New Dialectics And Political Economy:

New Dialectics and Political Economy R. Albritton, J. Simoulidis, 2002-11-29 Many of the leading thinkers on dialectics in the Marxian tradition have collaborated here to put forward and debate challenging new perspectives on the nature and importance of dialectics The issues dealt with range from the philosophical consideration of the precise nature of dialectical reasoning to dialectics and economic theory and to more concrete concerns such as how dialectics can help us think about globalization freedom inflation and subjectivity

New Dialectics and Political Economy, 2002 Many of the leading thinkers on dialectics in the Marxian tradition have collaborated here to put forward and debate challenging new perspectives on the nature and importance of dialectics The issues dealt with range from the philosophical consideration of the precise nature of dialectical reasoning to dialectics and economic theory and to more concrete concerns such as how dialectics can help us think about globalization freedom inflation and subjectivity *Capitalism and the Dialectic* John Bell, 2009-10-15 An introduction and exposition to the Uno approach of Marx's work

Dialectics and Deconstruction in Political Economy R. Albritton, 1999-06-08 Robert Albritton offers the most authoritative reassessment of Marxist political economy since Althusser Original reinterpretations of thinkers including Hegel Weber Althusser Derrida and Adorno cast new light on heated battles between Hegelian dialectics and deconstructivist criticism The book makes accessible the sometimes daunting thought associated with both dialectics and deconstruction drawing upon insights from philosophy sociology political science and critical theory Finding a non essentialist way of using the immense cognitive power of dialectics accepting a limited deconstruction but challenging further deconstructionist directions represents a major breakthrough for political economy

The New Dialectic and Marx's Capital Chris Arthur, 2021-08-04 This book argues that the dialectic of Marx's Capital has a systematic rather than historical character It sheds new light on Marx's great work while going beyond it in many respects

Political Economy and Global Capitalism Robert Albritton, Bob Jessop, Richard Westra, 2010 This volume brings together original and timely writings by internationally renowned scholars that reflect on the current trajectories of global capitalism and in the light of these consider likely possible or desirable futures It offers theory informed writing that contextualizes empirical research on current world historic events and trends with an eye towards realizing a future of human social and economic betterment

Political Economy and Globalization Richard Westra, 2009-09-30 This book provides an analysis of capitalism's world historic phases of development a critique of the globalization literature and a re examination of Marxian debates over the rise of capitalism

Economics Transformed Robert Albritton, 2007-05-20 Is Marx relevant Bringing to life the classic concepts in Marx's economic thought Robert Albritton shows that he offers great potential for study Deeply critical of the way economics is taught and studied today this is a textbook that will appeal to anyone who wants a forward thinking approach to the discipline that's free from the constraints of neo classical orthodoxy Taking up key aspects of Marx's work including surplus value theory dialectical

