New Dark Age:

New Dark Age James Bridle, 2018-07-17 New Dark Age is among the most unsettling and illuminating books I've read about the Internet which is to say that it is among the most unsettling and illuminating books I've read about contemporary life New Yorker As the world around us increases in technological complexity our understanding of it diminishes Underlying this trend is a single idea the belief that our existence is understandable through computation and more data is enough to help us build a better world In reality we are lost in a sea of information increasingly divided by fundamentalism simplistic narratives conspiracy theories and post factual politics Meanwhile those in power use our lack of understanding to further their own interests Despite the apparent accessibility of information we're living in a new Dark Age From rogue financial systems to shopping algorithms from artificial intelligence to state secrecy we no longer understand how our world is governed or presented to us The media is filled with unverifiable speculation much of it generated by anonymous software while companies dominate their employees through surveillance and the threat of automation In his brilliant new work leading artist and writer James Bridle surveys the history of art technology and information systems and reveals the dark clouds that gather over our dreams of the digital sublime

Science Fiction and the New Dark Age Harold L.

Berger, 1976

Humanism: In Command or in Crisis? Michael A. Schuler, 2023-08-31 According to bestselling historian Yuval Noah Harari today's average American has their foot in three ideological camps nationalism free market capitalism and humanism The first two might seem obvious but the third It's entirely possible that most who qualify for that label would be hard pressed to explain its meaning much less use it self descriptively This book is designed to serve two important purposes First to provide an accessible resource for anyone curious about the humanist tradition and the arguments advanced by leading contemporary proponents Second to address what the author believes is a critical question for our time the era of the Anthropocene Is humanism's seemingly benign package of values at least partially responsible for some of the world's most pressing problems To answer the last question Schuler draws from an eclectic collection of commentators including life scientists spiritual writers public intellectuals technologists novelists and even poets In the end this wide ranging survey will help the reader determine whether humanism makes sense for them

Chromatic Algorithms Carolyn L.

Kane,2014-08-13 These days we take for granted that our computer screens and even our phones will show us images in vibrant full color Digital color is a fundamental part of how we use our devices but we never give a thought to how it is produced or how it came about Chromatic Algorithms reveals the fascinating history behind digital color tracing it from the work of a few brilliant computer scientists and experimentally minded artists in the late 1960s and early 70s through to its appearance in commercial software in the early 1990s Mixing philosophy of technology aesthetics and media analysis Carolyn Kane shows how revolutionary the earliest computer generated colors were built with the massive postwar number crunching machines these first examples of computer art were so fantastic that artists and computer scientists regarded them as psychedelic even revolutionary harbingers of a better future for humans and machines But Kane shows the explosive growth of personal computing and its accompanying need for off the shelf software led to standardization and the gradual closing of the experimental field in which computer artists had thrived Even so the gap between the bright bold presence of color onscreen and the increasing abstraction of its underlying code continues to lure artists and designers from a wide range of fields and Kane draws on their work to pose fascinating questions about the relationships among art code science and media in the twenty first century [House of Darkness](#) [House of Light](#) Andrea Perron,2014-08-11 Roger and Carolyn Perron purchased the home of their dreams and eventual nightmares in December of 1970 The Arnold Estate located just beyond the village of Harrisville Rhode Island seemed the idyllic setting in which to raise a family The couple unwittingly moved their five young daughters into the ancient and mysterious farmhouse Secrets were kept and then revealed within a space shared by mortal and immortal alike Time suddenly became irrelevant fractured by spirits making their presence known then dispersing into the ether The house is a portal to the past and a passage to the future This is a sacred story of spiritual enlightenment told some thirty years hence The family is now somewhat less reticent to divulge a closely guarded experience Their odyssey is chronicled by the eldest sibling and is an unabridged account of a supernatural excursion Ed and Lorraine Warren investigated this haunting in a futile attempt to intervene on their behalf They consider the Perron family saga to be one of the most compelling and significant of a famously ghost storied career as paranormal researchers During a seance gone horribly wrong they unleashed an unholy hostess the spirit called Bathsheba a God forsaken soul Perceiving herself to be the mistress of the house she did not appreciate the competition Carolyn had long been under siege overt threats issued in the form of fire a mother s greatest fear It transformed the woman in unimaginable ways After nearly a decade the family left a once beloved home behind though it will never leave them as each remains haunted by a memory This tale is an inspiring testament to the resilience of the human spirit on a pathway of discovery an eternal journey for the living and the dead **Tavistock Institute** Daniel Estulin,2015-09-14 The real story behind the Tavistock Institute and its network from an intriguing best selling author The Tavistock Institute in Sussex England describes itself as a nonprofit charity that applies social science to contemporary issues and problems But this book posits that it is the world s center for

mass brainwashing and social engineering activities It grew from a somewhat crude beginning at Wellington House into a sophisticated organization that was to shape the destiny of the entire planet and in the process change the paradigm of modern society In this eye opening work both the Tavistock network and the methods of brainwashing and psychological warfare are uncovered With connections to U S research institutes think tanks and the drug industry the Tavistock has a large reach and Tavistock Institute attempts to show that the conspiracy is real who is behind it what its final long term objectives are and how we the people can stop them

secularization took the sting out of both the dread and promise of an afterlife and intellectuals learned to die without the hope of immortality popularized by philosophy and religion. Ultimately they produced the ideologies that generated the totalitarian regimes of the twentieth century which subsequently exterminated these intellectuals through mass murder on a scale never before experienced. The book traces the sources of this fatal entanglement and goes on to examine the contemporary condition of intellectuals in America and the world. Wherein lies the future of the intellectuals? Redner suggests that in the present state of globalization dominated by technocrats, experts and professionals their fate remains uncertain.

Global Futures Ronaldo Munck, 2025-02-27 *Global Futures: Key Concepts for Social Transformation* provokes us to rethink some of the key words and concepts which define the current global order. Prompted by crises around the world it seeks to re-energise our desire for a better future. The book takes seven key concepts from the new global studies and considers how they are used and whether they are adequate for addressing the twenty-first century's increasingly complex global order. The topics covered include widely used concepts such as development, modernity, history and politics, as well as more unusual themes such as desire, complexity and alternative futures. The core message of this book is that we need to grasp the complex and contradictory reality behind these important concepts in order to foster a new way of thinking, seeing and acting for a future fit for human purpose. Written by Ronaldo Munck, a key social theorist and social activist with a Latin American and European background, this book will be perfect for students and researchers of sociology, politics, international relations and global development.

Cottons: The Secret of the Wind Jim Pascoe, 2018-07-10 In *Cottons*, rabbits and foxes inhabit a world where magic, technology and art are used as weapons of war. Written by Jim Pascoe with bold illustrations from Heidi Arnhold. To her neighbors in the Vale of Industry, Bridgebelle is an ordinary rabbit. All day long she toils at the carrot factory. After a hard day she returns home to care for her ailing auntie. And whenever she's out she's watchful of the murderous foxes who prey on her kind. But Bridgebelle is not ordinary; she's a rabbit with talents beyond her own understanding. Using the mysterious fuel that powers her world, she can change everyday objects into thokchas, magical transforming works of art. Bridgebelle makes thokchas because they're beautiful. But there are those in her world who want to harness her powers and turn her art into a weapon.
