Trundle, 2019-02-14 This book is of vital interest to anyone who yearns to know how science theology ethics art and politics do really afford objective truths Not only that but how these truths in seemingly clashing areas are interrelated by common sense and rooted in our incontrovertible consciousness of Being itself Being itself as the basis for truth is defended against truth denying modern philosophers who having headed in the wrong direction with tragic costs of murderous ideologies have completely misunderstood the simple origin of truth in the realist tradition of Aristotle Aquinas Etienne Gilson and others Their profoundness is not bamboozled by the covert and corrupting sophism of today s teachings Anyone interested in surmounting

these teachings that include political correctness and a false divide of fact from value which paralyze the very modern ethics that helped to create them should read this book The book reveals how ethics art and politics can be as true as the sciences that inform them

explores the three relationships between the government and market between reform and rule of law and between the constitution and economic law On this basis it subsequently focuses on development theory distribution theory risk theory and crisis theory Further it addresses effective development fair distribution and prevention and resolution of related risks and crises which are important functions of economic law In order to achieve the above functions and objectives the book argues we must vigorously promote the integration of rule of law in economic law and constantly refine the theory of economic rule of law employed in China The book demonstrates that no matter how the three major relationships are adjusted or the relevant systems are reformed i e regarding the implementation of the concept of coordinated development or the optimization of economic structures the solution of distribution problems or the improvement of distribution systems the prevention of risks or the response to crises any such changes depend on economic rule of law The above mentioned theoretical discussion presents a new horizon of contemporary Chinese economic law theory which will be of great value to the future development of economic law theory

Dilemmas of the New World : Man's Search For Himself In The New World Serol Aksel,2024-09-15 The term New world carries multiple connotations While it traditionally denotes newly discovered territories such as the American continent in this context it signifies the profound and transformative shift that the world has undergone over the past three centuries This shift which finds its roots in the Enlightenment and modernity began to manifest itself more prominently after the First World War While this transformation is often equated with globalization its origins can be traced back to the era of industrialization and the rise of nation states which set the stage for subsequent global shifts Dilemma is a subject of logic but it is also used in daily life In daily use it often evokes contradictory situations It is expected to correspond to inextricable knotted cyclical situations What I mean by the dilemmas of the new world is the social order and view of the universe that humanity has lived in since the age of curiosity that is from the middle of the 18th century to the present day at least ten thousand years since the world transitioned to agricultural society the fact that the understanding of morality and most importantly the meaning it attributes to its existence have brought with them insurmountable problems despite the changes in direction While this new era was a game changer on the one hand on the other hand the meaning that man attributed to himself in every new thing he discovered with the development of science and technology was shaken Existentialism emerged as a result of this new state of thinking While the new attribution of meaning isolated man on the one hand on the other hand nation states consisting of human communities gathered around a common ideal were established Individual freedoms and gathering around a common goal became in conflict at some points While humanism the most crucial emphasis of the Enlightenment glorified human beings on the one hand on the other hand there were significant obstacles to free thought On the other hand while the religious sentiments to which human beings were attached to give meaning to their existence were shaken new meanings could not be found to replace them While observations and findings show that the earth is far beyond the centre of the universe the discovery that man is descended

from animals has deeply affected religious beliefs at least by the world of science and people who believe in the guidance of science For man who had to somehow hold on to life these new teachings could not offer him any In this state the world needed new motives and new beliefs At this very stage capitalism came to the rescue of humanity The new system which pushed man to become a commodity owner did not give him time to question himself *A Historical-developmental Study of Classical Indian Philosophy of Morals* Rajendra Prasad,2009 Contributed articles
