New Idols Of The Cave On The Limits Of Anti Realism:

New Idols of the Cave Christopher Norris, 1997 This book offers a broad based critical survey of recent anti realist arguments in the philosophy of science cultural theory hermeneutics the sociology of knowledge and the interpretation of quantum mechanics

God, the Mind's Desire Paul D. Janz, 2004-05-06 This 2004 book reconfigures the basic problem of Christian thinking How can human discourse refer meaningfully to a transcendent God as a twofold demand for integrity integrity of reason and integrity of transcendence Centring around a provocative yet penetratingly faithful re reading of Kant's empirical realism and drawing on an impelling confluence of contemporary thinkers including MacKinnon Bonhoeffer Marion Putnam Nagel Paul D Janz argues that theology's referent must be located within present empirical reality Rigorously reasoned yet refreshingly accessible throughout this book provides an important attentively informed alternative to the growing trends toward obscurantism radicalization and anti reason in many recent assessments of theological cognition while remaining equally alert to the hazards of traditional metaphysics In the book's culmination epistemology and Christology converge around problems of noetic authority and orthodoxy with a kind of innovation depth and straightforwardness that readers of theology at all levels of philosophical acquaintance will find illuminating

The New Utopian Politics of Ursula K. Le Guin's *The Dispossessed* Laurence Davis, Peter G. Stillman, 2005-01-01 The *Dispossessed* has been described by political thinker Andre Gorz as The most striking description I know of the seductions and snares of self managed communist or in other words anarchist society To date however the radical social cultural and political ramifications of Le Guin's multiple award winning novel remain woefully under explored Editors Laurence Davis and Peter Stillman right this state of affairs in the first ever collection of original essays devoted to Le Guin's novel Among the topics covered in this wide ranging international and interdisciplinary collection are the anarchist ecological post consumerist temporal revolutionary and open ended utopian politics of *The Dispossessed* The book concludes with an essay by Le Guin written specially for this volume in which she reassesses the novel in light of the development of her own thinking over the past 30 years

Re-Thinking the Cogito Christopher Norris, 2010-08-12 *Re Thinking the Cogito* seeks to combine a strongly naturalistic with a distinctively rationalist perspective on some nowadays much discussed issues in philosophy of mind Against the common view that they involve downright incompatible conceptions of mind knowledge and ethics it seeks to unite a naturalism that draws on recent advances in neurophysiology and cognitive science with an outlook that gives full weight to those normative values at the heart of rationalist thought True to the book's constructive spirit Norris offers various detailed proposals for bringing the two approaches into a mutually enhancing though also mutually provocative relationship He finds that claim strikingly prefigured in Spinoza's working out of a non reductive yet metaphysically uncompromising mind body monism Moreover he suggests how a thoroughly naturalised approach might yet become a locus of productive engagement with the work of an ultra rationalist thinker such as Alain Badiou Thus Norris puts the case that

physically embodied human thought has cognitive intellectual and creative powers that cannot and need not be accounted for in terms of conscious let alone self conscious reflection **Deconstruction and the 'Unfinished Project of Modernity'**

Christopher Norris,2020-11-25 Through a close engagement with some key thinkers Norris argues that deconstruction is part of the unfinished project of modernity a project whose interest and values it upholds by continuing to question them in a spirit of enlightened self critical inquiry **Realism Discourse and Deconstruction** Jonathan Joseph,John Michael

Roberts,2004-05-05 Theories of discourse bring to realism new ideas about how knowledge develops and how representations of reality are influenced We gain an understanding of the conceptual aspect of social life and the processes by which meaning is produced This collection reflects the growing interest realist critics have shown towards forms of discourse theory and deconstruction The diverse range of contributions address such issues as the work of Derrida and deconstruction discourse theory Eurocentrism and poststructuralism What unites all of the contributions is a sense that it is essential to provide a realist alternative to the hitherto dominance of social constructionism hermeneutics and postmodernism over many of the issues discussed By developing a realist perspective the different authors attempt to embed discourse within the structured nature of the reality of the world Realism can situate language discourse and ideology within context specific or causally efficacious circumstances Realism can help to uncover issues of power representation and subjectivity and how discursive and other social practices produce real effects This can help us understand the manner in which non discursive social structures are reproduced through various forms of ideology and discourse And by knowing this we can start to address questions concerning human emancipation and how the world is to be transformed Quantum

