[Examining Competitiveness Through Science, Technology, Engineering and Math](#) United States. Congress. House. Committee on Education and Labor. Subcommittee on Higher Education, Lifelong Learning, and Competitiveness,2008 **The First Year at School: An International Perspective** Peter Tymms,Tiago Bartholo,Sarah Howie,Elena Kardanova,Mariane Campelo Koslinski,Christine Merrell,Helen Wildy,2023-06-26 This book explores an under researched but vital part of education the first year at primary elementary school The work shows that children s progress varies enormously from school to school class to class and child to child This variation is important because the more

progress that children make in that first year of school the higher their academic attainment at the end of compulsory schooling The iPIPS international Performance Indicators in Primary Schools project upon which this book is based has been able to provide deeper insights into some of the key issues within and across different contexts whilst highlighting new and some ongoing issues Despite all the work there remain unanswered or new puzzling issues which are also explored We need to know how to improve the education at that stage and more broadly we need greater clarity about when children should be taught to read and be introduced to formal arithmetic in other words when they should start school We also need to be clearer about whether when and how young children should be assessed The book will suggest some answers but it will raise important questions and dilemmas for which we do not as yet have answers

### **New Developments in Pathways Towards Diversity and Inclusion in STEM: A United States Perspective**

Alexander Gates,Juan Gilbert,Chris Botanga,Kim Nguyen,Bonita London,2022-10-17 The Louis Stokes Alliances for Minority Participation LSAMP program of the US National Science Foundation has been a primary force for raising the success and graduation of minority students in STEM for 30 years Increasing the number of underrepresented students earning baccalaureate degrees and entering graduate school in STEM

is the goal of LSAMP This goal has been nearly achieved through the formation of alliances of degree granting institutions of higher learning varying from community colleges to major research institutions Currently there are 59 alliances including more than 400 institutions LSAMP is responsible for more than 650 000 bachelor s degrees earned by minority students in STEM The papers for this Research Topic should focus on the use of LSAMP activities programs and collaborations to develop pathways to success and graduation of STEM majors from minority groups that underrepresented in STEM These pathways can include any segment from pre college through graduate school Areas of special interest include mentoring research experiences transitions between levels and novel approaches for retention The studies should be research based and rigorous They can be pure research studies curriculum and design or literature reviews but they must be at a cutting edge level and be subject to detailed review and assessment

Chassy,2016-08-09 Despite the importance of mathematics in our educational systems little is known about how abstract mathematical thinking emerges Under the uniting thread of mathematical development we hope to connect researchers from various backgrounds to provide an integrated view of abstract mathematical cognition Much progress has been made in the last 20 years on how numeracy is acquired Experimental psychology has brought to light the fact that numerical cognition stems from spatial cognition The findings from neuroimaging and single cell recording experiments converge to show that numerical representations take place in the intraparietal sulcus Further research has demonstrated that supplementary neural networks might be recruited to carry out subtasks for example the retrieval of arithmetic facts is done by the angular gyrus Now that the neural networks in charge of basic mathematical cognition are identified we can move onto the stage where we seek to understand how these basics skills are used to support the acquisition and use of abstract mathematical concepts      **Choice** ,1989      **Urban Mass Transportation Abstracts** ,1982
