Sex and Gender in Society Joyce McCarl Nielsen, 1990 Instructor's Guide to Accompany Sex and Gender in Society Communication and Sex-role Socialization Cynthia Berryman-Fink, Deborah Joyce McCarl Nielsen, 1990 Ballard-Reisch, Lisa H. Newman, 2015-10-23 Originally published in 1993 The essays in this book collectively seek to illuminate the role of communication and sex role socialization throughout the life cycle Section 1 addresses some important issues and behaviours that have an impact on the beginnings of the socialization process Section 2 covers socialization later on in relationships the workplace and the political arena while section 3 looks at manifestations of socialization through communication strategies and skills Finally section 4 addresses ways to alter socialization through instructional practices in higher education The approach to studying sex role socialization varies by perspective and methodology and conclusions are interpreted in diverse ways but the results have been very similar and the research in this volume shows that the socialization of males and females continues to reinforce male dominance despite women s advancement toward equal status in society This work is of interest in the fields of sociology psychology anthropology and women s studies as well as Gender and Anthropology Frances E. Mascia-Lees, Nancy Johnson Black, 1999-08-27 A major communication accomplishment of synthesis and distillation Is the difference in mens and womens behavior the result of the human species long evolutionary struggle for survival or is it due to societys child rearing practices and cultural mythologies Is the exclusion of women from the highest positions of power and authority a universal trait of human societies or does womens access to such positions depend on how a society is organized Gender and Anthropology focuses on the central questions that have concerned anthropologists interested in the nature and determinants of gender roles and gender inequality This concise treatment clearly traces how anthropologists have used different theoretical orientations to examine such questions and how these approaches have changed over time in relation to changing social and political conditions Ranging from work in the nineteenth century to contemporary anthropological studies this work analyzes evolutionary psychological materialist Foucauldian structuralist sociolinguistic and reflexive approaches to understanding gender behavior and gender stratification Gender and Anthropology explores how anthropological data from around the world are crucial for questioning unproven but widely held assumptions about men and women in contemporary societies A major accomplishmenta succinct presentation that unfolds our cultures view of women Gender, Interaction, and Inequality Cecilia L. Ridgeway, 2013-03-09 Causal explanations are essential for theory building In focusing on causal mechanisms rather than descriptive effects the goal of this volume is to increase our theoretical understanding of the way gender operates in interaction Theoretical analyses of gender s effects in interaction in turn are necessary to understand how such effects might be implicated with individual level and social structural level processes in the larger system of gender inequality Despite other differences the contributors to this book all take what might be loosely called a microstructural approach to gender and interaction All agree that individuals come to interaction with certain common socially created beliefs cultural meanings experiences and social rules These include stereotypes about gendered activities and skills beliefs about the status value of gender rules for interacting in certain settings and so on However as individuals apply these beliefs and rules to the specific contingent events of interaction they combine and reshape their implications in distinctive ways that are particular to the encounter As a result individuals actively construct their social relations in the encounter through their interaction The patterns of relations that develop are not completely determined or scripted in advance by the beliefs and rules of the larger society Consequently there is a reciprocal causal relationship between constructed patterns of interaction and larger social structural forms The constructed patterns of social relations among a set of interactants can be thought of as micro level social structures or more simply microstructures **Gender in Archaeology** Sarah M. Nelson, 2004 Gender in Archaeology provides a feminist theoretical synthesis of the flood of archaeological work on gender The author examines the roles of women men in areas as human origins the sexual division of labour kinship other social formations *Promoting Equality* European Committee for Equality between Women and Men, Council of Europe, 1998-01-01 **Handbook of Sociological Theory** Jonathan H. Turner, 2006-11-22 This wide ranging handbook presents in depth discussions on the array of subspecialties that comprise the field of sociological theory Prominent theorists working in a variety of traditions discuss methodologies and strategies the cultural turn in sociological theorizing interaction processes theorizing from the systemic and macro level new directions in evolutionary theorizing power conflict and change and theorizing from assumptions of Handbook of the Sociology of Gender Janet Saltzman Chafetz, 2006-11-22 During the past three decades rationality feminist scholars have successfully demonstrated the ubig uity and omnirelevance of gender as a sociocultural construction in virtually all human collectivities past and present Intrapsychic interactional and collective social processes are gendered as are micro meso and macro social structures Gender shapes and is shaped in all arenas of social life from the most mundane practices of everyday life to those of the most powerful corporate actors Contemporary understandings of gender emanate from a large community of primarily feminist scholars that spans the gamut of learned disciplines and also includes non academic activist thinkers However while in corporating some cross disciplinary material this volume focuses specifically on socio logical theories and research concerning gender which are discussed across the full array of social processes structures and institutions As editor I have explicitly tried to shape the contributions to this volume along several lines that reflect my long standing views about sociology in general and gender sociology in particular First I asked authors to include cross national and historical material as much as possible This request reflects my belief that understanding and evaluating the here and now and working realistically for a better future can only be accomplished from a comparative perspective Too often American sociology has been both tempero and ethnocentric Second I have asked authors to be sensitive to within gender differences along class racial ethnic sexual preference and age cohort lines **Society in Focus** William E.