Theory and the Flight from Realism Christopher Norris,2002-11-01 This book is a critical introduction to the long standing debate concerning the conceptual foundations of quantum mechanics and the problems it has posed for physicists and philosophers from Einstein to the present Quantum theory has been a major influence on postmodernism and presents significant problems for realists Keeping his own realist position in check Christopher Norris subjects a wide range of key opponents and supporters of realism to a high and equal level of scrutiny With a characteristic combination of rigour and intellectual generosity he draws out the merits and weaknesses from opposing arguments In a sequence of closely argued chapters Norris examines the premises of orthodox quantum theory as developed most influentially by Bohr and Heisenberg and its impact on various philosophical developments These include the ideas developed by W V Quine Thomas Kuhn Michael Dummett Bas van Fraassen and Hilary Putnam In each case Norris argues these thinkers have been influenced by the orthodox construal of quantum mechanics as requiring drastic revision of principles which had hitherto defined the very nature of scientific method causal explanation and rational enquiry Putting the case for a realist approach which adheres to well tried scientific principles of causal reasoning and inference to the best explanation Christopher Norris clarifies these debates to a non specialist readership and scholars of philosophy science studies and the philosophy of science alike

Quantum Theory and the Flight From Realism suggests that philosophical reflection can contribute to a better understanding of these crucial current issues

Derrida Madeleine Fagan, 2007-04-18 death of Jacques Derrida in 2004 represented a major interruption in contemporary intellectual life This death calls for an engagement with Derrida's work and an attempt to understand his legacy Such a discussion is fraught with tension between remaining faithful after death and putting Derrida's writing to work in new directions posing challenges and exposing limitations In short this legacy is necessarily a negotiation The aim of this book is to grapple with this specific theme and to explore the implications of Derrida's death for the future of critical thought itself The authors demonstrate that there is no single way to adopt or inherit Derrida's thought Rather through their engagement with contemporary themes within Politics and International Studies Philosophy Literary Studies and Postcolonial Studies each chapter illuminates the degree to which on going reflection radical critique and above all radical self critique are demanded by deconstruction This book provides the key st

On Truth and Meaning Christopher Norris, 2006-06-15 Christopher Norris presents a wide ranging and distinctively angled perspective on many of the most challenging topics in current philosophical debate and explores a range of issues in epistemology ethics and philosophy of mind language and logic The book marks a further stage in the author's project of developing a realist truth based approach that would point a way beyond the various unresolved dilemmas and dichotomies bequeathed by old style logical empiricism In a series of closely argued chapters Norris draws out the two chief kinds of deficit normative and causal explanatory that have characterised much recent work in the analytic line of descent He gives a shrewd diagnostic account of the rift that opened up between the two traditions of contemporary philosophic thought one consequence of which was the analytic failure to develop precisely those normative resources that were needed in order to break out of that impasse The book also engages critically with the work of Donald Davidson Saul Kripke John McDowell Hilary Putnam Neil Tennant and Crispin Wright and mounts a vigorous challenge to the prominent strain of anti realist thinking developed on logico semantic and metaphysical grounds by Michael Dummett

The Challenge of Coleridge David P. Haney, 2010-11 Interweaving past and present texts The Challenge of Coleridge engages the British Romantic poet critic and philosopher Samuel Taylor Coleridge in a conversation in Hans Georg Gadamer's sense with philosophical thinkers today who share his interest in the relationship of interpretation to ethics and whose ideas can be both illuminated and challenged by Coleridge's insights into and struggles with this relationship In his philosophy poetry theology and personal life Coleridge revealed his concern with this issue as it manifests itself in the relation between technical and ethical discourse between fact and value between self and other and in the ethical function of aesthetic experience and the role of love in interpretation and ethical action Relying on Gadamer's hermeneutics to supply a framework for his approach Haney connects Coleridge's ideas with among others Emmanuel Levinas's other oriented notion of ethical subjectivity Paul Ricoeur's view about the other's implication in the self reinterpretations of Greek drama by Bernard Williams and Martha Nussbaum and Gianni Vattimo's post Nietzschean

