Communication, Commerce and Power Edward A. Comor,2016-01-06 In this history of US based direct broadcast satellite developments the United States and other nation states are shown to be the ultimate arbiters of their ongoing histories In making this now unfashionable argument Edward A Comor directly challenges recent academic work that tends to privilege global processes over national and argues that the contemporary world order is being shaped primarily by transnational rather than nation state based forces In testing this orientation with empirical research on US foreign communication policy since 1960 Communication Commerce and Power compels academics and policy makers to rethink commonplace assumptions about the characteristics and potentials of the contemporary and future international political economy **The**

Paul E. Teske,2014-03-18 During this era of construction of the information superhighway this volume presents a prudent analysis of the pros and cons of continuing state regulation of telecommunications While interested parties either attack or defend state regulation careful scholarly analysis is required to strike the appropriate balance of regulatory federalism Focusing on regulation in the 1990s it uses a positive political economy perspective to analyze enduring state federal conflicts and to weigh the justifications and explanations for continuing state telecommunications regulation or for changing its structure It also considers normative concerns and makes recommendations about how to improve telecommunications policy Seriously concerned with assessing the problems surrounding cost burdens for different categories of consumers market entry for different firms economic growth and the information infrastructure global competitiveness and control over information this volume attempts to provide answers to the following specific questions How are states regulating telecommunications in the brave new world of global markets fiber optics and digital technology Do states vary significantly in their regulatory models How are the politics of state and federal regulation different Would a different federal state relationship better serve national telecommunications goals in the future To tackle these critical questions the scholarly perspectives of economists lawyers political scientists and telecommunications consultants and practitioners are employed

Public Regulation of Site Selection for Nuclear Power Plants Ernest D. Klema,Robert L. West,2016-03-17 Public regulation of site selection for nuclear power plants is woven into the fabric of the distinctively American experience in

exercising government control over privately owned public utilities Originally published in 1977 the authors have identified the various dimensions of public concern with the selection of new nuclear power sites This volume divided into four parts explores the complex issues at the heart of American nuclear power Part I contains literature which describes the process of power plant siting as conducted by the utilities Part II contains studies and reports on the structure and process of public regulation Part III describes local government State and other Federal agency regulation of siting and finally Part IV cites selected proposals and analyses of recommendations for regulatory reform This is a valuable resource for any student interested in environmental studies and public policy reform **Telecommunications Update** ,1989 **Communication**

Design Rules, Volume 2 Carliss Y. Baldwin,2024-12-17 How the innate physical properties of different technologies influence the strategy and structure of the organizations implementing the technologies the sequel to Design Rules The Power of Modularity In Design Rules volume 2 Carliss Baldwin offers a comprehensive view of the digital economy by putting forth an original theory that explains how technology shapes organizations in a market economy The theory claims that complementarities arising from the physical nature of technologies can be arrayed on a spectrum ranging from strong to very weak Two basic types of technologies in turn exhibit different degrees of complementarity between their internal components Flow production technologies which are found in steel mills and auto factories specify a series of steps each of which is essential to the final product In contrast platform technologies which are characteristic of computer hardware software and networks are modular systems designed to provide options Baldwin then investigates the dynamics of strategy for firms in platform ecosystems Such firms create value by solving technical bottlenecks technical barriers to performance that arise in

different parts of the system as it evolves They capture value by controlling and defending strategic bottlenecks components that are 1 essential to the functioning of some part of the system 2 unique and 3 controlled by a profit seeking enterprise Strategic bottlenecks can be acquired by solving technical bottlenecks They can be destroyed via tactics such as substitution reverse engineering bypassing the bottleneck and enveloping a smaller bottleneck within a larger one Strategy in platform ecosystems can thus be viewed as the effective management of technical and strategic bottlenecks within a modular technical system

Leapfrogging Development? J. P. Singh, 1999-07-27 Examines how developing countries have restructured their telecommunications in order to leapfrog or accelerate development

Developing Countries and Preferential Services Trade Charlotte Sieber-Gasser, 2016-07-21 WTO law sets the global minimum standards for trade regulation while allowing some regulatory flexibility for developing countries The exact scope of regulatory flexibility is often unclear and at times flexibility may be counterproductive to sustainable economic growth in developing countries Undisputedly developing countries would have some flexibility with respect to tailoring preferential services trade agreements to their individual economic needs and circumstances but empirical data from over 280 preferential services trade agreements worldwide shows that this flexibility is rarely used This volume clarifies the regulatory scope of flexibility for preferential services trade agreements between developing countries by linking the legal interpretation of WTO law with evidence from research in economics and political sciences The book suggests that the current regulatory framework leaves room for meaningful flexibility for developing countries and encourages policymakers and scholars to take these flexibilities into consideration in their design and study of trade policies
