Methods of Study in Natural History Louis Agassiz, 2015-06-26 Excerpt from *Methods of Study in Natural History* The series of papers collected in this volume may be considered as a complement or commentary to my *Essay on Classification* since I have endeavored to present here in a more popular form the views first expressed in that work And although the direct intention of these pages has been as their title indicates to give some general hints to young students as to the methods by which scientific truth has been reached including a general sketch of the history of science in past times yet I have also wished to avail myself of this opportunity to enter my earnest protest against the transmutation theory revived of late with so much ability and so generally received About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Methods of Study in Natural History (Classic Reprint) Louis Agassiz, 2017-10-11 Excerpt from *Methods of Study in Natural History* I confess that there seems to me to be a repulsive poverty in this material explanation that is contradicted by the intellectual grandeur of the universe the resources of the Deity cannot be so meagre that in order to create a human being endowed with reason he must change a monkey into a man This is however merely a personal opinion and has no weight as an argument nor am I so uncandid as to assume that another may not hold an opinion

diametrically opposed to mine in a Split quite as reverential as my own But I nevertheless insist that this theory is opposed to the processes of Nature as far as we have been able to apprehend them that it is contradicted by the facts of Embryology and Paleontology About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
