Uekötter, 2010-11-21 From the time when humans first learned to harness fire cultivate crops and domesticate livestock they have altered their environment as a means of survival In the modern era however natural resources have been devoured and defiled in the wake of a consumerism that goes beyond mere subsistence In this volume an international group of environmental historians documents the significant ways in which humans have impacted their surroundings throughout history John McNeill introduces the collection with an overarching account of the history of human environmental impact Other contributors explore the use and abuse of the earth's land in the development of agriculture commercial forestry and in the battle against desertification in arid and semi arid regions Cities which first appeared some 5 500 years ago have posed their own unique environmental challenges including dilemmas of solid waste disposal sewerage disease pollution and sustainable food and water supplies The rise of nation states brought environmental legislation which often meant selling off natural resources through eminent domain Perhaps the most damaging environmental event in history resulted from a perfect storm of effects cheap fossil fuels especially petroleum and the rapid rise of personal incomes during the 1950s brought an exponential increase in energy consumption and unforeseen levels of greenhouse gases to the earth's atmosphere By the 1970s the deterioration of air land and water due to industrialization population growth and consumerism led to the birth of the environmental and ecological movements Overall the volume points to the ability and responsibility of humans to reverse the course of detrimental trends and to achieve environmental sustainability for existing and future populations

of the evolution of German environmentalism since the late nineteenth century He discusses among other things early efforts at nature protection and urban sanitation the Nazi experience and civic mobilization in the postwar years He shows that much of Germany's green reputation rests on accomplishments of the 1980s and emphasizes the mutually supportive roles of environmental nongovernmental organizations corporations and the state Uek tter looks at environmentalism in terms of civic activism government policy and culture and life eschewing the usual focus on politics prophets and NGOs He also views German environmentalism in an international context tracing transnational networks of environmental issues and actions and discussing German achievements in relation to global trends Bringing his discussion up to the present he shows the influence of the past on today's environmental decisions As environmentalism is wrestling with the challenges of the twenty first century Germany could provide a laboratory for the rest of the world