hermeneutics Coleridge is treated not as a product of Romantic ideology to be deconstructed from a modern perspective but as a writer who offers a challenge to our modern tendency to compartmentalize interpretive issues as a concern for literary theorists and ethical issues as a concern for philosophers Looking at the two together Haney shows through his reading of Coleridge can enrich our understanding of both *Alain Badiou* Jason Barker,2002 Alain Badiou is rapidly emerging as one of the most radical and influential philosophers of our time Badiou opposes the contemporary reduction of philosophy to nothing but a matter of language and premature announcements of the end of philosophy and thus sets himself against both analytic and continental modes of philosophy Setting the traditional platonic concerns of philosophy truth and being against the modern sophists of postmodernism Badiou has articulated a powerful systematic philosophy with profound ethical and political consequences A Theory of Minimalism Marc Botha,2017-10-19 The explosion of minimalism into the worlds of visual arts music and literature in the mid to late twentieth century presents one of the most radical and decisive revolutions in aesthetic history Detested by some embraced by others minimalism s influence was immediate pervasive and lasting significantly changing the way we hear music see art and read literature In *The Theory of Minimalism* Marc Botha offers the first general theory of minimalism equally applicable to literature the visual arts and music He argues that minimalism establishes an aesthetic paradigm for rethinking realism in genuinely radical terms In dialogue with thinkers from both the analytic and continental traditions including Kant Danto Agamben Badiou and Meillassoux Botha develops a constellation of concepts which together encapsulate the transhistorical and transdisciplinary reach of minimalism Illustrated by a range of historical canonical and contemporary minimalist works of different media from the caves of early Christian ascetics to Samuel Beckett s late prose Botha offers a bold and provocative argument which will equip readers with the tools to engage critically with past present and future minimalism and to recognize how in a culture caught between the poles of excess and austerity minimalism still matters The Charmed Circle of Ideology Geoff Boucher,2009-03 Set against the collapse of social theory into a theory of ideological discourse Geoff Boucher sets to work a rigorous mapping of the contemporary field targeting the relativist implications of this new form of philosophical idealism Offering a detailed and immanent critique Boucher concentrates his critical attention on the postmarxism of Laclau and Mouffe Butler and i ek In response Boucher points to intersubjectivity as an exit from postmarxist theory s charmed circle of ideology Derrida, Badiou and the Formal Imperative Christopher Norris,2012-08-02 In this path breaking study Christopher Norris proposes a transformed understanding of the much exaggerated differences between analytic and continental philosophy While keeping the analytic tradition squarely in view his book focuses on the work of Jacques Derrida and Alain Badiou two of the most original and significant figures in the recent history of ideas Norris argues that these thinkers have decisively reconfigured the terrain of contemporary philosophy and between them pointed a way beyond some of those seemingly intractable issues that have polarised debate on both sides of the notional rift between the analytic and continental traditions In particular his book sets