reasoning and the commodity form Albritton highlights their relevance in the modern world and explains why mainstream economics has been so blind to their revolutionary potential Written with style and clarity it is perfect for economics undergraduates The Political Economy of Digital Monopolies Paško Bilić,Toni Prug,Mislav Žitko,2021-07-16 At a time when the practices of technology companies continue to attract fierce criticism this book asks what it actually means to hold a monopoly in the tech world and how it might affect the way in which an organization operates Combining new and traditional Marxian perspectives the authors offer an in depth analysis of how these technology giants are produced financialized and regulated As technology firms continue to shape our political and socio economic landscape this book will be an invaluable resource for scholars and students who seek to understand the function of technological monopolies in contemporary capitalism **Against the Crisis** Ståle Holgersen,2024-11-26 If crisis defines our era we need a coherent socialist policy in response Stle Holgersen delves into today s economic and ecological crises to demonstrate that they are not exceptions to an otherwise functioning system but integral to its operation It is naive to see these upheavals as opportunities for reform or revolution They are the bedrock of the status quo Fortunately the vicious circle sustaining capitalism is not founded on an iron law Our historical mission in the face of the climate crisis is to create a historical exception to the rule It is time for ecosocialism against crisis **Nietzsche's Political Economy** Dmitri G. Safronov,2023-08-21 Safronov s Nietzsche s Political Economy is a pioneering appraisal of Nietzsche s critique of industrial culture and its unfolding crisis The author contends that Nietzsche remains unique in conceptualizing the upheavals of modern political economy in terms of the crisis of its governing values Nietzsche scrutinises the norms which not only preside over the unfathomable build up in debt the proliferation of meaningless impersonal slavery and the rise of increasingly repressive social control systems but inevitably set these precarious tendencies of modern political economy on a collision course liable to culminate in an unprecedented human and environmental catastrophe Safronov explores the core themes of Nietzsche s political economy debt slavery and the division of labour with reference to the influential views of Adam Smith and Karl Marx as well as against the backdrop of the Long Depression 1873 1896 the first truly international crisis of industrial capitalism during which most of Nietzsche s work was completed In Nietzsche s assessment modern political economy is predicated on the valuations that diminish humankind s prospects and harm the planet s future by consistently enfeebling the present as long as there is profit to be made from it Nietzsche s critical insight which challenges the most fundamental tenet of modern economics and finance is that in order to build a stronger and intrinsically more valuable future in lieu of simply speculating on it as though the liberal Promised Land could descend upon us like the manna from heaven at the wave of an invisible hand of the market it is necessary to walk from the future we dare to envisage resolutely back to the present we inhabit to determine what demands achieving such a vision would impose upon us instead of embellishing the here and now by cynically discounting the future to the net value of the present while disparaging

disowning and rewriting the past to unburden ourselves of its troubling legacy as we continue to frivolously squander its capital to the alluring tunes of the sirens who in the marketplace sing to us of the future The enabling mechanism for changing our valuing perspectives Nietzsche tells us lies dormant in us and it must be unlocked before it is too late Exit from Globalization Richard Westra, 2014-10-24 Exit from Globalization moves from theory to practice from questions of where incorrigible knowledge of substantive economic life derives and how that knowledge is put towards making a progressive redistributive eco sustainable future of human flourishing Westra discards at the outset views that the root of current economic ills is the old devil we know capitalism Rather he maintains the neoliberal decades spawned a Merchant of Venice economic excrescence bent upon expropriation and rent seeking which will scrape all the flesh from the bones of humanity if not stopped dead in its tracks En route to providing a viable design for the human future in line with transformatory demands of socialists and Greens Westra exorcizes both Soviet demons and ghosts of neoliberal ideologues past which lent support to the position that there is no alternative to the market Exit from Globalization shows in a clear and compelling fashion that while debates over the possibility of another potentially socialist world swirl around this or that grand society wide scheme the fact is that creative future directed thinking has at its disposal several economic principles that transformatory actors may choose from and combine in various ways to remake human economic life The book concludes with an examination of the various social constituencies currently supporting radical change and explores the narrowing pathways to bring change about **The Future of Capitalism After the Financial Crisis** Richard Westra, Dennis Badeen, Robert

Albritton, 2014-12-17 The Future of Capitalism After the Financial Crisis The Varieties of Capitalism Debate in the Age of Austerity contains thirteen world leading political economists writing from within eight different countries who critically analyze the current crisis tendencies of capitalism both globally and in particular countries Given the likelihood of an increasingly crisis prone future for capitalism it is important not only to rethink capitalism in its current manifestations or varieties It is also important to rethink research methods and conceptual frameworks in preparation for understanding an increasingly rocky future in which capitalism itself could go the way of the many species that in the past were endangered only to become extinct More and more titles of books and articles are suggesting that capitalism or perhaps civilization itself is endangered if we do not make radical changes in the near future This book breaks with academic path dependency and attempts to open new vistas of political economy and of multidisciplinary analysis that are crucially important if our thought processes are to be effective in a world in jeopardy The varieties of capitalism VoC debate itself came into being as the Soviet Union unraveled It drew in scholarship from a cross section of Marxian and heterodox political economy The key argument of VoC was that if capitalism was the only global option then those on the Left must get involved in policy discussions on how capitalist economies can be fashioned to become competitive as well as progressive However the financial crisis has seen policy across the advanced economies veer toward competitiveness coupled with austerity The lesson for the Left is that

