Nature God And Humanity Envisioning An Ethics Of Nature:

Nature, God and Humanity Richard L. Fern, 2002-04-04 *Nature God and Humanity* clarifies the task of forming an ethics of nature thereby empowering readers to develop their own critical faith based ethics Calling on original thought provoking analyses and arguments Richard L Fern frames a philosophical ethics of nature assesses it scientifically finds support for it in traditional biblical theism and situates it culturally Though defending the moral value of beliefs affirming the radical Otherness of God and human uniqueness this book aims not to compel the adoption of any particular ethic but rather illumine the contribution diverse forms of inquiry make to an ethics of nature How does philosophy clarify moral conviction What does science tell us about nature Why does religious faith matter Rejecting the illusion of a single rationally compelling ethics Fern answers these questions in a way that fosters both agreement and disagreement allowing those holding conflicting ethics of nature to work together for the common good

The Ethics of Nature Celia Deane-Drummond, 2008-04-15 This accessible and timely book uses a Christian perspective to explore ethical debates about nature A detailed exploration of humanity s treatment of the natural world from a Christian perspective Covers a range of ethical debates including current controversies about the environment animal rights biotechnology consciousness and cloning Sets the immediate issues in the context of underlying theological and philosophical assumptions Complex scientific issues are explained in clear student friendly language The author develops her own distinctive ethical approach centred on the practice of wisdom Discusses key figures in the field including Peter Singer Aldo Leopold Tom Regan Andrew Linzey James Lovelock Anne Primavesi Rosemary Radford Ruether and Michael Northcott The author has held academic posts in both theology and plant science The Oxford Handbook of Religion and Ecology Roger S. Gottlieb, 2006-11-09 Ecologically oriented visions of God the Sacred the Earth and human beings The proposed handbook will serve as the definitive overview of these exciting new developments Divided into three main sections the books essays will reflect the three dominant dimensions of the field Part I will explore

Improvisation Samuel Wells, 2004-09-01 In *Improvisation* Samuel Wells defines improvisation in the theater as a practice through which actors seek to develop trust in themselves and one another in order that they may conduct unscripted dramas without fear Sounds a lot like life doesn t it Building trust overcoming fear conducting relationships and making choices all without a script Wells establishes theatrical improvisation as a model for Christian ethics a matter of faithfully improvising on the Christian tradition He views the Bible not as a script but as a training school that shapes the habits and practices of the Christian community Drawing on scriptural narratives and church history Wells explains six practices that characterize both improvisation and Christian ethics His model of improvisation reinforces the goal of Christian ethics to teach Christians to embody their faith in the practices of discipleship all the time *Diversity and Dominion* Kyle S. Van Houtan, Michael S. Northcott, 2010-02-15 This book records a set of dialogues between scientists theologians and philosophers on what can be done to prevent a global slide into ecological collapse It is a uniquely multidisciplinary book that exemplifies the kinds of

cultural and scholarly dialogue urgently needed to address the threat to the earth represented by our super industrial civilization The authors debate the conventional account of nature conservation as protection from human activity In contrast to standard accounts they argue what is needed is a new relationship between human beings and the earth that recovers a primal respect for all things This approach seeks to recover forgotten resources in ancient cultures and in the foundational narratives of Western civilization contained in the Bible and in the culture of classical Greece

The Physics and Metaphysics of Transubstantiation Mark P. Fusco, 2023-08-18 In this book Mark P Fusco offers a historical philosophical and theological review and appraisal of current research into quantum post modern atheistic mathematical and philosophical theories that engage our interpretation of Hans Urs von Balthasar and Ferdinand Ulrich s accounts of Ur Kenosis This cross disciplinary approach inspires a new speculative metaphysical theory based on the representation of being as a holo somatic ontology Holocryptic metaphysics gives us a novel interpretation of transubstantiation as it is founded on the findings of quantum mechanical theory The quantum object and black hole s properties present a new way to explain physical matter based on its holographic identity This scientific theory for representing physical matter s identity is recognized for example in the symmetry existing between a subatomic particle and its orbital shell a single particle s identity in relationship to its thermodynamic system Hawking radiation and black hole entropy Further the properties of quantum non locality and teleportation signpost a new way to understand the Eternal Logos relationship to Jesus Christ and the Eucharist

The American Adrenaline Narrative Kristin J. Jacobson, 2020-06-01 The American Adrenaline Narrative considers the nature of perilous outdoor adventure tales their gendered biases and how they simultaneously promote and hinder ecological sustainability To explore these themes Kristin J Jacobson defines and compares adrenaline narratives by a range of American authors published after the first Earth Day in 1970 a time frame selected as a watershed moment for the contemporary American environmental movement The forty plus years since that day also mark the rise in the popularity and marketing of many things as extreme including sports jobs travel beverages gum makeovers laundry detergent and even the environmental movement itself Jacobson maps the American eco imagination via adrenaline narratives grounding them in the traditional literary practice of close reading analysis and in ecofeminism She surveys a range of popular and lesser known primary texts by American authors including best selling books such as Jon Krakauer s Into Thin Air and Aron Ralston s Between a Rock and a Hard Place and lesser known texts such as Patricia C McCairen s Canyon Solitude Eddy L Harris s Mississippi Solo and Stacy Allison s Beyond the Limits She also discusses such narratives as they appear in print and online articles and magazines feature length and short films television shows amateur videos social networking site posts fiction advertising and blogs Jacobson contends that these stories constitute a distinctive genre because unlike traditional nature travel and sports writing adrenaline narratives sustain heightened risk or the element of the extreme within a natural setting Additionally these narratives provide important insight into the American environmental imagination s connection to

masculinity and adventure knowledge that helps us grasp the current climate crisis and how narrative understanding provides a needed intervention