out to show against the received analytic wisdom that continental philosophy has its own analytic resources and is capable of bringing some much needed fresh insight to bear on problems in philosophy of language logic and mathematics Norris provides not only a unique comparative account of Derrida's and Badiou's work but also a remarkably wide ranging assessment of their joint contribution to philosophy's current if widely resisted potential for self transformation *Reality and Self-Realization* MinGyu Seo, 2014-03-21 Since the publication of Roy Bhaskar's *A Realist Theory of Science* in 1975 critical realism has been evolved as one of the new developments in the areas of philosophy of natural and social science which offers an alternatively fresh view to the existing theories including positivism and post modernism Bhaskar's intellectual movement which is now fully international and multi disciplinary and continues to influence the philosophies of natural and social science has transformed into Dialectical Critical Realism hereafter DCR and the philosophy of meta Reality MinGyu will conclude that his anti anthropic Non duality continues through all the steps of Bhaskar's thought maintaining the consistency of his scientific metaphysical and spiritual journey The anti anthropic motif is fully realized in the philosophy of Non duality the constellational identification of dualism duality and non duality in his meta Reality Defending Bhaskar against Collier Agar and Morgan MinGyu tries to show how its anti anthropic and non dualistic foundation is sustained through the whole of Bhaskar's journey involving a transformation of its subject matters from reality to the dialectic of reality to the real truth underlying the former stages This book provides an indispensable resource for all students of philosophy and the human sciences *Revitalizing Causality* Ruth Groff, 2007-12-18 This cutting edge collection of new and previously published articles by philosophers and social scientists addresses just what it means to invoke causal mechanisms or powers in the context of offering a causal explanation A unique collection it offers the reader various disciplinary and interdisciplinary divides helping to stake out a new neo Aristotelian position within contemporary debate **The Moral Worlds of Contemporary Realism** Mary K. Holland, 2020-06-11 Literature has never looked weirder full of images colors gadgets and footnotes and violating established norms of character plot and narrative structure Yet over the last 30 years critics have coined more than 20 new realisms in their attempts to describe it What makes this decidedly unorthodox literature realistic And if it is then what does realism mean anymore Examining literature by dozens of writers and over a century of theory and criticism about realism *The Moral Worlds of Contemporary Realism* sorts through the current critical confusion to illustrate how our ideas about what is real and how best to depict it have changed dramatically especially in recent years Along the way Mary K Holland guides the reader on a lively tour through the landscape of contemporary literary studies taking in metafiction ideology posthumanism postmodernism and poststructuralism with forays into quantum mechanics new materialism and Buddhism as well to give us entirely new ways of viewing how humans use language to make sense of and to make the world *A Companion to Derrida* Zeynep Direk, Leonard Lawlor, 2014-07-02 *A Companion to Derrida* is the most comprehensive single volume reference work on the thought of Jacques Derrida Leading scholars present a summary of his

most important accomplishments across a broad range of subjects and offer new assessments of these achievements The most comprehensive single volume reference work on the thought of Jacques Derrida with contributions from highly prominent Derrida scholars Unique focus on three major philosophical themes of metaphysics and epistemology ethics religion and politics and art and literature Introduces the reader to the positions Derrida took in various areas of philosophy as well as clarifying how derrideans interpret them in the present Contributions present not only a summary of Derrida s most important accomplishments in relation to a wide range of disciplines but also a new assessment of these accomplishments Offers a greater understanding of how Derrida s work has fared since his death *Deconstruction: A Reader* Martin McQuillan, 2017-09-25 Philosophers do it literary critics do it even architects poets painters do it It can involve the concepts of capital politics and justice So what after all is deconstruction *Deconstruction A Reader* makes an answer to this question available in the only way possible by offering a selection of breathtaking range and depth of essential texts With more than sixty selections by fifty contributors including nine pieces by Jacques Derrida this is the ultimate anthology of deconstructive reading demonstrating that deconstruction is vivid surprising varied and true to the text **Deconstruction After All** Christopher Norris, 2015-10-01 This collection of interviews reflections and creative criticism presents Christopher Norris s vigorous polemics with Hayden White Michel Foucault Jean Baudrillard Jean Francois Lyotard Thomas Kuhn Emmanuel Levinas Pierre Bourdieu Richard Rorty and Stanley Fish Alongside Norris s uncompromising critiques there emerge passages of close and careful reading of Jacques Derrida s texts as he cites and reiterates Derrida s philosophical contexts in the works of Immanuel Kant Gaston Bachelard and Georges Canguilhem and in the current discursive fields of epistemology and philosophy of science The book also offers a coda of essays on Frank Kermode Terry Eagleton and Terence Hawkes This collection prefaced with the author s own academic memoir provides an accessible and provocative introduction to Norris s critical thought and highlights the wide range of his interests and philosophical engagements
