Mortality And Migration In The Modern World:

Mortality and Migration in the Modern World Ralph Shlomowitz, Lance Brennan, John McDonald, 1996 This is a collection of previously published essays on the mortality suffered by British convicts and free emigrants on the voyage to Australia and by Indian Chinese African and Pacific Islander indentured labourers on their voyages to a variety of destinations across the world The success of various administrative measures in reducing mortality at sea during the 19th century is documented and shown to have a bearing on current debates on the explanation of the 19th century mortality decline in western societies

Mortality and Migration in the Modern World Ralph Shlomowitz, 2024-10-28 The term relocation cost has been coined by Philip Curtin to refer to the increased mortality associated with the migration of people from their childhood disease environments to new ones He and others have quantified this cost for a number of migrant populations notably Africans in the transatlantic slave trade and European troops posted overseas The papers in this volume extend this research agenda by quantifying and analyzing the mortality suffered by other migrant groups both on their voyage and after their arrival at their destination The first three studies deal with free and convict European migration to Australia the following ones with movements of indentured labour from the mid 19th to the present century Chinese African Pacific Islander and above all the migration of Indian labour across half of the globe The collection is introduced by a new essay setting out the historical context and significance of this research

The Dutch Slave Trade, 1500-1850, 2006 Dutch historiography has traditionally concentrated on colonial successes in Asia However the Dutch were also active in West Africa Brazil New Netherland the present state of New York and in the Caribbean In Africa they took part in the gold and ivory trade and finally also in the slave trade something not widely known outside academic circles P C Emmer one of the most prominent experts in this field tells the story of Dutch involvement in the trade from the beginning of the 17th century much later than the Spaniards and the Portuguese and goes on to show how the trade shifted from Brazil to the Caribbean He explains how the purchase of slaves was organized in Africa records their dramatic transport across the Atlantic and examines how the sales machinery worked Drawing on his prolonged study of the Dutch Atlantic slave trade he presents his subject clearly and soberly although never forgetting the tragedy hidden behind the numbers the dark side of the Dutch Golden Age which makes this study not only informative but also very readable

Doctors at Sea R. Haines, 2005-11-22 In this engaging tale of movement from one hemisphere to another we see doctors at work attending to their often odious and demanding duties at sea in quarantine and after arrival The book shows in graphic detail just why a few notorious voyages suffered tragic loss of life in the absence of competent supervision Its emphasis however is on demonstrating the extent to which the professionalism of the majority of surgeon superintendents even on ships where childhood epidemics raged led to the extraordinary saving of life on the Australian route in the Victorian era

Disease and the Modern World: 1500 to the Present Day Mark Harrison, 2013-05-02 Mark Harrison's book illuminates the threats posed by infectious diseases since 1500

He places these diseases within an international perspective and demonstrates the relationship between European expansion and changing epidemiological patterns The book is a significant introduction to a fascinating subject Gerald N Grob Rutgers State University In this lively and accessible book Mark Harrison charts the history of disease from the birth of the modern world around 1500 through to the present day He explores how the rise of modern nation states was closely linked to the threat posed by disease and particularly infectious epidemic diseases He examines the ways in which disease and its treatment and prevention changed over the centuries under the impact of the Renaissance and the Enlightenment and with the advent of scientific medicine For the first time the author integrates the history of disease in the West with a broader analysis of the rise of the modern world as it was transformed by commerce slavery and colonial rule Disease played a vital role in this process easing European domination in some areas limiting it in others Harrison goes on to show how a new environment was produced in which poverty and education rather than geography became the main factors in the distribution of disease Assuming no prior knowledge of the history of disease Disease and the Modern World provides an invaluable introduction to one of the richest and most important areas of history It will be essential reading for all undergraduates and postgraduates taking courses in the history of disease and medicine and for anyone interested in how disease has shaped and has been shaped by the modern world

Life and Death in the Ancient

City of Teotihuacan Rebecca Storey, 1992-01-30 Cities arose independently in both the Old World and in the pre Columbian New World Lacking written records many of these New World cities can be studied only through archaeology including the earliest pre Columbian city Teotihuacan Mexico one of the largest cities of its time 150 B C to A D 750 Thus an important question is how similar New World cities are to their Old World counterparts Storey's research shows clearly that although Teotihuacan was a very different environment and culture from 17th century London these two great cities are comparable in terms of health problems and similar death rates

Human Evolutionary Demography

Oskar Burger, Ronald Lee, Rebecca Sear, 2024-06-14 Human evolutionary demography is an emerging field blending natural science with social science This edited volume provides a much needed interdisciplinary introduction to the field and highlights cutting edge research for interested readers and researchers in demography the evolutionary behavioural sciences biology and related disciplines By bridging the boundaries between social and biological sciences the volume stresses the importance of a unified understanding of both in order to grasp past and current demographic patterns Demographic traits and traits related to demographic outcomes including fertility and mortality rates marriage parental care menopause and cooperative behavior are subject to evolutionary processes Bringing an understanding of evolution into demography therefore incorporates valuable insights into this field just as knowledge of demography is key to understanding evolutionary processes By asking questions about old patterns from a new perspective the volume composed of contributions from established and early career academics demonstrates that a combination of social science research and evolutionary theory offers holistic understandings and approaches that benefit both fields Human Evolutionary Demography introduces an emerging field in an accessible style It is suitable for graduate courses in demography as well as upper level undergraduates Its range of research is sure to be of interest to academics working on demographic topics anthropologists sociologists demographers natural scientists working

Grave New World Stephen D. King, 2018-04-04 A controversial look at the end of globalization and what it means for prosperity peace and the global economic order Globalization long considered the best route to economic prosperity is not inevitable An approach built on the principles of free trade and since the 1980s open capital markets is beginning to fracture With disappointing growth rates across the Western world nations are no longer willing to sacrifice national interests for global growth nor are their leaders able or willing to sell the idea of pursuing a global agenda of prosperity to their citizens Combining historical analysis with current affairs economist Stephen D King provides a provocative and engaging account of why globalization is being rejected what a world ruled by rival states with conflicting aims might look like and how the pursuit of nationalist agendas could result in a race to the bottom King argues that a rejection of globalization and a return to autarky will risk economic and political conflict and he uses lessons from history to gauge how best to avoid the worst possible outcomes
