## ESTROGEN

Keeps vaginal tissues lubricated and plump, increases desire, and makes sex more pleasurable.

## PROGESTERONE

Keeps us calm, reduces PMS symptoms, and helps us sleep, but higher levels can adversely impact sex drive

## TESTOSTERONE

Like Estrogen, Testosterone also spikes midcycle, so they work together to boost sex drive and may even improve orgasms.

queer and feminist theorists interrogates the current international consensus in this fast moving area The incrementalist theory whilst offering a methodology for future advances continues to be critiqued All contributions from differing perspectives expose that even for those jurisdictions who have legalised same sex marriage still further and continuous work needs to be done The book will be of interest to students and scholars in the field of human rights family and marriage law and gender studies
