## **Several Complex Variables And Complex Manifolds In Two Parts:**

**Several Complex Variables and Complex Manifolds** Mike Field, 1982 Annotation This self contained and relatively elementary introduction to functions of several complex variables and complex especially compact manifolds is intended to be a synthesis of those topics and a broad introduction to the field Part I is suitable for advanced undergraduates and beginning postgraduates whilst Part II is written more for the graduate student The work as a whole will be useful to professional mathematicians or mathematical physicists who wish to acquire a working knowledge of this area of mathematics Many exercises have been included and indeed they form an integral part of the text The prerequisites for understanding Part I would be met by any mathematics student with a first degree and together the two parts provide an introduction to the more advanced works in the subject

**Several Complex Variables, Part 1** Raymond O'Neil Wells, American Mathematical Society, 1977 Contains sections on Singularities of analytic spaces Function theory and real analysis Compact complex manifolds and Survey papers

**Topics in Several Complex Variables** Zair Ibragimov, Norman Levenberg, Sergey Pinchuk, Azimbay Sadullaev, 2016-04-21 This volume contains the proceedings of the Special Session on Several Complex Variables which was held during the first USA Uzbekistan Conference on Analysis and Mathematical Physics from May 20 23 2014 at California State University Fullerton This volume covers a wide variety of topics in pluripotential theory symplectic geometry and almost complex structures integral formulas holomorphic extension and complex dynamics In particular the reader will find articles on Lagrangian submanifolds and rational convexity multidimensional residues  $S$  parabolic Stein manifolds Segre varieties and the theory of quasianalytic functions

**Several Complex Variables VII** H. Grauert, Thomas Peternell, R. Remmert, 2013-03-09 Of making many books there is no end and much study is a weariness of the flesh Eccl 12 12 1 In the beginning Riemann created the surfaces The periods of integrals of abelian differentials on a compact surface of genus  $g$  immediately attach a  $g$  dimensional complex torus to  $X$  If  $g \geq 2$  the moduli space of  $X$  depends on  $3g - 3$  complex parameters Thus problems in one complex variable lead from the very beginning to studies in several complex variables Complex tori and moduli spaces are complex manifolds i e Hausdorff spaces with local complex coordinates  $z_1, \dots, z_n$  holomorphic functions are locally those functions which are holomorphic in these coordinates th In the second half of the 19 century classical algebraic geometry was born in Italy The objects are sets of common zeros of polynomials Such sets are of finite dimension but may have singularities forming a closed subset of lower dimension outside of the singular locus these zero sets are complex manifolds

*Recent Progress on Some Problems in Several Complex Variables and Partial Differential Equations* Shiferaw Berhanu, 2006 The papers in this volume cover many important topics of current interest in partial differential equations and several complex variables An international group of well known mathematicians has contributed original research articles on diverse topics such as the geometry of complex manifolds the mean curvature equation formal solutions of singular partial differential equations and complex vector fields The material in this volume is useful for graduate students and researchers interested in partial differential equations and several complex variables

*Several Complex Variables* Michael Schneider, Yum-Tong Siu, 1999 Expository articles on Several Complex Variables and its interactions with PDEs algebraic geometry number theory and differential geometry first published in 2000

*Collected Papers of Salomon Bochner, Part 4* Salomon Bochner, 1992-01-01 During his long and productive career Salomon Bochner worked in a variety of different areas of mathematics This four part set brings together his collected papers illustrating the range and depth of his

mathematical interests The books are available either individually or as a set **Library of Congress Subject Headings** Library of Congress,2006 **Encyclopaedia of Mathematics** Michiel Hazewinkel,2013-12-01 This ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathematics It is a translation with updates and editorial comments of the Soviet Mathematical Encyclopaedia published by Soviet Encyclopaedia Publishing House in five volumes in 1977 1985 The annotated translation consists of ten volumes including a special index volume There are three kinds of articles in this ENCYCLOPAEDIA First of all there are survey type articles dealing with the various main directions in mathematics where a rather fine subdivision has been used The main requirement for these articles has been that they should give a reasonably complete up to date account of the current state of affairs in these areas and that they should be maximally accessible On the whole these articles should be understandable to mathematics students in their first specialization years to graduates from other mathematical areas and depending on the specific subject to specialists in other domains of science engineers and teachers of mathematics These articles treat their material at a fairly general level and aim to give an idea of the kind of problems techniques and concepts involved in the area in question They also contain background and motivation rather than precise statements of precise theorems with detailed definitions and technical details on how to carry out proofs and constructions The second kind of article of medium length contains more detailed concrete problems results and techniques *Geometric Function Theory in Higher Dimension* Filippo Bracci,2018-03-24 The book collects the most relevant outcomes from the INdAM Workshop Geometric Function Theory in Higher Dimension held in Cortona on September 5 9 2016 The Workshop was mainly devoted to discussions of basic open problems in the area and this volume follows the same line In particular it offers a selection of original contributions on Loewner theory in one and higher dimensions semigroups theory iteration theory and related topics Written by experts in geometric function theory in one and several complex variables it focuses on new research frontiers in this area and on challenging open problems The book is intended for graduate students and researchers working in complex analysis several complex variables and geometric function theory Encyclopaedia of Mathematics M. Hazewinkel,2013-11-11 **Singularities and Foliations. Geometry, Topology and Applications** Raimundo Nonato Araújo dos Santos,Aurélio Menegon Neto,David Mond,Marcelo J. Saia,Jawad Snoussi,2018-03-21 This proceedings book brings selected works from two conferences the 2nd Brazil Mexico Meeting on Singularity and the 3rd Northeastern Brazilian Meeting on Singularities that were held in Salvador in July 2015 All contributions were carefully peer reviewed and revised and cover topics like Equisingularity Topology and Geometry of Singularities Topological Classification of Singularities of Mappings and more They were written by mathematicians from several countries including Brazil Spain Mexico Japan and the USA on relevant topics on Theory of Singularity such as studies on deformations Milnor fibration foliations Catastrophe theory and myriad applications Open problems are also introduced making this volume a must read both for graduate students and active researchers in this field **Integrability,**

**Quantization, and Geometry: II. Quantum Theories and Algebraic Geometry** Sergey Novikov, Igor Krichever, Oleg Ogievetsky, Senya Shlosman, 2021-04-12 This book is a collection of articles written in memory of Boris Dubrovin 1950 2019 The authors express their admiration for his remarkable personality and for the contributions he made to mathematical physics For many of the authors Dubrovin was a friend colleague inspiring mentor and teacher The contributions to this collection of papers are split into two parts Integrable Systems and Quantum Theories and Algebraic Geometry reflecting the areas of main scientific interests of Dubrovin Chronologically these interests may be divided into several parts integrable systems integrable systems of hydrodynamic type WDVV equations Frobenius manifolds isomonodromy equations flat connections and quantum cohomology The articles included in the first part are more or less directly devoted to these areas primarily with the first three listed above The second part contains articles on quantum theories and algebraic geometry and is less directly connected with Dubrovin's early interests      Summaries of Projects Completed in Fiscal Year ... , 1979
