New Directions in Economic Geography B. Fingleton, 2007-01-01 This book is a serious attempt to cover all of the relevant subdisciplines in the geographical economics framework I would recommend the book to students of economic geography regional economics and related disciplines Frans Boekema Journal of Regional Science this book is empirically and theoretically comprehensive in its scope The nearly eighteen authors who have contributed to this book present a truly transatlantic perspective on NEG this volume will be extremely useful to those dealing with rigorous modelling to examine spatial issues in economics geography and planning Rajiv Thakur Regional Science Policy and Practice I recommend the book The papers of a high quality well written and organized empirical analyses are based on the most advanced empirical techniques and the reader enjoys their application Roberta Capello Growth and Change A very interesting volume indeed recommended reading for everyone interested in theorizing space in economics or working in the empirical spatial economic research arena Economic Geography Research Group This important book explores original and alternative directions for economic geography following the revolution precipitated by the advent of so called new economic geography NEG Whilst to some extent the volume could be regarded as part of the inevitable creative destruction of NEG

theory it does promote the continuing role of theoretical and empirical contributions within spatial economic analysis in which the rationale of scientific analysis and economic logic maintain a central place With contributions from leading experts in the field the book presents a comprehensive analysis of the extent to which NEG theory is supported in the real world By exploring whether NEG theory can be effectively applied to provide practical insights the authors highlight novel approaches emerging trends and promising new lines of enquiry in the wake of advances made by NEG Rigorous yet engaging this book will be an essential tool for academics and researchers specialising in regional studies urban and spatial economics and economic geography It will also have widespread appeal amongst policymakers involved in planning and land use

The Monopolistic Competition Revolution in Retrospect Steven

Brakman,Ben J. Heijdra,2001-01-05 In 1977 a seminal paper was published by Avinash Dixit and Joseph Stiglitz that revolutionized the modeling of imperfectly competitive markets It launched what might be called the second monopolistic competition revolution which has been far more successful than the first one initiated by Edward Chamberlin and Joan Robinson in the 1930s In this 2003 collection of essays experts in the fields of macroeconomics international trade theory economic geography and international growth theory address the question of why the second revolution was so successful They also highlight what is missing and look forward to the next step in the modeling of imperfectly competitive markets The text includes a comprehensive survey of both monopolistic competition revolutions and previously unpublished working papers by Dixit and Stiglitz that led to their famous 1977 paper With contributions from Dixit Ethier Neary and Stiglitz amongst others this collection will excite interest amongst researchers advanced students and economists

The Reformability of China's State Sector Guanzhong James Wen,Dianqing Xu,1997 China has achieved alarming success in accelerating the economic growth rate since it started economic reform about 16 years ago However its state sector is still running severe deficits Even though its productivity might be improved since the reform started its financial situation nevertheless has been worsening mainly as a result of increased competition from the rapidly expanding non state sector Therefore the reform of this sector has become an urgent problem All the papers collected in this book are closely related to the various issues that the reform of the state sector has to solve Among the contributors are Professor Merton H Miller a Nobel laureate and expert on firm finance and governauce Mr Ji Lin the vice president of the Chinese Academy of Social Sciences Dr Justin Y Lin the director of Center of China s Economic Research at Beijing University Professor Gang Fan the well known Chinese Economist and vice director of the Institute of Economic Research at the Chinese Academy of Social Sciences Professor Guoqiang Tian an expert on mechanism design at Texas A M University and many other researchers and

professors from China and the North America s research institutes and universities Therefore this book will be extremely useful and relevant to those economists as well as government decision makers working in the field of the transitional economy

From Neighborhoods to Nations Yannis Ioannides,2013 Just as we learn from influence and are influenced by others our social interactions drive economic growth in cities regions and nations determining where households live how children learn and what cities and firms produce *From Neighborhoods to Nations* synthesizes the recent economics of social interactions for anyone seeking to understand the contributions of this important area Integrating theory and empirics Yannis Ioannides explores theoretical and empirical tools that economists use to investigate social interactions and he shows how a familiarity with these tools is essential for interpreting findings The book makes work in the economics of social interactions accessible to other social scientists including sociologists political scientists and urban planning and policy researchers Focusing on individual and household location decisions in the presence of interactions Ioannides shows how research on cities and neighborhoods can explain communities composition and spatial form as well as changes in productivity industrial specialization urban expansion and national growth The author examines how researchers address the challenge of separating personal social and cultural forces from economic ones Ioannides provides a toolkit for the next generation of inquiry and he argues that quantifying the impact of social interactions in specific contexts is essential for grasping their scope and use in informing policy Revealing how empirical work on social interactions enriches our understanding of cities as engines of innovation and economic growth *From Neighborhoods to Nations* carries ramifications throughout the social sciences and beyond
