters were seven eleven sixteen and nineteen years and also invites comparison with the lives of children growing up now The final chapter reviews the book series and the Newsons research programme This exceptional book will be of interest to psychologists and other academics interested in child development as well as professionals involved in work with children and adolescents such as teachers doctors nurses and social workers It also has great historical significance with its potential for comparisons between the lives of children and adolescents now with those growing up some 50 years ago

Families and Their Children with Down's Syndrome Elizabeth A. Byrne, Cliff Cunningham, Patricia Sloper, 1988 The authors present research based on interviews with families in the Manchester Down s Syndrome Cohort given to professionals involved in the welfare of children with Down s Syndrome or in the provision of community care and

support for their families **Families, Food, and Parenting** Lori A. Francis, Susan M. McHale, Valarie King, Jennifer E. Glick, 2021-03-01 This book examines the many roles of families in their members food access preferences and consumption. It provides an overview of factors from micro to macro levels that have been linked to food insecurity and discusses policy approaches to reducing food insecurity and hunger. In addition, it addresses the links between food insecurity and overweight and obesity. The book describes changes in the U.S. food environment that may explain increases in obesity during recent decades. It explores relationships between parenting practices and the development of eating behaviors in children, highlighting the importance of family mealtimes in healthful eating. The volume provides an overview of efforts to prevent or reduce obesity in children with attention to minority populations and discusses research findings on targets for obesity prevention, including a focus on fathers as change agents who play a crucial yet understudied role in food parenting. The book acknowledges that with the current obesogenic environment in the United States and elsewhere around the world, additional and innovative efforts are needed to foster healthful eating behavior and orientations toward food in childhood and in families. This book is a must-have resource for researchers, professors, clinicians, professionals, and graduate students in developmental psychology, family studies, public health, as well as numerous interrelated disciplines including sociology, demography, social work, prevention science, educational policy, political science, and economics.

Early Childhood Care & Education Edward Melhuish, Konstantinos Petrogiannis, 2006-09-27 This edited volume examines the ways in which different countries across the world are tackling early childhood services and how these services affect young children's experiences and development for better and worse.
