New Essays on Semantic Externalism and Self-Knowledge Susana Nuccetelli, 2003-04 *New Essays on Semantic Externalism and Self-knowledge* Susana Nuccetelli, 2003 Essays on the consequences of semantic externalism for knowledge of mind and the empirical world and for our understanding of transmission of epistemic warrant by inference

Externalism, Self-Knowledge, and Skepticism Sanford Goldberg, 2015-08-21 This collection of new essays explores the implications of semantic externalism for self knowledge and skepticism *Externalism, Self-Knowledge, and Skepticism* Sanford C. Goldberg, 2015 This collection of new essays explores the implications of semantic externalism for self knowledge and skepticism *Semantic Externalism* Jesper Kallestrup, 2013-03 Semantic externalism is the view that the meanings of referring terms and the contents of beliefs that are expressed by those terms are not fully determined by factors internal to the speaker but are instead bound up with the environment The debate about semantic externalism is one of the most important but difficult topics in philosophy of mind and language and has consequences for our understanding of the role of social institutions and the physical environment in constituting language and the mind In this long needed book Jesper Kallestrup provides an invaluable map of the problem Beginning with a thorough introduction to the theories of descriptivism and referentialism and the work of Frege and Kripke Kallestrup moves on to analyse Putnam s Twin Earth argument Burge s arthritis argument and Davidson s Swampman argument He also discusses how semantic externalism is at the heart of important topics such as indexical thoughts epistemological skepticism self knowledge and mental causation Including chapter summaries a glossary of terms and an annotated guide to further reading *Semantic Externalism* an ideal guide for students studying philosophy of language and philosophy of mind **Internalism and Externalism in Semantics and Epistemology** Sanford C. Goldberg, 2007-10-11 To what extent are meaning on the one hand and knowledge on the other determined by aspects of the outside world *Internalism and Externalism in Semantics and Epistemology* presents twelve specially written essays exploring these debates in metaphysics and epistemology and the connections between them In so doing it examines how issues connected with the nature of mind and language bear on issues about the nature of knowledge and justification and vice versa Topics discussed include the compatibility of semantic externalism and epistemic internalism the variety of internalist and externalist positions both semantic and epistemic semantic externalism s implications for the epistemology of reasoning and reflection and the possibility of arguments from the theory of mental content to the theory of epistemic justification and vice versa *Essays on Skepticism* Anthony Brueckner, 2010-08-19 Anthony Brueckner is recognized as one of the leading contemporary investigators of the problem of skepticism This collection brings together Brueckner s most important work in this area providing a connected and comprehensive guide to the complex state of play on this intensively studied area of philosophy *Transparency and Self-Knowledge* Alex Byrne, 2018-04-13 Alex Byrne sets out and defends a theory of self knowledge knowledge of one s mental states Inspired by Gareth Evans discussion of self

knowledge in his *The Varieties of Reference* the basic idea is that one comes to know that one is in a mental state M by an inference from a worldly or environmental premise to the conclusion that one is in M Typically the worldly premise will not be about anything mental The mind on this account is transparent self knowledge is achieved by an outward glance at the corresponding tract of the world not by an inward glance at one's own mind Belief is the clearest case with the inference being from p to I believe that p One serious problem with this idea is that the inference seems terrible because p is at best very weak evidence that one believes that p Another is that the idea seems not to generalize For example what is the worldly premise corresponding to I intend to do this or I feel a pain Byrne argues that both problems can be solved and explains how the account covers perception sensation desire intention emotion memory imagination and thought The result is a unified theory of self knowledge that explains the epistemic security of beliefs about one's mental states privileged access as well as the fact that one has a special first person way of knowing about one's mental states peculiar access

Language and scientific explanation Eran Asoulin, This book discusses the two main construals of the explanatory goals of semantic theories The first externalist conception understands semantic theories in terms of a hermeneutic and interpretive explanatory project The second internalist conception understands semantic theories in terms of the psychological mechanisms in virtue of which meanings are generated It is argued that a fruitful scientific explanation is one that aims to uncover the underlying mechanisms in virtue of which the observable phenomena are made possible and that a scientific semantics should be doing just that If this is the case then a scientific semantics is unlikely to be externalist for reasons having to do with the subject matter and form of externalist theories It is argued that semantics construed hermeneutically is nevertheless a valuable explanatory project

The Epistemology of Belief H. Vahid, 2008-10-24 This book offers a challenge to certain epistemic features of belief resulting in a unified and coherent picture of the epistemology of belief The author examines current ideas in a number of areas beginning with the truth directed nature of belief in the context of the so called Moore s paradoxes He then investigates the sensitivity of beliefs to evidence by exploring how sensory experiences can confer justifications on the beliefs they give rise to and provides an account of the basing relation problem The consequences of these arguments are carefully considered particularly the issues involving the problem of easy knowledge and warrant transmission Finally he focuses on the purported fallibility of beliefs and our knowledge of their contents arguing that the fallible infallible distinction is best understood in terms of externalist internalist conceptions of knowledge and that the thesis of content externalism does not threaten the privileged character of self knowledge