alternatives to capitalism must be sought in the here and now **From Political Economy to Economics** Dimitris Milonakis, Ben Fine, 2009-01-13 Economics has become a monolithic science variously described as formalistic and autistic with neoclassical orthodoxy reigning supreme So argue Dimitris Milonakis and Ben Fine in this new major work of critical recollection The authors show how economics was once rich diverse multidimensional and pluralistic and unravel the processes that lead to orthodoxy's current predicament The book details how political economy became economics through the desocialisation and the dehistoricisation of the dismal science accompanied by the separation of economics from the other social sciences especially economic history and sociology It is argued that recent attempts from within economics to address the social and the historical have failed to acknowledge long standing debates amongst economists historians and other social scientists This has resulted in an impoverished historical and social content within mainstream economics The book ranges over the shifting role of the historical and the social in economic theory the shifting boundaries between the economic and the non economic all within a methodological context Schools of thought and individuals that have been neglected or marginalised are treated in full including classical political economy and Marx the German and British historical schools American institutionalism Weber and Schumpeter and their programme of Social konomik and the Austrian school At the same time developments within the mainstream tradition from marginalism through Marshall and Keynes to general equilibrium theory are also scrutinised and the clashes between the various camps from the famous Methodenstreit to the fierce debates of the 1930s and beyond brought to the fore The prime rationale underpinning this account drawn from the past is to put the case for political economy back on the agenda This is done by treating economics as a social science once again rather than as a positive science as has been the inclination since the time of Jevons and Walras It involves transcending the boundaries of the social sciences but in a particular way that is in exactly the opposite direction now being taken by economics imperialism Drawing on the rich traditions of the past the reintroduction and full incorporation of the social and the historical into the main corpus of political economy will be possible in the future *Globalization and Capitalist Geopolitics* Daniel Woodley, 2017-11-27 Globalization and Capitalist Geopolitics is concerned with the nature of corporate power against the backdrop of the decline of the West and the struggle by non western states to challenge and overcome domination of the rest of the world by the West This book argues that although the US continues to preside over a quasi imperial system of power based on global military preponderance and financial statecraft and remains reluctant to recognize the realities global economic convergence the age of imperial state hegemony is giving way to a new international order characterized by capitalist sovereignty and competition between regional and transnational concentrations of economic power This title seeks to interrogate the structure of world order by examining leading approaches to globalization and political economy in international relations and international political economy Breaking with the classical school Woodley argues that geopolitics should be understood as a transnational strategic practice employed by powerful state actors which

mirrors predatory corporate rivalry for control over global resources and markets reproducing the structural conditions for corporate power through the transnational state form of capital In a period of increasing geopolitical insecurity and economic instability this title provides an authoritative yet accessible commentary on debates on capitalism and globalization in the wake of the financial crisis It is valuable resource for students and scholars seeking to develop a deeper understanding of the historical determinants of the changing dynamics of neoliberal capitalism and their implications for world order

Revitalizing Causality Ruth Groff, 2007-12-18 This cutting edge collection of new and previously published articles by philosophers and social scientists addresses just what it means to invoke causal mechanisms or powers in the context of offering a causal explanation A unique collection it offers the reader various disciplinary and inter disciplinary divides helping to stake out a new neo Aristotelian position within contemporary debate *Planetary Mine* Martín