A Greener Faith Roger S. Gottlieb, 2009-10 world making political agenda that far exceeds interest group politics applied to forests and toxic incinerators Rather religious environmentalism offers an all inclusive vision of what human beings are and how we should treat each other and the rest of life Gottlieb analyzes the growing synthesis of the movement's religious social and political aspects as well as the challenges it faces in consumerism fundamentalism and globalization

Water Resources and Inter-Riparian Relations in the Nile Basin Okbazghi Yohannes, 2009-01-01 Human demand for water resources is rising at an alarming rate in response to rapid population growth rival development requirements and the depletion of ecological resources In this book Okbazghi Yohannes examines the various facets of the competition for water resources among the ten Nile River Basin countries as they compete to harness the river's resources for purposes of irrigation based agriculture and hydropower based industrialization Through a careful investigation of the rival states strategies to capture greater shares of water resources Yohannes assesses the lasting impact on the watershed ecology in the basin and on the hydrological demand of the river itself He proposes the formation of a radically different water regime to address the looming demographic crisis the stark regional food insecurity and the region's collapsing hydro ecology This book shows how the effort to construct a regional water regime cannot be separated from the necessity to construct an ecologically sustainable internal water regime in each co basin state particularly in terms of ecological resources conservation and ecosystem services protection

Nature as Spiritual Practice Steven Chase, 2011-05-17 Chase's innovative work uses a compelling blend of theological scriptural historical and cultural discussions to reclaim the role of nature in the formation of Christian spiritual and moral identity

The Oxford Handbook of Theological Ethics Gilbert Meilaender, William Werpehowski, 2005-08-25 The Oxford Handbooks series is a major new initiative in academic publishing Each volume offers an authoritative and up to date survey of original research in a particular subject area Specially commissioned essays from leading figures in the discipline give critical examinations of the progress and direction of debates The Oxford Handbook of Theological Ethics offers the most authoritative and compelling guide to the discipline Thirty of the world's most distinguished specialists provide new essays in order to offer a survey of and analysis of the subject Ethics is first placed firmly within the Christian theological tradition from which thought and action can never be neatly separated Four sections then explore the sources of Christian moral knowledge scripture divine commands church tradition reason and natural law experience the structure of the Christian life vocation virtue rules responsibility death the spirit of the Christian life faith hope love and the spheres of the Christian life government family economy culture church The final section of the Handbook contains essays discussing and evaluating certain scholarly works that have in the past influentially offered different visions of how best to structure the field of theological ethics Unlike any other book now available the Handbook's unrivalled breadth and depth make it the definitive reference work for all students

and academics who want to explore more fully essential topics in Christian ethics **Spirit and Nature** Timothy Hessel-Robinson, Ray Maria McNamara, 2011-08-01 Spirit and Nature is a collection of essays exploring how the resources of Christian spirituality can inform the practice of a more ecologically sustainable faith Our current ecological situation calls for people of religious faith to reexamine the way they envision the practice of spirituality As environmental ethicists have called us to reconsider the human Earth relationship so that the planet is not seen as simply an endless supply of resources to fill human wants and needs so these essays call us to reconsider spiritual practice as it relates to Earth s ecology Rather than viewing spirituality as an escape from the material world the authors describe the embodiment of the God quest within the human nature relationship Drawing on diverse disciplinary perspectives these essays examine a variety of topics including the relationship between Earth and humans in the Bible the role of nature s beauty in Christian spirituality the practice of Christian discernment and contemplation in light of the natural sciences the role of nature in liturgical prayer and others These essays consider how scholarship in Christian spirituality can contribute to re imaging faith in ways that better cherish the Earth s fragile beauty *IBSS: Sociology: 2002 Vol.52* Compiled by the British Library of Political and Economic Science, 2004-03-01 First published in 1952 the International Bibliography of the Social Sciences anthropology economics political science and sociology is well established as a major bibliographic reference for students researchers and librarians in the social sciences worldwide Key features Authority Rigorous standards are applied to make the IBSS the most authoritative selective bibliography ever produced Articles and books are selected on merit by some of the world s most expert librarians and academics Breadth today the IBSS covers over 2000 journals more than any other comparable resource The latest monograph publications are also included International Coverage the IBSS reviews scholarship published in over 30 languages including publications from Eastern Europe and the developing world User friendly organization all non English titles are word sections Extensive author subject and place name indexes are provided in both English and French Place your standing order now for the 2002 volumes of the the IBSS Anthropology 2002 Vol 48 December 2003 234x156 Hb 0 415 32634 6 195 00 Economics 2002 Vol 51 December 2003 234x156 Hb 0 415 32635 4 195 00 Political Science 2002 Vol 51 December 2003 234x156 Hb 0 415 32636 2 195 00 Sociology 2002 Vol 52 December 2003 234x156 Hb 0 415 32637 0 195 00
