## **Seventy Five Years Of Healing On The Heights:**

Special Interest Society James R. Hudson, 2013-09-12 Voluntary associations have been ubiquitous in our society for hundreds of years Efforts to develop a classification scheme have often overlooked one important segment membership based organizations MBOs MBOs are created voluntarily by a group of like minded individuals who seek to advance their interests by organizing to promote and protect a specific domain A number have earned the reputation for operating as special interests To accept that notion would not be telling the full story and would overlook the many contributions they have made A central thesis of Special Interest Society How Membership based Organizations Shape America is that no modern democratic society can function without them With a focus on how they emerge and the steps they take to advance their mutual interests the book also provides a sober account of how MBOs can be slow to accept important and necessary changes It also reveals the less flattering role they have played in denying access or limiting acceptance to eligible individuals based on their race gender ethnicity and more In Special Interest Society James R Hudson analyzes over 400 published histories of MBOs to report on their emergence growth and development Many provide essential services within our society of which we are unaware that we have come to rely upon Employing several sociological theories he explains why their actions have enabled these organizations to thrive in a democratic society as well as affect significant social change Throughout he demonstrates how open and democratic societies provide a fertile ground for their continued emergence He explains why their numbers have increased over the last two hundred years as occupations and personal interests have become more specialized and complex Written for students and scholars working in sociology public policy business community development and nonprofit management as well as association professionals and their staff this book provides an unparalleled insight into the history purpose and challenges of associations in America Building Schools, Making Doctors Katherine L. Carroll, 2022-05-31 In the late nineteenth century medical educators intent on transforming American physicians into scientifically trained elite professionals recognized the value of medical school design for their reform efforts Between 1893 and 1940 nearly every medical college in the country rebuilt or substantially renovated its facility In Building Schools Making Doctors Katherine Carroll reveals how the schools constructed during this fifty year period did more than passively house a remodeled system of medical training they actively participated in defining and promoting an innovative pedagogy modern science and the new physician Interdisciplinary and wide ranging her study moves architecture from the periphery of medical education to the center uncovering a network of medical educators architects and philanthropists who believed that the educational environment itself shaped how students learned and the type of physicians they became Carroll offers the first comprehensive study of the science and pedagogy formulated by the buildings the influence of the schools donors and architects the impact of the structures on the urban landscape and the local community and the facilities privileging of white men within the medical profession during this formative period for physicians and medical schools *Seventy-five Years of*

**Divine Healing: The Holiness-Pentecostal Transition Years, 1890-1906** James Robinson,2013-03-06 In the present volume James Robinson shows how the Holiness movement contributed to the rise of Pentecostalism with emphasis on those sectors that practiced divine healing Although other scholars have undertaken to explore this story Robinson s treatment is by far the most thorough examination to date He draws productively on the burgeoning secondary literatures on Pentecostalism and healing and brings to light frequently overlooked yet revealing primary sources The events narrated are fascinating in their own right and are important to the histories of Pentecostalism and healing for how they clarify the processes by which divine healing was pursued debated and often disparaged The text also contributes to larger medical and social histories offering tantalizing glimpses of the roots of some of today s most popular and contested medical and religious responses to sickness and health      **Transactions of the Mississippi Valley Horticultural Society for the Year ...**

Micale,Hans Pols,2021-09-17 In the early twenty first century trauma is seemingly everywhere whether as experience diagnosis concept or buzzword Yet even as many scholars consider trauma to be constitutive of psychological modernity or the post Enlightenment human condition historical research

on the topic has overwhelmingly focused on cases such as World War I or the Holocaust in which Western experiences and actors are foregrounded. There remains an urgent need to incorporate the methods and insights of recent historical trauma research into a truly global perspective. The chapters in *Traumatic Pasts in Asia* make just such an intervention, extending Euro American paradigms of traumatic experience to new sites of world historical suffering and in the process exploring how these new domains of research inform and enrich earlier scholarship.