Arboleda, 2020-01-14 *Planetary Mine* rethinks the politics and territoriality of resource extraction especially as the mining industry becomes reorganized in the form of logistical networks and East Asian economies emerge as the new pivot of the capitalist world system Through an exploration of the ways in which mines in the Atacama Desert of Chile the driest in the world have become intermingled with an expanding constellation of megacities ports banks and factories across East Asia the book rethinks uneven geographical development in the era of supply chain capitalism Arguing that extraction entails much more than the mere spatiality of mine shafts and pits *Planetary Mine* points towards the expanding webs of infrastructure of labor of finance and of struggle that drive resource based industries in the twenty first century *Constructing Change: A*

Political Economy of Housing and Electricity Provision in Turkey Ezgi B. Ünsal, 2021-07-05 In *Constructing Change* Ezgi B Unsal provides a political economy of electricity and housing provision in Turkey By using the case studies of electricity and housing in Turkey the book explores how social provision is increasingly commodified across the globe as a defining feature of financialisation Distinguishing this trend from macroeconomic definitions of financialisation the book offers a contextual narrative of economic change in Turkey with undetermined macroeconomic outcomes It contributes to the literature on the financialisation of social provision and the political economy of Turkey by confirming the increasing influence of finance on social provision sectors making them prone to volatility while contributing to their growth at the same time **Economics,**

Science and Capitalism Richard Westra, 2021-12-19 Various strains of heterodox economics have sought and largely failed to dismount orthodoxy from its dominant position This book critiques the critics explaining why heterodox economics challenges have faltered and then presents a coherent alternative paradigm of its own This simultaneously exposes the vacuousness of neoclassical economics the limitations of heterodox critique and the subverting of Karl Marx s revolutionary economic thought by his own disciples The book draws in particular on two key intellectual traditions in making its arguments critical realism and Marxism From the refounding of critical realist philosophy of science in the hands of Roy Bhaskar emphasis is placed upon the position that the ontological nature of the object of study determines the form of its

possible science However in their theoretical constructions neither orthodox economics nor heterodox economics problematizes the unique ontology of capitalism to the detriment of knowledge about the social world The book maintains that a century of misthinking over Marx s corpus has resulted in a missed opportunity to construct a paradigmatic alternative to orthodox economics Drawing upon the tradition of the Japanese Uno approach to Marxism and supported by Bhaskar s development of critical realism as underlaborer for science the book defends Marx s writing in his monumental Capital as founding an economic science adequate to its ontological object of study It then elaborates upon how Marxian economic theory exposes the hidden scourges of capitalism and what is required to unleash the potential of this theory for comprehensive analysis of capitalist vicissitudes the study of economic life in precapitalist societies and the design of a desperately needed postcapitalist social order Broadening its appeal as it sets out to reclaim Marx s revolutionary legacy this original volume critically traverses writings in mainstream and heterodox economics cutting edge philosophy of science and Marxian political economy and introduces readers to a reconstruction of Marx s Capital engineered in Japan This provocative book is essential reading for everyone interested in heterodox economics critical realism Marxian economics and critiques of capitalism

The Dialectics of Liberty Chris Matthew Sciabarra, Edward W. Younkins, Roger E. Bissell, 2019-06-04 This collection of essays explores the ways in which the defense of liberty can be bolstered by use of a dialectical method that is a mode of analysis devoted to grasping the full context of philosophical cultural and social factors requisite to the sustenance of human freedom Its strength lies in the variety of disciplines and perspectives represented by contributors who apply explicitly dialectical tools to a classical liberal libertarian analysis of social and cultural issues In its conjoining of a dialectical method typically associated with the socialist left to a defense of individual liberty typically associated with the libertarian right this anthology challenges contemporary attitudes on both ends of the political spectrum Though this conjunction of dialectics and liberty has been explored before in several works including a trilogy of books written by one of our coeditors Chris Matthew Sciabarra this volume will be the first one of its kind to bring together accomplished scholars in political science economics philosophy aesthetics psychology law history education and rhetoric
